CAMPILLION CARPET!

winds, in all thirteen tons, worth \$91. This exposure of cattle and calves reduced their size and market value onethird-annual increase, six head, and average value lost, \$8 each-\$48. Ten per cent, of his sheep and lambs were lost by want of shelter, and the clip was diminished twenty five per cent, from the same cause-total loss on sheep, per annum, \$50. The whole yearly loss on cattle and sheep was, therefore, \$189. In forty years this annual loss, with about \$35,000. Thus one fortune had been sunk.

Secondly. In a want of good rotation o crops. He raised wheat after wheat, oats after oats, and corn after corn, because the stubble was most easily ploughed, till labor. A good rotation would safely have given him one-third more, which would have been a clear gain, on an average, of at least \$5 an acre, on about fifty acres, yearly-total, \$250 a year. interest, would amount to more than \$50,000! This was the second fortune sunk.

Thirdly. In raising crops of weeds, Some of his pasture-fields had a heavier growth of mulleins, rag-weed, john worth and thistles, than of grass; consequently, at least half his land was wasted to grow them. On fifty acres of pasture, at least \$2 each were yearly wasted, to ada thistle patches, in retarding growth and preventing clean harvesting, and his greatly diminished crop of corn by fox-tail and pig-weed. The annual loss from weeds was therefore, at least \$100 -the amount of which, with interest, in forty years would be \$20,000. The third fortune.-Maryland Farmer.

## Get Leather Bits.

One of the cruelest things to dumb beasts is putting frozen iron bits into a horse's mouth. It is not only a painful but a dangerous act. For every time living flesh touches a metal much below the freezing point, the latter extracts the heat from the former and freezes it. Thus a horse's mouth becomes frozen by the cold iron several times a day put

by the cold from seven these freezings into it; each time causing these freezings to go deeper and deeper, to end at last in extensive ulceration. With such a in extensive ulceration. With such a core mouth the poor horse refuses to eat and pines away, which calls the horseand pines away, which calls the horse-doctor in. They call it bots, glanders, horse-sil, &c., and go to cramming down poisonous drugs in big doses; and the next you know of the poor abused creature, he is trundled off to be food for fish or the crows. Many a val-uable horse has been "mysteriously" lost in just that way.
