- A Two HEADED GIRL .- One of the most curious feaks of nature the world has ever seen is a two-headed girl, which is on exhibition at Beston. FRIDAY MORNING NOV. 12, 1869.

EF THE COLUMBIAN has the Largest poraries, and is therefore the best medium for advertising in this section of the State.

During the campaign we frequently informed our opponents what sort of a man they were supporting, but with blindly. Now that his election is secured papers which eulogized him most highy are now abusing him without stint.

"Governor Geary had a perfect right really one of his principal fortes.

At the close of the first gosp to take back that which he had intrusted to Benjamin H. Brewster, but he had no right, in justice to the high and dignified position which he filled, to do it in an underhand, disingenuous manner. We fear that he has smirched his position, that he has damaged his splendid fame as a soldier, for a true soldier is distance of the position of the soldier is the soldier is the soldier in the soldier in the soldier is the soldier in the soldier in the soldier is the soldier in the soldi aiways expected to be straight forward and candid, that he has humiliated his political friends; and brought reproach upon his party. The end to be attained would never justify the employment of such means, and this end could have been reached in a fair and manly way." Geary may be accustomed to criticism from his political opponents, but it must

hurt his pride to be stabbed by his own party friends. "so the struck eagle, stretched upon the plain No more through rolling clouds to soar again, Viewed his own feather on the fatal dart. That winged the harf that quivered in his heart Keen were his pangs, but keener far to feel

KEMBLE.-What will be done with William H. Kemble, late State Treasurer, now that the Attorney General has been changed. Governor Geary instructed his late Attorney General to ommence proceedings against Kemble, as a defaulter to the State, and he was just about to do so, when he was removed. The people expect the new Attorney General to proceed to recover the money which the Governor says is due the State. But will he do it? We fear not, since it looks as though ope of the chief motives for getting rid of the late Attorney General, was to hush up this investigation. Kemble is one of the party that had the change made, and this may have been his profit in the transaction. But their little game is spoiled by the exposure, as the Press will be sure to compel an investigation,

A NATIONAL TAX ON DOGS .- The Philadelphia Press suggests the imposition to a tax of one dollar apiece upon all the dogs in the country. The reasons for this is that the dog is a privileged animal: he eats, but does not work. and thus he is on a par with men who are possessed with capital. In one or two of the States a tax is now levied upon dogs, but its provisions are not searchhead, these dogs would pay the currency interest on \$100,000,000 of the national debt. The cost of collection would be nothing in addition to the present machinery. Nearly five-sixths of these 6,000,000 are worthless or inferior dogs, and perhaps the half of them would be killed off, and but \$3,000,000 gathered into the treasury. Still, this is a little fortune. Let us see what further good

would flow from such a tax: First. It would improve the blood of the races of dogs themselves, combing out the mongrels and curs of the low

degrees.
Third. It would add to the security and wealth of the farmers, who, in almost the farmers of the farme -Rev. Thomas Allen, who was the most very section, grow sheep, even if first minister of the church in Pittsfield it is only one or two.

The annual loss to farmers by the dein injuries. All this is laid to dogs, and their ravages not only immediately injure farmers by the sheep destroyed, but tend to depress wool growing, from the uncertainty attending the enterprise in that direction.

The tax on dogs is no novelty. Great Britain has tried it with good effect, and it already exists in New England, Pennsylvania and other communities.

Communicated. Dedication in Mount Carmel. CENTRALIA, Nov. 3, 1869.

Mn. EDITOR: -Sunday, October 51st, was a day never to be forgotten by the Catholies of Mt. Carmel - having on that day the pleasure of seeing dedicated to Almighty God a new and commodious church, the crection of which they comnenced only a few months ago.

The dedication was performed by Right Rev. J. T. Shannahan, D. D. Bishop of Harrisburg, assisted by Rev. M. Sheridan of Ashland and Rev. D. I. M'Dermott of this place. After the dedication the Litany of the Saints was read-the whole congregation participating in the responses. High Mass was then sung by Father M Dermott. This being the first time, while he has that blind obedience to party which been here, that the Rev. gentleman had characterizes them, they voted for him occasion to bring his musical ability into requisition, and it was a matter of it is admitted that he is a brainless, doubt to some whether his proficiency faithless, conceited jackanapes, and the in this department was equal to his other acquirements, he was listened to with much interest, and it is only justice Even the Republican which swallows to the Rev. gentleman to say that he every dose labeled "Radical," feels acquitted himself in such a masterly naused at the stomach, and after giving style as to convince the most fastidious a synopsis of the Brewster affair, says: that, so far from being neglected, it was At the close of the first gospel, the

Right Rev. Bishop ascended the altar, and proceeded to deliver the dedication sermon. He took his text from St. Mark, XI, 17 .- "And He taught, saying to them: Is it not written: My house shall be called the house of prayer to all nations? * * * " In the course of the sermon he spoke in high terms of the zeal manifested by Farther M'Dermott and the faithful under his charge, of which the beautiful temple he had that morning dedicated to the service of God and the more extensive one rapidly approaching completion in this borough are striking illustrations. He dwelt at length upon the necessity and power of prayer as a means of securing salvation, and do doubt made a lasting impression of his subject on the minds of many. Notwithstanding apparent efforts at adapting his language to the undertanding of the most illiterate, he sometimes burst into strains of eloquence which were extremely sublime, and most productive of beautiful and appropriate comparisons. It would be a rare treat which he could pour the full current of his eloquence.

The choir performed its part in quite creditable manner, and drew from the um, that he rarely met, in rural districts, such proficiency in music.

In the evening Vespers were sung by Rev. D. I. M'Dermott, who also delivered a very fine sermon. After Vespers there was Benediction of the Blessed Sacrament by the Bishop.

Very Strange.

MAN'S HEAD CUT OFF AND PUT ON ANOTHES om the Annels de la Chirurgie Etrangere On the 18th of April, 1868, in the prison of Ourica (Province of Minas-Geraes, in Brazil, two men maned Averio and Carines were executed at the same time. In Brazil executions take place with closed doors, in the interior of the prison. Dr. Lorenzo y Carmo of Rio Janeiro, well known by savans for his remarkable works on electricity applied to physiology, his surgical skill, and his success in auto-plastic operations, obtained permission to profit by this event in order to experiment on the power of electricity, and to illustrate its analogy with some of the phenomena of life. The numerous experiments hitherto attempted have been made on the head and trunk sepa-

within a few minutes of each other into the same basket-first that of Carines. then that of Aveiro. Immediately after this second execution a compression was effected by a pupil of Dr. Lorenzo on the carotid arteries of one of the heads, so as to stop the hemorrhage. The body was then placed on a bed already prepared, and Dr. Lorenzo stuck the head as exactly as possible on the section and kept it in that position. The cells of a powerful electric pile were applied to the base of the neck and on the breast. Uunder this influence, as in former experiments, the respiratory movements were at once perceptible. As the blood which penetrated in abundance through the surface of the scar threatened to stop the pasage of air.Dr. Lorenzo had recourse to tracheotomy. Respiration then ensued regularly. The head was fastened to the body by stitches and by a special apparatus. The physiologist wished to ascertain for how long a time this appearance of life could thus be artificially maintained. His astonishment was great when he

saw that at the end of two hours not only did respiration still continue under the influence of the electric current, but that circulation had even résumed a certain regularity. The pulse beat freely but sensibly. The experiment was conto listen to the Bishop on a subject upon | tinued without intermission. At the end of sixty-two hours it was evident to the astonishment of every one that a process of cicatrization had commenced on the lips of the section. A little later Rt. Rev. Bishop the deserve 1 encommi- signs of life manifested themselves spontancously in the head and limbs, till then deprived of motion. At this moment the director of the prison, arriving for the first time in the experiment room, observed that, by a singular mistake due to the haste of the operation. the head of Carines had been taken for that of Aveiro, and had been applied to the body of the latter. The experiment was continued notwithstanding. Three days later the respiratory movements reproduced themselves, and electricity was suppressed. Dr. Lorenzo y Carmo and his assistants were stupelled, frightened at a result unexpected, and at the power of an agent which, in their hands, had restored life to a body whose right to exist the law had forfeited.

The learned surgeon, who had only had in view a simple physiological extippe this work, which science, aided was complete, and motion, though still

elections the Republican says:

"In New York the Democratic State candidates were elected by reduced majorities.

The Legislature remains Republican.

In New Jersey we did as well as could be expected, electing eno gh members of the Legislature probably to give us a Republican gain, though not sufficient to be a majority.

Gov. Claffin is re-elected in Massachusetts, and the Legislature is overwhelmingly Republican."

Now this kind of news may do for Radical voters, but the facts are, First, The Demoeratic majority in New York is nearly double that given Seymour last year, and both branches of the Legislature are Democratic. In New Jersey the Democrats have an inreased majority in the Legislature.

In Massachusetts the Radical majority has been reduced from 68,855 to 10,000, and the Democrats have more than double their form- goods, er number in the Legislature.

The most popular Monthly in the world.—New York Observer.

We must refer in terms of calogy to the high tone and varied excellences of Harper's Magazine —a journal with a monthly eircutation of about 124,160 copies—in whose pages are to be found aome of the choicest ight and general reading of the duty. We spenk of this work as an evidence of the culture of the American people; and the ordinary it has acquired is merited, Each Number contains folly iff pages of reading matter, appropriately illustrated with good woodcute, and it combines in itself the racy monthly and the more philosophical quarterly, blended with the best features of the duly journal, It has great power in the dissemiliation of a love of pure literature.—The Nagu's Guide to American Electrical management of Harper's, ** All the perbolicals which the Harper's publish are almost strailly well edited.—The Nation, N. F.

We can accomplish the first period, the simple fact that it meets precisely the popular taste, irrnishing a variety of pleasing and instructive reading for all.—Each a Headld, Roston.

mitement to interest and instruct; and it has, besides, good stories and therery matter of merit.
It is not surprising that the potuna, with any VALUABLE REALE asses, good stories and therary matter of merit. It is not surprising that the joirnal, with such relatives, has achieved in a short time an impactors has achieved in a short time an impactors of the surprising of the strict was desired in thousands of immiles, and its publishers have filled the demand. The young hady who buys a single number of Harper's lazar is made a subscriber for life.—New York Ewong Post.

The Sazar is excellent. Like all the periodicals which the Harper's publish, it is almost ideally well edited, and the class of readers for whom it is intended—the mothers and daughters in average families—can not but profit by its good sense and good teste, which, we have no doubt, are to day making very many tomes laspider than they may have been before the women legan taking tensors in personal and household and social management from this good tested hearted hearter.—The Nation.

It has the merit of being sensible, of conveying instruction, of giving executed patterns in every departness, and of being sensible, of conveying matter,—Watenson and Reflector.
