The second floor will have a parlor and 4 bed our "Town Fathers" is invited to this Scott. rooms and the third floor five or six

The block and conles and roes ; 3, fowls of warren will be a very handsome one.

A communication in another column, concerning water supply for Bloomsburg, will hint to the reader, the wisdom, justice and propriety of the tax provisions contained in the town charter. An outlay for this proposed object is important only to the inhabitants of the settled parts of the town, and it would not be reasonable or just that farmers or others, outside the bounds of compact settlement, should be taxed severely for an improvement in which they can have but little interest. But here comes into play the provision that farm-land shall be taxed half, and suburban property but two-thirds rates, in the imposition of town taxes. It is evident that a scale of taxation according to the location of property is the only arrangement which will permit the extension of town or borough limits beyond a densely settled district without inconvenience or injustice.
