There is point and substance in our reporof court proceedings, that make it worth the time of any one to read them.

Crows have been unusually prevalent about Berwich. The Independent ascribes it to the condition of some of the horses of that locality

David R. Randall, Esq., a prominent lawyer and politician, and formerty a Democratic can didute for Congress in this district, died at Willos-Barre on the 31st ult.

The Berwick band is praised by the local paper for extraordinary efficiency, and the excollence of its music is ascribed to the absence of drums and cymbals.

Every Democrat in the county ought to read the COLUMBIAN from now till after election, if he never read it before. We aim to give our readers all the important or interesting newsboth general and political.

There is general complaint all over the country of unusual numbers of musquitoes, and many places that have never known them before are annoyed by them now. The unusu ally long continued prevalence of southern winds is no doubt the cause. Flics are also unusually plentiful. A few sharp frosts will he welcome visitors.

The Kingston Seminary and Commercial College is assuming an important place among the educational institutions of the States-Though linked together is a business relation they are separate schools, and the course in each is distinct and complete without reference to the other. The management and instruction of both are represented to be most satisfactory.

The barn of Oliver Evans, of Locust township, was distroyed by fire on the 3d inst., including all his hay and grain. Probable loss \$1,000-Hight insurance. Mr. Evans was not at home at the time, and the origin of the fire is unknown. There were no persons except his wife and children about the premises at the time and neither he nor they are smokers.

Prof. S. N. Walker, a practical and compatest stemographer, has been appointed official reporter by the court. This plan very much expedites business and in the cod is a measure of economy. It has been in practice in many of the courts of the State for some years and we believe is every where approved.

Prof. W. is also reporting a synopsis of the court proceedings for the Cohumbran, Although our reports for the last two years have been more reliable and satisfactory than any other that have been made in this county, we expect material improvement, space however very much limiting the reporter.

APPRAY AT ROTOSH We regret to learn that a serious and possibly find alliay occurred at Rohrsburg on Tuesday morning last, between Samuel Bogart and Lisfather-in-law, Abraham Kline. The parties have been on bed terms and in almost in constant state of quarrel for some years, the unfortunate relation extending even into Regart' family. It is represented that on Tunday morning Killas went to Bogart's store and as h wavabout entering made some threats of per road violence. Boguit was standing in the door and as Kline everyed to enter the former grabled a pitch-fork from behind the door and stabled him in the forehead with it, pushing him back. How serious the injury to the dual may be we are not reliably informed at this dying condition. Begart was promptly placed under arrest. The story set all at by somebody who is quite indifferent to facts, that one of the de-Columbia county. During the present week of court, F. P. Billayer and Wia. Bryson, after a proper and to them highly creditable examination by a committee of attorneys, were admitted to practice

law in the several courts of this county. They are young usen of promising abilities, who with due care and continued hard study will n doubt become efficient lawyers and perhap brilliant ormaments to their konorable profesion. We are not informed where either in tends to commence business.

People about Marietta, if the local papers tell the truth, have only to go out into the river with boats when black bass jump into their crafts with enthusiasas. One man claims that e gobbled twenty-one in that way, which

We eccheard an old fisherman telling about suck · being so plenty in the West Branch at en me that they crowded each other out of the rater until their tails because sun burnt, but Bill Barker's story is rather thrown in the duide by the alleged performance of the black was about Marietta. Giving full faith, how-

of the building. Opinions differ as to whether it originated in a room at that point or in the Manuard roof. In any case the latter was the cause of the entire destruction of the building Had there been ordinary water facilities the first could have been easily extinguished when firdiscovered, but in the absence of any, destruction was inevitable. as the pupils did all in their power to save and protect property. Temporary quarters for the pupils were also promptly furnished by effizens The school can be carried on (and will be) in he remaining building, but the pupils will ave to be boarded in private families until ew building is crected, and the faculty will ilso be competied to seek other lodgings an

ording quarters. The loss is a very serious one to the town, to he stockholders, and to the educational interest of this Normal School district. The building had been erected mainly by the generosity and unblic spirit of a few of the citizens of Bloomorg, but some aid was afterwards obtained rora the State, and the school was an honor to the place as well as an item of large in terest. For some years the financial busines if the school had been badly managed and failed to yield profits, but since it has been under the control of Dr. Griswold as principa it has exhibited great prosperity and given high promise of becoming a vory successful educe ed mini ional institution. Although just opened for the automa term, the school was already more than full, and the new building that is to be erceted will no doubt be of enlarged proportion and without a de'ils linder bar on the top of it. For prospects of rebuilding, &c., see proceedlings of meeting printed in another column. NORMAL SCHOOL MEETING.
