OUR MINERAL WEALTH.

In the United States Senate, March 7th,

tion I wish to call the attention of Senators to the interesting region from which it comes, and to submit some facts concerning its wonderful development; trusting that this body to reflect on the vast interests now held in the anthracite and other coal producing territory of the country. I am not this subject will show the importance of such legislation as shall continue the devel opment of the coal fields of the whole coun try, and so prevent the destruction of the industries which furnish a market for this Rail

All that I shall recount has taken place within my own memory and under my own observation. When I was a young man the land from which such vast wealth has been extracted was a wilderness. It could be bought for fifteen or twenty cents an acre, and no one would have it at any price. To pay the taxes on it was deemed folly and extravagance. Then population was sparse and comfort unknown. Now this whole region teems with a busy throng, and it has and refinement. On the earth's surface the unending labor of well paid men goes on,

nia-which comprises all of any importance in the country-is confined within an area when I come to speak of the enormous procoal territory. I present the increase in ulation directly subsisting and attributable to the mining interest in the remaining parts of the mining interest in the mining in the m of the hard coal region. I estimate from water and an eastern market. reliable data and an intimate knowledge of

the closest investigation successfully:

45,000 70,000

ness of the veins being accurately known:
