The remody is not in increasing the number which would open a still wider field for lobbyists, but in sending men tried and ried, of unimpeachable character, and none others should be supported.

The fact is, that most of our law makers are mere speculators, or politicians who think their whole duty consists in passing a great many acts without any reference to their necessity or constitutions.

GLOTES AND VESTINGS the very best quality of antitracite coal, having every facility that could be desired for transportation in all directions. The above tract is crossed by a good read, and also directly in front, and joining are the Lackawanna & Blooms-lurg railread, and the Wyoming canni, thus ar-fording the very best advantage of a carrying road SHOEMAKRUS HAMOWARD.

A full assortiment for carpenters. I have planes—all kinds, saws; hand, named, rip, and compass, squares—steel, fron, and try; boring machines, chisles, augers, bevels, mallets, braces, gauges, chistes, augers, bevels, mailets, braces, gauges, plows, rules, bits, and about everything for car-

and canal running to the very most accurrying road and canal running to the very month of the intres without expense to the company. The measurement of the different beds or seams already developed was carefully obtained and added together:—the thickness of these seams, including the celebrated "Red Ash," "Buck Moun including the celebrated "Red Ash," "Buck Moun-tain," or "Grand Tunnel" vein, is thirty-one and a half feet, silly, every cubic yard of which will yield a tob, giving a large amount of the best quality of coal.

The location is such that all the veins may be

cut and worked to the greatest possible advantage above water level, and at much less expense than can be done from colleries operating below water

bing hoes, shovels, spades, spading forks, hoes, akes, bed pins, twine, skates, plows, coffin tria minrs. Frarry, red chalk, white chalk, wire, horse mills, meat cutters, scales, wash boards, The coal can be brought to the surface through trifts or tunnels which drain the water from the mines and saves the hoisting of the coal. So the eligibility of these lands for cheap mining is un-questionable. Very lately the "Grand Tunnel" or "Red Ash" vein has been opened, and is now producing as fine a quality of coal as has ever been produced in the antiractic regions. The breaker now in operation is capable of preparing from 150 to 200 tons per day. The surface contains an abundant supply of wood and timber very valunble for mining purposes, which gives the tract the advantage of many other coal lands. The fact that almost all valuable coal lands are being rapidly taken up by heavy capitalists or large cor-porations, shows that they must stendily and Pumps, lead pipe, etc.,
