

AGRICULTURAL & DOMESTIC.

Spread Manure.

Mr. C. K. Carpenter, of Michigan, in the Western Rural, makes the following sensible remarks on the subject of spreading manure and when:

THE YOUNG FOLKS.

The Valiant Tailor.

There was once upon a time an excessively proud Princess, who proposed a puzzle to every one who came courting her, and he who did not solve it was sent away with ridicule and scorn.

THE KIDNEYS.

The Kidneys are two in number, situated at the upper part of the loins, surrounded by fat, and consisting of three parts, viz: the Anterior, the Interior, and the Exterior.

The anterior, interior consists of tissues or veins, which serve as a deposit for the urine and convey it to the exterior. The exterior is a conductor also, terminating in a single tube, and called the Ureter. The ureters are connected with the bladder.

Differences in Milking.

It is a fact that a poor milker will spoil almost any cow, and there are but few people who are aware of the fact that in the mere process of milking a great difference is made in the yield of a dairy cow.

THE GRAVEL.

The Gravel is a collection of water in some parts of the body and bears different names, according to the parts affected, viz: when generally diffused over the body, it is called Anasarca.

AGENTS C.F. BENT. Sole Proprietors, Philadelphia, Pa.

Feeding Poultry.

The habit of giving much food in a short space of time to poultry is a very bad one. If you notice their habits you will perceive that the process of picking up their food under ordinary circumstances is a very slow one.

ASHES IN AN APPLE ORCHARD.

The Maryland Farmer, in a talk about orchards, says: "We consider the ashes of hard wood, unselected, worth thirty cents per bush to mingle with the soil used in setting apple trees for an orchard, and in dressing the surface of the land for the space of three to four feet in a belt around each tree, extending from the outer margin of the whole in which the trees are set."
