THE annual cry about MAD DOGS is again taking possession of the news papers. Whether an authentic case of vdrophobia ever occurred in this conntry is much doubted. However this may be, it is very sure that dogs are no more liable to the diseases which fright-en people into the idea that they have an attack of hydrophobia in cold than in warm weather. In fact, in hot couna dog becomes sick for any reason, very likely to froth at the mouth, for this is his only means of perspirationin other words, that which passes through the pores of the skin of human beings and of most animals, can only poss from the deg through his mouth. This induces frothing, which is too often at once taken as evidence of hyprophobla by nervous people, and alarm mag nifies the trouble until madness is im-

sgined. The cruel and senseless practice of municipal authorities, would drive human beings to madness if practiced upmanages to bear it with equanimity. We suspect that more real good would be accomplished if such authorities were muzzled instead of the dogs.

There is much more danger from cats in this regard, than from dogs-a hundred to one. It would seem to be the part of prudence, therefore, to apply be muzzling practice to them instead of to the less dangerous animal.

WE see by our exchanges, that the latest new scheme for swindling farmers is on the tapis. The article now offered is a wrought iron plow point, fitting into a hollow square, the economy of which is wonderful. Those that have been bitten find that wrought iron points cost more apiece than entire shares of east iron. As these plow point swindlers are understood to be making a hurried sweep through the country, papers desirous of saving their patron's pockets will direct attention to this swindling scheme. It cost the farmers of the West about two hundred thous and dollars last year.

A Chapter of Facts.

pace is valuable in a newspaper, and it refere proposed in this advertisement to come a variety of facts, important to the public of a small compass. Those facts refer to Hos-ter's Stomach litters—what that celebrated adding is, and what it will do. In the first ace, then, the article is a stimulant, tonic and fermive, consisting of a combination of aranisotately pure spirituous agent with the most valuable medicinal vegetable substances that Botanie research has placed at the disposal of the chemist and the physician. These ingredi-ents are compounded with great care, and in such proportions as to produce a preparation which invigorates without exciting the general system, it tones, regulates and controls the stem, it tones, regulates and controls the omach, the bowels, the liver, and the mine

What this great restorative will do must be sthered from what it has done. The case of respepsia, or any other form of indigestion, in high it has been persistently administered, ithout effecting a radical cure, is yet to be card from, and the same may be said of billions isorders, intermittent fever, hervons affections, meral debility, constitution, sick headache, county disabilities to which the feeble are ect. It purifies all the fluids of the body, in-
