Is it not strange that the Republican always reserves its praise for the most coundrels in the land? Its pets are such men as Butler, a thief and a brute, Stanton, a suborner to perjury, Cameron, a briber to legislative bodies, and Landon who sells himself and the State to soulless corporations. What must the man be who admires such characters?

A very careful and thorough examination re-A very circuit and thorough examination re-cently made has proven these for the above; lands to be the endestiment of a vast amount of the very best quality of antirucitie coal, having every facility that could be desired for trans-portation in all directions. The above tract is crossed by a good road, and also directly in front, and joining are the Lackawanna & Blooms-lane with the could be desired for the country of t

ours called al, and the Wyoming canal, thus af-fording the very best advantage of a carrying road and canal running to the very mouth of the mines without expense to the company. The measurement of the different beds or seans already developed was carefully obtained and added together:—the thickness of these scams, including the celebrated "Red Ash," "fluck Monn-tain," or "Grand Tunie!" vein, is thirty-one and a half feet, (il)g, every cable pard of which will yield a ton, giving a large amount of the best quality of each.

quality of coal.

The location is such that all the veins may be
ent and worked to the greatest possible advantage

The coal can be brought to the surface through frifts or tunnels witch drain the water from the mines and saves the botsting of the coal. So the mines and saves the hoisting of the coal. So the eligibility of these lands for cheap mining is unquestionable. Very lately the "Grand Tunnel" or "Ried Ash" yeln has been opened, and is new producing as fine a quality of coal as has ever been produced in the antitractic regions. The breaker now in operation is capable of preparing from he to 200 tons per day. The surface contains an abundant sumply of wood and timber very valuable for mining purposes, which gives the tract the advantage of many other coal lands. The fact that almost all valuable coal lands are being rapidly there up by hency capitalists or large corporations, shows that they must stendly and greatly rise in the market value, while with the limitenes and constantly increasing demand for this coal, and the Eulemad and North Branch canal, possing by the mounts of the mines, through nat, passing by the mouths of the mines, through the Great from making districts of Bloomsburg, Panville, Pameannen, Harrisburg, Middletown, Marietta, and Columbis, to tide-water at Have
