AYER'S CHERRY PECTORAL,

121 32 have made it known as a reliable protector against 121 32 hem. While adapted to milder forms of disease and to young children, it is at the same time the most effectual remedy that can be given for inciplent consumption, and the danger us affections of the throat and lungs. As a provision against sudden attacks of Croup, it should be kept on hand in every family, and indeed as all are sometimes subject to colds and coughs, all should be provided with this antidote for them.

Although settled Consumption is thought incurable, still great numbers of cases where the disease scened settled, have been completely oured, and the patient restored to sound health your course, and the patient restored to sound health you be the Cherry Pectoral. So complete is its mastery over the disorders of the Lungs and Throat, that the most obstinate of them yield to it. When nothing else could reach them, under the Cherry Pectoral they subside and disappear.

Singers and Public Speakers find great protection from it.

Asthma is always relieved and often wholly cured by it. Is generally cured by taking the Cherry Pectoral in small and frequent doses.

So g nerally are its virtues known that we need not publish the certificates of them here, or do more than assure the public that its qualities are fully maintained.

Containing neither Arsenic, Quinine, Bis-uuth, Zine, nor any other mineral or poisonous abstance whatever, it in nowise injures any pasubstance whatever, it in nowise injures any patient. The number and importance of its cures in the ague districts, are literally beyond account, and we believe without a parallel in the history of Ague medicine. Our pride is gratified by the scknowredgments we receive of the radical cures effected in obstinate cases, and where other remedies had wholly failed.

Unacclimated persons, either resident in, or travelling through miasmatic localities, will be protected by taking the Ague Cure daily.

For Liver Complaints, arising from torpidity of the Liver, it is an excellent remedy, stimulating the Liver into healthy activity.

For Billous Disorders and Liver Complaints, it is an excellent remedy, producing many truly remarkable cures, where other medicines had failed.

Also in, the more concealed forms, as Dyspepsia, Droppy, Heart Disease, Fite. Epilepy, Neuralyia, and the various Ulcerous affections of the muscular and nervous systems.

Syphilis or Venereal and Mercurial Diseases are cured by it, though a long time is required for subduing these obstinate maladies by any medicine. But long continued use of this medicine will cure the complaint. Leucorrhous or Whites, Uterini Ulcerations, and Female Diseases, are commonly soon relieved and ultimately cured by its purifying and invigorating effect. Minute Directions for each case are found in our Almanac, supplied gratis. Rheumatism and Gesat, when caused by accumulations of extraneous matters in the blood, yield quickly to it, as also Liver Complaints, Torpidity, Congestion or Inflammation of the Liver, and Jeundice, when arising as they often do, from the rankilng poisons in the blood. This SARSAPARILLA is a great restorer for the strength and vigor of the system.

FOR PURIFYING THE BLOOD The reputation this excellent medicine enjoys, is derived from its cures, many of which are truly marvelices. Inveterate cases of Serofulous discase, where the system seemed saturated with corruption, have been purified and cured by it. Serofulous affections and disorders, which were raption, have seen purshed and cured by it. Scrofulous affections and disorders, which were aggravated by the scrofulous contamination until they were painfully afficing, have been radically cured in such great numbers in almost every section of the country, that the public searcely need to be informed of its virtues or uses.

Scrofulous poison is one of the most destructive cennics of our race. Often, this unseen and unfelt tenant of the organism undermines the constitution, and invites the attack of enfeebing or fatal diseases, without exciting a suspicion of its presence. Again, it seems to breed infection through the body, and then, on some favorable occasion, rapidly develop into one or other of its hideous forms, either on the surface or among the vitals. In the latter, tubercles may be suddenly deposited in the langs or heart, or tumors formed
