REPORT OF THE GRAND JURY.

The Grand Inquest of the Commonwealth o Pennsylvania, inquiring for the body of the County of Columbia, respectfully report that we have pursuant to our required duty, calmly and deliberately investigated all the Bills of Indictment presented for our consideration at this time, and have passed upon them according to their merits; that we have examined the public buildings, and find the Jail clean as could be expected under the circumstances and also find the jail-yard walls in a poor condition, not su flicient to hold prisoners if they have any desire to get out.

We recommend that the County Commission ers as soon as practicable, to build a new jail and jail-yard, believing money spent on the old buildings lost, and also recommend that the wall on East side of Court House be repaired. All of which is respectfully submitted.

> WHERE NICKEL COMES FROM .- It may not e generally known that the nickel deposit near he Gap, Lancaster County, is considered he largest yet discovered in the world, and the only deposit of the ore worked in America. The mine is on the high dividing-line between Chester and Pequa Valleys. Besides nickel, copper iron and limestone are found in the same locali ty. Nickel was discovered here about the year 1856, though copper, which is taken from the ame mine, was known in this locality seventy cars ago. The ore has a gray color, is very seavy, and so hard that it is mined entirely by blasting. After the ore has been broken into mall fragments it is put into kilns holding eighty to ninety tons each, and subject to heat produced at first by the burning of a small quantity of wood and continued by the conversion of the expelled gas. It is then put into a melting furnace and undergoes a treatment similar to that of iron ore. The product resulting from this treatment is reduced to powder by passing it between iron rollers, and then shipped to Camden, N. J., where a complete separation is made of the nickle and copper The price of pure nickle averages over \$2 pound. From 400 to 500 tons of ore are taken from the mine per month, and the mining and working of this requires the labor of 175 hands a few Cornish and the rest American miner

ACCIDENT AT SUNBURY.

SUNBURY, Sept. 10-At ten o'clock this morning the Sunday express struck a man name Walters-an employe of the railroad company -as he was passing through the yard on his way to church in company with his wife. The train was coming in on a different track from that generally used, and it is supposed that that confused him. Seeing the imminent danger his wife succeeded in stepping from the track just as he was struck by the locomotive and knocked off with great force. He was thrown some distance, and on being picked up was found to be cut about the head and badly bruised about the body. It is feared that he is seriously injured.

Never before was there known to be such ir regularity about the transmission and delivery of the mails. The matter is easily explained, All the post-office officials from the head of the Department down to the letter carrier are engaged in a political crusade, and there is a consequent neglect of the public interests.

Letter from Rev. Sylvanus Cobb, of Boston, Editor of the Christian Freeman,

Bosron, December 24, 1859. Dear Sir : It may be some satisfaction to you be informed of the result of the trial of the Peruvian Syrup in my family. My daughter was brought low by a typhoid fever last Spring, and after the fever left her she continued very weak, and the simplest food distressed her. For nonths she remained in the same debilitated nsonths she remained in the same debilitated condition; but from the first of September last, when she commenced taking the Syrup, the digestive functions improved, and she steadily gained strength and vivacity, and now, having taken two bottles, she is restored to a good state of health; indeed she appears more really healthy than she has for several years past. I am of opinion that the "Protoxide of Iron," contained in the Peruvian Syrup was adapted to her case, and effected what no other known medicine could have effected,

ROOFS

Correspondence invited. Roofs laid by contract.

Why not make your Roofs last a lifetime, and save the expense of a new roof every 10 or 15 years. It can be done: if you use Slate Paint, it will not only resist the effects of water and wind, but shield you from Fire. OLD ROOFS. Protect your Buildings by using State Paint, which neither cracks in winter nor runs in Summer. Old shingle roofs can be painted looking much better, and lasting longer than new shingles without the paint, for one-fourth the cost of re-shingling. On decayed shingles it like up the holes and pores, and gives a new substantial roof, that lasts for years.—Curied or warped shingles it brings to their places and keeps them there. This paint requires no heating, it applied with a brans and very ornamental, it is chocolate color, when first applied but changes to a uniform state color, and is to all intents and purposes state.

ON TIN OR IRON ROOFS. the red color is the best paint in the world for dura-bility. It has a heavy body, easily applied, expands by heat, contracts by cold, dries slow and never cracks nor scales. One coat equals 4 or any other. NEW ROOFS.

Mills, foundries, factories and dwellings a specialty, Materials complete for a new steep or flat Roof or Rubber Roofing cost but about half the price of resimingting. For Private houses, barns and buildings of all descriptions it is far superior to any other roofing in the world for convenience in laying, and combines the ornamental appearance, durability, and fre-proof qualities of the at one-third the cost. No Tax or Gravel Used.

"How to save re-shingling—stop leaks effectualty and cheaply in roofs of all kinds" a 100 page book free. Write to-day, and ask for it.
