> Some fellow who has a hundred year alman says it contains a prophecy that the latter part of this May will be a period of severe cold, freezing grape vines, &c., and he adds that all the past prophecies of this almanae, commencing with the year 1800, have been fulfilled. If these prophets of evil do not cease their braying it will soon be time to give them some examples of choking and hanging. There has been cold enough for the past six months, without intruding upon spring and summer.

> The COLUMBIAN has a general circulation in every locality in this county, in each one, we believe, exceeding that of any other paper. It is read by or its contents talked over and made known to, almost every body in the county. No other paper except the Bloomsburg Republican, at all approaches half its circulation, and that falls far short of it. Advertisers must therefore see the great advantage to them of inserting their advertisements in the Convinues. It is not doubted that an advertisement in it is communicated to more people than one inserted in all the other papers of the county. As the price in all is the same, it will be seen that the cost of advertising in the Conventax is only fraction of what it costs in the others, and the advertisement in it affects the purpose of the advertiser much better. We would of course be justified in charging much higher rates than the others but we charge only the same. For the exact truth of what we say as to circulation we can refer to the candid postmasters generally, though for the most part they are politically opposed to us.
