A MELANCHOLY BREAK-Down, There are gively break-downs that make an audience laugh, and there are sad and sorrow in break-downs that make the Eind-hearted grieve. To the latter chass belongs the enervation of body and mind which is usually called "general debility," or "nervous weakness," and which, when neglected, too olten terminates in atrophy and death. A wholesome medicated stimulant is the one thing needed in cases of this description, and science and experience unite in pointing to PLANTATION BITTERS as the true specific. The fact that it combines the properties of an invigorant with those of a regulator and alterative, in exactly the proportions necessary to produce a radical change in the tone of the system, and the action of the digestive and secretive organs, is an unanswerable argument in its favor as a general restorative.
