THE PIANO OF AMERICA.

These Pianos are universally acknowledged by competent judges equal to the less Union made, For reverences, they have many theorand city and country residents, including large numbers of the High Schools, Seminaries, &c.

These Pianos have not only stood the continual use and heavy practice or one year, but have been used the last fifteen years to the utmost satisfaction of those using them.

They have taken premiums and medals wherever exhibited, such has been the demand for Planes, that Messer, hidden lips, have been compelled to cularge their works to the extent of 21 to 39 Panos a weak.

THE PADDY RUN

COAL COMPANY, or

SHICKSHINNY, PENNSYLVANIA. CAPITAL \$150,000.

JOHN M. STACKHOUSE, President. CHAS. A. BOONE, Secretary and Treasurer. DIRECTORS: John M. Starkhouse, N. L. Campbett, Chus, A. Boone, Cyrus Stackhouse, A. M'Dowell,

OFFICE: MAIN STREET, SHICKSHINNY, PA.

The lands held by this Company, consist of FOUR HUNDRED AND FORTY-

ONE ACRES, ONE. ACRES; and sixty-four perches, of carefully selected and lying southwest of Whikes-Barre, Lazerne coun-ty, Pa., in the western part of the Great Northern or Wyoming Coal Basin. A very correly and thorough examination re-

cently made has proven these (for the above) lands to be the embediment of a vast amount of the very best quality of unthracite cost, having every facility that could be desired for transportation in all directions. The above tract is crossed by a good tood, and also directly in front, and joining are the Lackawanna & Blooms rg railroad, and the Wyoming canal, thus af fording the very best advantage of a carrying road

and canal running to the very mouth of the nanes without expense to the company. The measurement of the different bedser scame already developed was carefully obtained and added together;—the thickness of these scams, including the celebrated "Red Ash," "Birck Mountain," or "Gran I Tunnel" vein, is thirty-one and a hair feet, [31], every cubic yard of which will yield a ton, giving a large amount of the best quality of coal,

Bioomsburg, February 15, 1865. The location is such that all the veins may be cut and worked to the greatest possible advantage above water level, and at much less expense than can be done from colleries operating below water

Conditions of Sile :—Ten per cent, of one-fourth be purchase mancy at the striking down of the fonesty, one-fourth less the kin per cent, at the authrnation absolute, and the remaining three-auths know year thereutter, with interest from outrination ass. The purchaser to per for docu-ied stamps. SAMUEL, EVERITY, February 22, 1807-51. The coal can be brought to the surface through rifts or tunnels which drain the water from the mines and saves the heisting of the coal. He the eligibility of these lands for cheap mining is unquestionable. Very lately the "Grand Tunnel" or "Red Ash" vein has been opened, and is now producing as the a quality of coal as has ever been promised in the authracite regions. The breaker now in operation is capable of preparing from 150 to 250 tons per day. The surface contains an atundant supply of wood and timber very valuable for mining purposes, which gives the tract the advantage of many other coal lands. The fact that almost all valuable coal lands are being rapidly taken up by heavy capitalists or large corporations, shows that they must stendily and greatly rise in the market value, while with the liminence and constantly increasing demant for mines and saves the hoisting of the coal.
