DRAINING.—The cost of draining depends a good deal on the nature of the land and the depth of the drains. In sandy or mucky land a ditch 2) feet deep for tiles should be dug, with labor at \$1.50 per day, for 15 cents a rod; 3 feet deep, 20 cents a rod. On heavier land, nearly free from stones, a ditch 2) to 3 feet deep will cost 25 cents a rod. A good ditcher, at these prices, can make two dollars a day. An unskillful man that cuts the ditches unnecessarily wide, and is fond of using the pick, might work just as hard and not earn a dollar a day.

litters are grown in Germany, their vital principles extracted in that country by a scientific
Chomist, and forwarded to the manufactory in
the city, where they are compounded and bot
lied. Containing no spirituous ingredients, this
litters is free from the objections argued against
all others: no desire for stimulatus can be induced from their use, they cannot make drunkards, and cannot under any circumstances, have
any but a beneficial effect. HOOFLAND'S GERMAN TONIC,

Was compounded for those not inclined to extreme bitters, and is intended for use in cases when some alcoholic stimulant is required in connection with the Tonic properties of the Bitters. Each bottle of the Tonic properties of the Bitters. Each bottle of the Tonic contains one bottle of the Ritters, combined with pure SANTA CRUZ RUM, and Savored in such a manner that the extreme bitterness of the bitters is overcome, forming a preparation highly agreeable and pleasant to the palate, and containing the medicinal virtues of the Bitters. The price of the Tonic is \$1.59 per Bottle which many persons think too high. They must take into consideration that the attinuiant used is guaranteed to be of a pure quality. A poor article could be furnished at a cheaper price, but is it not better to pay a little more and have a good article? A medicinal preparation should contain none but the best ingredients; and they who expect to obtain a cheap compound, and be benefitted by it will most certainly be cheated.
