THE COLUMBIAN AND DEMOCRAT, BLOOMSBURG, COLUMBIA COUNTY, PA.

The Columbian. BLOOMSBURG, PA.

FRIDAY MORNING, JUNE 16, 1871.

Reformed Voting in Boroughs. THE new plan of voting authorized by the borough supplement of June 2, 1871, and by sundry special acts for towns passed at the last two sessions of the Legislature, is exceedingly simple missioner, M. E. Bucher, Sunbury; in design and convenient for practical use; so that its undoubted merit as an instrument for securing just representation and nure elections is not counter vailed or diminished by practical difficulties in the way of its application. But, yet, some explanation of it will be necessary until its exact character, uses and operation shall come to be known by trial.

The Free Vote as defined and fixed in the several statutes above referred to, and particularly in the Bloomsburg act of 4th March 1870, applies whenever two, three, four or six persons are to be chosen at one time to the same municipal office and for the same term of service, and consists in permitting each voter to bestow his votes upon one or more candidates as he shall think fit, instead of compelling him to distribute them singly among the whole number of persons to be chosen. In brief, he may poll his votes as follows :--

When two persons are to be chosen :

When three persons are to be chosen : 1 vote to each of 3 candidates, 2 votes where, that resorts to it. It is delusive, to 1, and 1 to another; 1} votes to each of 2, or 3 votes to 1.

When four persons are to be chosen : 1 vote to each of 4 candidates, 13 votes to each of 3, 2 votes to each of 2, or 4 tone of party action. Fortunate indeed votes to 1.

When six persons are to be chosen : 1 vote to each of 6 candidates, 11 votes to each of 4, 2 votes to each of 3, 3 votes to each of 2, or 6 votes to 1.

Ticket voting is retained, but tickets are to express upon their face the amount of support given to each candidate voted for in all cases where a single

vote for each candidate is not intended. In other words, whenever the voter, shall not cast his votes, as heretofore, upon the face of his ticket the number f voters he bestows upon the candidate, of upon each candidate, named thereon. As, for instance, in the borough of Chambersburg, (Rep. 579, Dem. neighbors of that county to change 524), each party will nominate three their rules. Let them recur to Convenpersons for Councilmen and tickets will

each party of course using differen names but the same form of ticket. If either shall resort to this plan of voting it is certain that they will elect their three candidates, no matter how the must happen that each will nominate but three persons although six are to be chosen

In the same borough, in the election of three town Auditors, (they are hereafter to be chosen together for 3 year terms), the minority will cumulate their votes upon one candidate, thus : and will certainly elect him; while the majority will vote for two, as follows :

C. D.... E. F...1 votes, And still, again in the same borough

ally they will be divided between parties; for as either party can use the form,-......2 votes, he minority will of course resort to it

1 vote to each of 2 candidates, or 2 votes to 1. the Crawford county plan) of nomina-tions, is worse than a humbug, and will demoralize and injure any party, anyunfair, expensive and of corruptive tendency. It invites to intrigue and

The following resolution was adopted: Resolved. That the late Democratic State Convention deserves eminen credit for having conferred the nomina

There could be no better argument used by the Democracy during the comofficers than this concluding extract.

We have a decided curiosity to know that which his Excellency has left in the twilight of doubt, namely, this "greater evil," of which the useless and excessive waste of half a million is the least. So wild and reckless has been the indiscriminate appropriation of money during the admistration of Geary, with a Radical Legislature at

his command, that a half a million is a small matter, and the least of the good Governor's little evils. The expenditure of half a million, each year, more than is necessary for the administration of government, is an anouncement which should arrest the attention of every tax payer, and lead him to inquire if there was not some remedy for this prodigality, some stimulant for the weakness and imbecility in excentive functions, which are unable to check the excessive outlay. An imbecility and want of spirit, which stumbles in the plain path of duty, and, conjuring up timaginary greater evils, dodges any responsibility by accepting what is face-tiously termed "the least of two evils," We have a decided curiosity to know loans of the company, amounting to \$5,807,000. Burning of a Coolie Shlp -- Five Hundred Lives Lost,

The details of the total destruction by fire of the Peruvian ship Don Juan at sea, by which five hundred coolies perished, have been received via San Francisco. The Don Juan left Macao on May 4th with a cargo of 650 coolies for Peru, and on the 6th was burned to the water's edge, not more than fifty miles from Hong Kong. The coolies who have arrived in Hong Kong all aver that their treatment was humane, and they had nothing whatever to complain of either as to the allowance of ed for the new enterprise will be raised food or the quality or quantity, and the

if it shall be necessary to secure to them their proper representation. But in many cases under the certain operation of the new plan, there will be a common or union ticket voted by all the electors, upon which each party will have its due and proper share of candidates. Either a ticket will be formed by common consultation and consent of the citizens on which each party will have its due proportion of nominees, or after each party shall have made its nominations separately, for purposes of convenience the names of all the candidates will be placed together and voted

together by the people. Thus voting will often be without cumulation, but induced by the fact that cumulation can be resorted to by either side to secure justice to itself.

The borough supplement act is confined to boroughs organized, or hereaf ter to be organized, under general laws and not to those created and operating under special acts of Assembly, and it applies only to the election of Council-

men, who constitute the local legislatures of towns. Nevertheless, it is an Important act and must have an extensive and reformatory effect upon municipal government and administration in the S'ate. For wherever resorted to it will give just representation to the people, purify elections and check or prevent the abusive exercise of local power. Upon principle, the new plan should be authorized in the election of all bor-

ough officers whenever it can be applied and not confined to the choice of councilmen alone, and such is the regulation made in most of the special acts which have been passed at the last two sessions for particular towns, as Sunbury, Berwick, Bloomsburg, Chambersburg, Uniontown, etc. But in general legislation it was perhaps prudent to begin, with a more limited though still effectual measure of reform.

The Victory in New Hampshire.

The State of New Hampshire, which has labored under Radical misrule for some thirteen years, has been released from the sore bondage by the election and inauguration of a Democratic Governor, the selection of the Governor's Council, both branches of the Legislature, and the entire Congressional delegation. The Republicans of the solid old State of New Hampshire are greatly chagrined at this downfall of their fores politically, and they endeavored hard in the Legislature to arrest the impending ruin, but it was sure to come, and now the State rejoices in being once more free from Radical subjugation and Then follow, in the order in which they tyranny. Not only the Democrats of are named, Generals not engaged in the the liberated State feel happy over the event, but all lovers of the Democratic banner, for it is the harbinger of other victories that are to follow, which will make America a free country again by removing from it the despotism which the dominant organization has pinloned it with. In this apportionment, districts with less than fifty votes are allowed one delegate each ; districts with fifty votes and under one hundred and twenty-five, two; districts with one hundred and twenty-five votes and under two hun-

dred, three; and districts with two hundred, or more, four. Above fifty the scale of numbers runs with a ratio of seventy-five, and a maximum limit is

imposed : In accordance with the Columbia county rule, no district is to have more than four delegates. This plan adopts the principle of district representation, but makes it thoroughly just and reasonable, because it s made proportional to the party vote of each district. The main recommendation of the Crawford county plan is that it secures an equal voice to all the voters of the county; but substantially the same result is secured by the plan

proposed, while it is free from all the objections which lie against the Crawford county plan. P. S.-Since writing the above we have received the proceedings of the return judges at Sunbury, on Monday, June 5. They passed resolutions abolishing the popular vote plan of nomina tions and restoring delegate elections. Delegates are to be assigned to districts as follows: For one hundred voters or less, two delegates; for more than one hundred and less than two hundred.

three delegates; for over two hundred, four delegates. This is all very well as far as it goes. It only remains to add one feature to the new plan ; that is, to allow each voter to give his votes to a smaller number of candidates for dele gate than the whole number to be chosen from his district. Then delegations from large districts will be divided between candidates for nomination and fair play, and satisfactory nominations will be the

result.

A TELEGRAPHIC despatch was received Monday and published announcing the discovery of immense deposits of cannel coal in Alaska and on the Aleutian Islands; and now comes the news of the recent discovery of a field of coal within the limits of the State of Indiana, which for extent and value is supposed to be unequalled in the world. It is stated that "so extensive is the coal field of Indiana, that thousands of acres of

land, containing the best quality of block coal and convenient to the railroad, can be purchased at rates very little higher than the ordinary prices of agricultural lands in the same vicinity." We sincerely hope that these enthusiastic statements will be borne out by subsequent experiments and facts, and that the
