CRASDLER, Jr., Actuary. rows, the first three or four workings smoother than it was the year before, are very quickly done by merely draw-WASH POPLINS, till, after a great while, all the rough oci /071---:r ing down a part of the bed and pulling part was gone, and what was left was the fresh earth up around the roots. The operation is much more quick than when the plants are set on level ground, or on top of the beds, as is the practice of many persons. A chief advantage of this method, also, is that when the edrth is finally worked down to a level, as it will be, after a few hoeings, the plant is then found to be deeply set in the ground, which is very necessary, if the cabbages are expected to make firm heads. Are Moles a Pest! Hord for the set of the processor Are Moles a Pest! Hord for the set of the processor the first was gone, and what was left was this beautiful round pebble." Tilly handled over the two she was holding, while the Stone Professor talked, and tried to make believe they looked as he said they used to, but it was hard work to think that anything so soft as water could have worn off the ground, which is very necessary, if the cabbages are expected to make firm heads. Are Moles a Pest!
