penditures \$2,263,088 23, or 929 per cent; adding to the ordinary revenues the annual appropriation of \$700,000 for free matter, and the amounts paid to the subsidized mail steamship lines from special appropriations, the deficiency paid out of the General Treasury was \$3 317,765 91, an excess of \$339,707.28 over the deficency for the year 1871. Other interesting statistical information relating to our rapidly extending postal service is furnished in this report. The service is furnished in this report. The total length of railroad mail routes on the 30th of June, 1872, was 57,911 miles, 8 077 additional miles of such service having been put into operation during the year, eight new lines of railway post-offices have been established, with an aggregate length of 2 909 miles. The number of letters exchanged in the mails with foreign countries was 21,362,500, an increase of 4,065,502, or 20 per cent over the number in 1871, and the postage thereon amounted to \$1,871,-267.25; the total weight of the mails exchanged with European countries exceeded 820 tons. The cost of the United States Transatisatic mail steamship service was \$220,301.70; the total cost of the United States ocean steamthip service, including the amounts paid to the subsidized line of mail steamers, was \$1,027,020 97. The following are the only steamship lines now receiving subsidies for mail service receiving subsidies for mail service under special act of Congress. The Pacific Mail Steamship Company receive \$500,000 per annum for carrying a mouthly mail between San Francisco, Japan and China, which will be increased to \$1,000,000 per annum for a semi monthly mail on and after October 1, 1873. The United States and Brazil Mail Steamship Company receive \$150,000 per annum for conveying a monthly on and Mexican Steamship Company receive \$100,000 per annum for conveying a monthly mail between New York and Rio de Jaueiro, Brazil, and the California, Oregon and Mexican Steamship Company receive \$75,000 per annum for carrying a monthly mail between San Francisco and Honolulu, Hawaiian Islands, making the total arrests of sall attentions. the material graph to total amount of mail statements in substitution of the previous per annum. Our postal communications with all parts of the civilized world have been placed upon a most advantage and the provided of the provided provided in the provided provided with the lessing commercial countries of Europe and America, and the gratifying statement is made that with the conclusion of a satisfactory, while have been definitely agreed to by the head of the French Fostal Department subject to the approval of the Minister of Finance, little remains to the head of the French Fostal Department subject to the approval of the Minister of Finance, little remains to the common with the ready for some the consideration is respectfully invited to this recommendations made by the Fost-wice from monthly to sease of sex quantity greater by l'ops 270 acres to monthly to sease of sex quantity greater by l'ops 270 acres to monthly to sease of sex quantity greater by l'ops 270 acres to monthly to sease of sex quantity greater by l'ops 270 acres to a subject to the proving spent of making the total amount of mail steam-ship subsidies at present \$725,000 per annum. Our postal communications with all parts of the civilized world

Company between San Francisco, China and Japan, with provision made for semi-monthly service after October 1, 1873; the United States and Brazil Line, monthly, and the California, New Yorkship, and the California, New Zealand, and Australian Line—monthly plying between the United States and ioreign ports, and owned and operated under our flag. I earnestly recommend that such liberal contracts for earrying the mails be authorized with these lines as will insure their continuance. If the expediency of extending the aid of Government to lines of the expediency

of Government to lines of steamers which hitherto have not received it should be deemed worthy of the considtion of Congress, political and commer-cial objects make it advisable to bestow cial objects make it advisable to bestow such aid on a line under our fisg between Panams and the Western South America ports. By this means much trade now diverted to other countries might be brought to us, to the mutual advantage of this country and those lying-in that quarter of the continent of America. The report of the Secretary of the Treasury will show an alarming falling off in the carrying trade for the last ten or twelve years, or even for the past year. I do not believe that public treasure can be better exthat public treasure can be better ex-pended in the interest of the whole people than in trying to recover this trade. An expenditure of \$5,000,000 per annum for the next five years, if it would restore to us our proportion of the carrying trade of the world, would be profitably expended. The price of labor in Europe has so much enhanced within the last few years that the cost of building and operating ocean steam-ers in the United States is not much

greater than in Europe, that I believe the time has arrived for Congress to take this subject into serious considera-

DEPARTMENT OF JUSTICE.

Detailed statements of the disbursements through the Departments of Justice will be furnished by report of the Attorney-General, and though these have been somewhat increased by the recent acts of Congress to enforce the rights of citizens of the United States to vote in the several States of the United States to recent acts of the provisions of the fourteenth amendment to the Constitution of the United States and the amendments thereto, I cannot set of the office properly without more room in which to arrange files and drawings that must be consulted hourly in the transaction of business. The whole of the Patent Office building will soon be needed, if it is not already, for the accommodation of the business of the Patent Office building will soon be needed, if it is not already, for the accommodation of the business of the Patent Office building will soon be needed, if it is not already, for the accommodation of the business. The whole of the Patent Office building will soon be needed, if it is not already, for the accommodation of the business of the Patent Office.

PENSIONS.

The amount paid for pensions in the last fiscal year was \$30,169,340, an amount larger by \$3,708,434 than was paid during the preceding year. Of this amount \$2,313,409 were paid under the act of Congress of February 17, 1871, to

form to smalle it hereafter if decrees the subject without teley.

The report of the Secretary of the Navy, herewith secompanying, explained in the strength faily the condition of that branch of the public service, its events and the past year, and appropriations for the same. It also gives a complete blattory of the same. It also gives a complete blattory of the same year, and appropriations for the same. It also gives a complete blattory of the same that unless steps are taken to preserve our navy that is a very two corresponding to the same that the subject of the same that the subject of the same of the full preserves where mending and the subject are by unlawful means to include an abandaty to the same of the full preserves the same that the subject of the same of the full preserves the same than a cargality property of the full preserves the same state of the same of the same of the same of the same of the full preserves of the full preserves the same state of the same of the same

work which in some of them for some years has been in arrears has been brought down to a recent date, and in all the current business has been promotive described. promptly despatched.

INDIANS. The policy which was adopted at the beginning of this Administration with regard to the management of the Indi-ans has been as successful as its most ardent friends anticipated within so short a time. It has reduced the expense of their management, decreased their forages upon the white settle-ments, tended to give the largest oppor-tunity to the extension of the great railways through the public domain, and the pushing of settlements into more remote districts of country, and at the same time improved the condiat the same time improved the condi-tion of the Indians. The policy will be maintained without any change, exbe maintained without any change, excepting such as further experience may show to be necessary to render it more efficient. The subject of converting the so called Indian Territory, south of Kansas, into a home for the Indians, and erecting therein a Territorial form of government, is one of great importance, as a complement of the existing Indian policy. The question of removal to the Territory has within the past week been presented to many of the tribes resident upon other and less desirable portions of the public domain and has generally been received by them with favor as a preliminary state to the organization of such a Territory It will be necessary to confine the In-It will be necessary to confine the In-dians now resident thereon to farms of proper size, which should be secured to them in fee, the residue to be used for the settlement of other friendly Indi-ans. Efforts will be made in the im-mediate future to induce the removal

During the year ending September 30, 1872, there were issued from the Patent Office 13,626 patents, 333 extensions, and 556 certificates and registers of trade marks. During the same period 19,587 applications for patents, including reissues and designs, have been received, and 3,400 caveats filed. The fees received during the same period amounted to \$70,095,486, and the total expenditures to \$62,355,390, making the receipts over the expenditures \$7,740,096. Since 1836 200,000 applications for patents have been filed, and about 133,000 patents issued. The office is being conducted under the same laws and general organization as were adopted at amounted to \$70,095,486, and the total expenditures to \$62,355,390, making the receipts over the expenditures \$7,740,096. Since 1836 200,000 applications for patents have been filed, and about 133,000 patents issued. The office is being conducted under the same laws and general organization as were adopted at the original inauguration, when only from 100 to 500 applications were made per annum. The Commissioner shows that the office has outgrown the original plan, and that a new organization has become necessary. This subject was presented to Congress in a special communication in February last with my approval and the approval of the Secretary of the Interior, and the suggestions contained in said communication were embraced in the bill that was reported to the House by the Committee on Patents at the last session. The subject of the reorganization of the Patent Office, as contemplated by the bill referred to, is one of such importance to the industrial interests of the country that I commend it to the attention of Congress. The Commissioner also treats. I commend it to the attention of Con-gress. The Commissioner also treats the subject of the separation of

THE PATENT OFFICE

from the Department of the Interior. This subject is also embraced in the bill heretofore referred to. The Commissioner complains of the want of room for the model gallery, and for the working force and the necessary files of the office. It is impossible to transact the business of the office properly with-

the recent acts of Congress to enforce the rights of citizens of the United States to vote in the several States of the Union, and to enforce the provisions of the fourteenth amendment to the Constitution of the United States and the amendments thereto, I cannot question the necessity and salutary and lawless men, I regret to say, have associated themselves together in some localities to deprive other citizens of the rights guaranteed to them by the Constitution of the United States, and to the Congress of the second themselves together in some localities to deprive other citizens of the rights guaranteed to them by the Constitution of the United States, and to the United States of Philadelphia in the year 1876. This celebration will be looked forward to by American citizens with great interest, as marking a century of greater progress and prosperity than is recorded in the history of any other nation, and proving a further good purpose in bringing together on our soil peoples of all the commercial nations of the earth, in a manner calculated to secure international good feeling.

The amount paid for pensions in the last fiscal year was \$30,169,340, and amount \$2,313,409 were paid under the act of Congress and prosperity than is recorded in the history of any other nation, and proving a further good purpose in bringing together on our soil peoples of all the commercial nations of the earth, in a manner calculated to secure international good feeling.

The amount paid for pensions in the last fiscal year was \$30,169,340, and an elementment to the states. This celebration will be looked forward to by American citizens with great interest, as marking a century of greater progress and prosperity than is recorded in the history of any other nation, and proving a further good purpose in bringing together on our soil people of all the commercial nations of the earth, in a manner calculated to secure international good feeling.

The civil sees, the second proving a further good purpose in bringing together on our soil

The ninth census is about completed. Its early completion is a subject of congratulation, inasmuch as the use to be made of the statistics therein contained made of the statistics therein contained depends very greatly on the promptitude of publication. The Secretary of the interior recommends that a census be taken in 1875, which recommendation should receive the early attention of Congress. The interval at present established between the Federal census is so long that the information obtained at the decennial periods as to the maat the decennial periods as to the ma-terial wants and resources of the nation is of little practicable value after the expiration of the first half of that peexpiration of the first half of that period. It would probably obviate the constitutional provision regarding the decennial census if a census taken in 1875 should be divested of all political character, and no reapportionment of Congressional representation be made under it. Such a census, coming as it would in the last year of the first century of our national existence, would furnish a noble monument of the progress of the United States during that century.

EDUCATION.

The rapidly increasing interest in education is a most encouraging feature in the current history of the country, and it is no doubt true that this is due in a great measure to the efforts of the Bureau of Education. That office is continually receiving evidences which abundantly prove its efficiency from the various institutions of learning and educators of all kinds throughout the country. The report of the Commissioner contains a vast amount of educational details of great interest. The bill now pending before Congress providing for the appropriation of the net proceeds of the sales of public lands for educational purposes to aid the States in the general education of their rising generations, is a measure of such great EDUCATION.

AGRICULTURE.

The report of the Commissioner of Agriculture gives a very full and interesting account of the several divisions of that Department—the Horticultural, Agricultural, Statistical, Entomological and Chemical—and the benefits conferred by seek upon the service structural.

act of Congress approved March 3, 1871, providing for the celebration of the one-hundredth anniversary of American Independence, a commission has been organized, consisting of two members from each of the States and Territories. from each of the States and Territories. This commission has held two sessions, and has made satisfactory progress in the organization and in the initiatory steps necessary for carrying out the provisions of the act, and for executing also the provisions of the act of June 1, 1871, creating a centennial board of finance. A preliminary report of progress has been received from the President of the Commission, and is herewith transmitted. It will be the duty of the Commission at your coming session to transmitted. It will be the duty of the Commission at your coming session to transmit a full report of the progress made, and to lay before you the details relating to the exhibition of American and foreign arts, products, and manufactures which, by the term of the act, is to be held under the auspices of the Government of the United States, in the City of Philadelphia in the year 1876. This celebration will be looked forward to by American citizens with great interest, as marking a century of greater progress and prosperity than is recorded in the history of any other nation, and proving a further good purpose in bringing together on our soil peoples of all the commercial nations of the earth, in a manner calculated to secure international good feeling.

ROAT, LUNGS, LIVER & BLOO In the wonderful medicine to which the sillicited are showe pointed for relief, the discoverer believes he has combined in Aurmony more of Nature's most sweeright curative properties, which God has instilled into the vegetable kingdom for healing the sick, than were ever before combined in one maticine. The wridence of this fact is found in the great variety of most obstinute discases which it has been found to conquer. In the energ of Heometritis, Severe Complex, and the early stages of Consumption, it has attributed the models faculty, and eminent physicials pranounce it the greatest medical discovery of the act. While it cures the severest Complex, it are included as a Wallett cures the severest Complex, it are included as a secondary of the act. By its great and thereup the foundation of the properties, it cares all Humors, from the ward Sarpfula to a common Blotch, Plunpit, or Euraption. Mecurial discuse.
