Many special acts have passed limiting and ciency and incompetency of the whole batch lefining the powers and ducies of Coroners but the only general one is that of 16th May of officials connected therewith, from Post-1857, P. L. 536, fixing the number of jurors come so accustomed to incompetency in at six in all cases.

The legislative mind seems to have set come to put up with any short-coming in tled, by several special acts, upon this res triction of powers-That no inquest shall be held "unless the said deceased person shall have died of violent death"-"or whose death shall have been sudden, that is of sick ness of less than 24 hours, with no regular practising physician; or suspicious circumstances attending the same, which circum stances shall be sworn by a citizen."

The duties of a Coroner require judgmen and discretion, and he should not subject persons and counties to cost and trouble unnecessarily. Except in special cases therefore, an inquisition is not required where i appens by an accident, a fall, or other cas

ualty, or even by drowning, in view of citizens. And although we in Columbia cour

ty seem to be under the statute of Edward and the common law, yet we may look to acts of our own General Assembly for other counties, as the criterion for our own action They contemplate "deaths of violence," which I take to be cases where the wound or hurt causing death is inflicted by one upon another; and not where it happens by the careessness or the foolhardiness or the misfortune of the victim himself. So suspicious circumstances in a death upon sickness, long or short in duration, should be investigated by the Coronor. It is therefore impossible that any true, honest, faithful patriot who loves his country and believes in constitutional representative government, who hopes for peace, prosperi-

The gay and festive editor of the Easton entinel has been visiting Bedford Springs,

ut goes home as mad as a March hare be ause of "the niggardly policy" of their ownrs, about which he scolds like a drab. There are but two luxuries sure to be encountered at Bedford: extraordinary naturally medicated waters and the best mutton in the world; and a third may be, pleasant ompany. The waters are truly extraordiary. Without moving from a given spot, the visitor may see at a glance, highest up the little mountain rivulet, the iron springpure fresh and cool water strongly impregnated with iron, but no tinge of any thing dse. Next the "medicinal" spring, the wa ters of which are very palatable, cool, and mpregnated with magnesia, lime, &c., in the dilemma found. tomeopathic doses, but which are certain to

perate strongly upon the liver, kidneys, and owels, and are liable to irritate the latter and diseased lungs injuriously. Next below is pure water, from slate rock, with no mineral whatever in it, and near by a strong ime stone spring. Below all these is a

sulphur spring, the water of which is pure from every thing except a strong impregnation of sulphur. If villainous whisky, swashy summer drinks, milk warm slumpy

victuals, &c., are wanted they may be ob tained at the hotel within a few paces of the springs. But at Bedford town, 11 miles disant, the best mountain mutton in the world may be obtained at every meal, and when we are where it is we care little whether there is any thing else save strong coffee on the table or not. It is as superior to the ordinary mutton of the land as trout are to uckers. Discarding mere luxuries, Bedford knowledge.
