## AGRICULTURAL & DOMESTIC.

### Flowers and Vines in the House.

There are many beautiful botonical experiments which can be conducted in se during winter, which are not emed generally in the list of flowers,

and vines in our parlors and windows. How many of the fair readers of the Telegraph have the beautiful vine of the sweet potato running over their helf? This pretty sight can be enjoyed by placing a sweet potato in a tumbler or other glass vessel, filled with water, passing a pin through the tube so as to keep the lower end from one or two juckes from the bottom of the vessel. Keep on the mantle-shelf, in a warm room, and every day give it sun for an hour or two, and in a few days rootlings will begin to appear, aiming for the bottom of the vessel, and in two or three weeks the eye will begin to shoot and rapidly grow and run upon suspended twine or any little

trellis-work prepared for it. The "Morning Glory" can be propogated in parlor windows, where there is as sun, to perfection during winter ;

it flowers with its natural colors, and the delicate little vine can be made to run over the window. A hanging vase is the prettlest for this.

nd an acorn by a cotton thread so as to nearly touch the water in a glass vessel, (a hyacinth glass is perhaps the best,) set upon the window or mantle, and let it remain there for eight or ten weeks, more or less, without being interfered with, except to supply the evaporation of the water, and the acorn burst, and as it throws a root down into the water, a sprout or stem will be sent upward, throwing out beautiful little green leaves; thus giving you an oak tree, in full life and health within your parlor.

 uak tree, in full life and health within pour parlor.
There are many of the mosses which can be very successfully grown in the house through the winter, and with the foregoing afford an interesting and reformed and enjoyment for the feminines of a fault y, and a real pleasure for all who have a taste for the beautiful to withawe a taste for the beautiful to wither the successful to with the with the fore and the beautiful to wither the successful pleasure for all who have a taste for the beautiful to wither the successful to wither the successful pleasure for all who have a taste for the beautiful to wither the successful to wither the successful to wither the successful pleasure for all who have a taste for the beautiful to wither the successful to wither the can be very successfully grown in the less. We trust to see a greater inclination on the part of the ladies to introince into their houses this most agreeable addition to their domestic pleasure. -Germantown Telegraph.

----CORN OR OATS .- "I feed my horse well, but somehow he looks rough-coated and don't seem to be very well."

well, but somehow he looks rough coated and don't seem to be very well." "What kind of provender do you give him ?" "Oats, and plenty of them." "That's what's the matter. Too many oats. Half the amount of oats and the rest in corn would, no doubt, work an improvement in him. We have found out that horses should not be fed en-utrely with oats for provender. They need something else. Give them corn or cornmeal part of the time, or a mixture of oats and corn, and see if they not improve. And, by the way, don't forget to give him, twice a week, meas of potatoes as a medicine.-

Country Gentleman. BONE FELON.-Of all painful things, can there be any so excrutiatingly mainful rea bone felon? We know of none that flesh is heir to, and as this ady is quite frequent and the subet of mu ch earnest consideration, we

give the latest recipe for its cure, which is given by that high authority, the London Lancet: "As soon as the disus is felt, put directly over the spot a ny blister, about the size of your thumb nail, and let it remain for six hours, at out the size of your thumb the expiration of which time, directly er the surface of the blister, may be seen the felon, which can be instantly

<text><text><text><text> The bladder is composed of various coverings r tissues, divided into parts, vin.; the Upper the Lower, the Nervous, and the Mneous. The upper expels the lower retains. Many have a sire to unnate without the ability ; others urinate without the ability to retain. This fremeatly occurs in children. To cure these affections, we must bring into etion the muscles, which are engaged in their various functions. If they are neglected, Gravel or Dropsy may ensue. The reader must also be made aware, that however slight may be the attack, it is sure to affect the bodily health and mental powers, as and an analysis of the second s our flesh and blood are supported from these SOUTODS: Gour, on RHEUMATISM,-Pain occurring in the loins is indicative of the above diseases. They occur in persons disposed to acid stomach and chalky convetions. THE GRAVEL .- The gravel ensures from new ect or improper treatment of the kidneys These organs being weak, the water is not expelled from the bladder, but allowed to remain ; t becomes feverish, and sediment forms. It is from this deposit that the stone is formed, and gravel ensues. DROPSY a collection of water in some part of the body and bears different names, accordbitli the large are discased beyond an nope use care. My advice to persons whose large are affected even slightly is, to hay in a slock of Science's Philmonic Syrap, Schenck's Scieweel Tonie and Schenck's Mandrake Pills and go to Florink. I recommend these particular meshcines because i am thoroughly acquainted with their action. I amow that where they are used in strict accord-ance with my directions they wild do the work that is required. This secomplished, nature will do the rest. The physician who preserious for each spectra to walk or rise to us every day, will be patient to walk or rise to us every day, will be patient to walk or rise to us every day, will be patient to walk or rise to us every day, will be patient to walk or rise to us every day, will ing to the parts affected, viz,; when generally diffused over the body, it is called Anasarca when of the abdomen, Assiles; when of the chest, Hydrothorax.

TREATMENT -- Helmhold's blobb concentrated

ompound Extract Buchu is decidedly one of long. My plan is to give my three medicines, in ac-cordance with the printed directions, except in some cases where a freer use of the Mandrake Pills is necessary. My object is to give tone to the stomach—to git up a good appetite. It is al-ways a good sign when a rationt begins to grow hungy. They appopes of such. With a relist for food and the gratification of that relist comes good blood, and with it more flesh, which is closely followed by a healing of the image. Then the cough loosens and abates, the creeping chills and channy minitesweats no longer prostrate the best remedies for discases of the bladder, kidneys, gravel, dropsical swellings, rheumatism, and gouty affections. Under this head we have arranged Dysuria, or difficulty and pain in passing water, Scanty Secretion, or small and frequent discharges of water; Strangury, or stopping of water; Hematuria, or bloody urine; mmy night-sweats no longer prostrate may, and the patient gets well, provided ds taking cold, Gout and Rheumatism of the kidneys, without any change in quantity, but increase in color,or

he avoids taking cold. Now there are many consumptives who have not the means to go to Florida. The question may be asked, is there no hope for such 2, and tably there is. My advice to such is and ever labely there is. My advice to such is and ever all the such as the such as a such as the such events of the such as a warm room during the grees, which should be kept about sy at the point by means of a thermometer. Let a the room by walking up and down as much is the room by walking up and down as much is the strength will permit, in order to keep up a healthy circulation of the blood. J inve enred thousands by this system, and can do so arguing dark water. It was always highly recommend ed by the late Dr. Physick, in these affections, This medicine increases the power of diges tion, and excites the absorbents into health exercise by which the watery or calcareous depsitions, and all unnatural enlargements, a strength will permit, before, if have entred thousands by this system, and can do so again. Consumption is as easily curved as any other dis-ease if it is taken in time, and the proper kind of treatment is pursued. The fact stands undis-puted on record that Science's Polinical eyrap. Mandrake Fills, and Sesweid Tonic have curved very many of what seemed to be hopeless chase of consumption. Go where you will, you will be almost even in the source our consumptive who has been rescued from the very jaws of death by their use. well as pain and inflammation are reduced, and t is taken by men, women, and children. Diections for use and diet accompany.

PHILADELPHIA, PA., Feb. 25, 1867. H. T. HELMBOLD, Druggist:

who has been rescued from the vey jaws of death by their use. So far as the Mandrake Fills are concerned, everybody should keep a supply of them on hand. They act on the liver better than calomel, and leave none of its hurifu effects behind. In fact they are excellent in all cases where a pur-gitive medicine is required, if yoo have par-faken too freely of frait and diarthose ensues, a dese of the Mandrakes will cure yeu. If you are subject to sick headache, fake a dose of the Man-drakes and they will relieve you in two hours. If you would obviate the effect of a change of whete the Mandrakes in the face a dose of the Man-drakes and they will relieve you in two hours. If you would obviate the effect of a change of whete face is a strain the first of the straine of whete face is a strain the strain of the strain whete face is the first of being make side ty whete face of the strain of the strain of the strain situations against chills and fevers. They them, they are particely harmless. They can do you good only. DEAR SIE-I have been a sufferer, for upward of twenty years, with gravel, bladder, and kidney affections, during which time I have used various medicinal preparations, and been unde the treatment of the most eminent Physicians experiencing but little relief.

Having seen your preparations extensively dvertised, I consulted with my family physician in regard to using your Extract Buchu.

I have attained my professional visits to Bos-fon and New York, but continue to see national at my office, No 15 N. SiXTH Street, Philade-phia, every Saturday, from 9 A. M. toi P. M. Those who wish a thorough examination with the Respirometer will be charged ave dollars The Respirometer will be charged ave dollars of the image, and patients can readily lear whether they are carable or not. But I desired ustimuty understand that the value of no medicines depends entirely non-their bein I did this because I had used all kinds of a l vertised remedies, and had found them wortass, and, some quite injurious; in fact, I despaired of ever getting well, and determined to use no remedies hereafter unless I knew of the ingredients. It was this that prompted me to use

Cough IN HORSES.-A cough is rather a symptom than a disease. It is of-ten caused by the irritability of the air ten caused by the irritability of the air pasages, occasioned by previous dis-case. A chronic cough in a horse is of ten occasioned by indiscretion in the treatment of influenza, distemper, and diagonad resultatory appreadures to the second secon Itrustiment of influenza, distemper, and diseased respiratory apparatus. It is also one of the effects of liver disease, and semetimes of worms. Too much dry fodder, especially chaff, often aggravates a cough. Carrots and other roots and green feed may be advantageously used. Give your horse a warm stall, with bedding a foot deep, with moist cut feed, a little laxative medicine, and not much work.
MINCE PTES,—The following receipt

for mince ples, which are now in sea-son, is confidently recommended be a writer in the Germantown Telegraph,
