Killing Weeds.

So long us eight million tons of useless weeds are raised annually by the farmers of the United States, we cannot urge too fre quently the means for their destruction. It is not merely because the same amount of vegetable growth in useful crops would produce sixty million dollars, but for the constant hindrances which they offer to neat husbandry, their injury to young crops, and their seeds spoiling the sale of otherwise marketable products, that they should not be permitted to present such formidable drawbacks to good farming.

It is now well understood that the true way to clear out annual weeds from the soil, is by stirring it over and over through the summer, just often enough to break the sprouts and kill the young plants as they are coming to the surface ; and that perennial

weeds, and more particularly those that spread by the roots, are most easily and effectually destroyed by smothering and keeping them plowed under, with rare excep- to enter its doors again. Discovering aftertions, as in the case of quick grass. There four distinct methods in common employ; that is, by summer fallows, by the cultivation of hoed crops, by choking out with dense crops, and by hand labor. A rotation which shall combine these, will clear any farm of all weeds, under proper management.

were too much afraid of her step-mother The implements to be used, are the common plow, modified with the addition of a Gertrude, to interfere, or even to remonstrate skim plow, or a small forward mold board Olsen and Kalf haunted the outer walls of for turning under weeds to some depth ; a the house like ghosts, but saw nothing of the two-horse cultivator, Shares' harrow, or Ran- beautiful prisoner, and though they spoke dall's harrow for working at less depth ; a to her father, who sat sunning himself in the common harrow for still more superficial doorway-he was very old and had grown wok; and the Thomas smoothing harrow childish since his marriage with the handfor sweeping wildly over the surface as the some witch Gertrude, he only nodded and weeds are just peeping out, and for working shook his head and muttered to himself: through the rows of hoed crops and broad-"Ah! she is safe at least from foolish casted or drilled grain fields. young men. Ask me no questions and you

There are two modes for extirpating an- shall hear no lies."

So the two young lovers went away in de nual weeds, which have been extensively adopted by farmers. One is by the planting spair. Now Sunday came. The Sabbath of hoed crops, and the other by summer falthe day all God-fearing people should go to lows. The latter is the ensiest and most ef- church ; and Olsen did as he ought, and fectual, as it may be worked rapidly at all kneeling, prayed that God would at least retimes through the season. The former is ward his constant love by giving him Chrisrecommended on account of the value of the tine for his own ; and it seemed to him, as he prayed, that he heard something whisper crop grown on the ground. The question as to which is best may be settled experi- in his ear : "Do not fear ; despite all the mentally, whether the crop will repay the witches in the world, Christine shall be additional labor required for hill or drill thine. Only deserve her and God's blessng, and have no fear." culture.

better.

But Kalf, instead of going to church, be A general truth, which will apply to all took himself to the sea, where, sitting in his processes for killing weeds, is that they may boat, he broke the Sabbath by fishing from be destroyed when just starting from the sunrise to sunset; even while the church ground with one-tenth the labor required a week or two later, and one-twentieth of the bells were ringing and all the good people work when fully grown. The farmer must going on their way, with their prayer books in therefore make provision to command ready labor at the critical time when it will accom- very worst ill-luck attended this ungodly Kalf. Kalf of supper time, he, in a rage, cried out to the worm, still striving to get the bait Nothing Equal to it. into its hideous mouth, "Come, then, since Ms. H. R. STEVENS; Dear SIT-1 have been troubled with Scrofula, Ca er and Liver Complaint for three years, Nothing thou will be caught," and offering the worm the bait, drew it into his boat and tossed into Dear Sir-I mive been troubled with Scrofnia, Can-ker and Liver Complaint for three years. Nothing ever did me any good until I commenced using your VEGETINE. I am now getting along first rate, and still using the VEGETINE. I consider there is noth-ing equal to it for such complaints. Can heartfly re-commend it to everybody. Yours truly, Mrs. LiZZIE M. PACKARD, No. 16 Larange St., South Salem, Mass.

Vegetine is sold by all druggists. worn smooth by the feet of the birds, but degree of disgust and fear, cast it from him June 15, 77-1m examine the under part where there is some into the little stream that rippled through roughness, and look sharp and close, or perthe village, and ran home as fast as his leg haps you will overlook the mites. Do not could carry him.

The worm he had cast into the stream expect to find anything as large as a small sank out of sight for a while, but returned ant or see anything in motion. You will, to the surface next day larger than before, perhaps, if you are experienced in the busiand more hideous to look upon ; and day by ness, at length discover clustering about a small crack in the wood or around a knot day, hour by hour, it grew larger and more frightful until it became a great fiery beast hole, something that might or might not be with a voice like a woman and a terrible apcalled a dusting of flour, or rather whitish wood ashes, which upon closer examination

resembles fine corn chaff. Be assured when you have discovered this that you have spotted your game. If you examine still far-ther in the crevice which you have discovered this signal, you will find hundreds and

thousands, yes, I might say millions, of these tormenting insects clustering together. in what would appear to you a little dark mahogany bunch. Mash and dissolve this

bunch with a stick, and you will behold sev-At last, seeing that it had some sense and eral drops of fresh blood which the paraseemed to have feeling, a wise man of the sites have drawn from the veins of your village was appointed to make it a speech, fowls the night before. This they do reguand request it to leave the little place and go larly night after night, and as the cold to some larger town where there was ampler weather approaches they seek hiding places provision for its support.

on the bodies of the towls, and feast continually, causing them to droop and become worthless. If hen houses are thoroughly cleansed and kept white-washed this evil is in a great measure avoided. The droppings teously upon its mouth.

should be removed once each week to thorough, for the fowls shake and pick the vermin from their bodies at night in warm weather, and they feed and breed in manure and soon appear in swarms, myriads crawlgood of the town.

ing upwards to the roosts, to seek the bodies of the fowl if left to their own way. At least three times through the summer season the houses and nest boxes should be gone through had him near enough the fiery beast would with and thoroughly cleansed and whitewashed outside and inside, and the droppings all removed from the floor, which should be sprinkled with wood ashes or air-slacked going to the river side, first received the lime.

STARTING APPLE SEEDLINGS,-Nursery-

STARTING APPLE SEEDLINGS.—Nursery-men are divided in opinion in regard to keeping apple seeds during Winter. Some prefer to prepare the soil in Autumn and sow at once in shallow drills. Others pack in boxes with alternate layers of moist sand placed either in a cool cellar or out in the open air on the north side of the building where it will remain frozen until quite late in the Spring. As this seed germinates so read-ity and so early in the season, the latter is an excellent plan. At all events, sow the seed as soon as the ground is sufficiently dry to work nicely without danger of bak-ing. Sow very shallow and keep the weeds dy to work interly winning danger of bak-ing. Sow very shallow and keep the weeds down, as a matter of course. No one has everyet grown good seedlings and a thrifty crop of weeds on the same soil at the same time. Strong one-year old seedlings are uterly the both for the third cartes, and Olsen, bending low, and smilling, once more kissed her; and she stood upon the thore no heast but a fair woman, in whom

time. Strong one-year old seedlings are likely to be fit to grafi; at two years old they should be excellent.
A HEN WALKER.—A Statesville genius has invented what he terms "a garden preserver or hen walker." The machine resontble somewhat the spur of a rooster, only considerable larger and is attached to a schiet.
But having kissed her, and so having considerable larger and is attached to a chick-en's pedal extremities, at an angle of 45 de-grees toward the ground. When the chick-en with this instrument strended to a chickgrees toward the ground. When the chick-en with this instrument attached to its legs, enters the garden and begins to scratch for seed, as the foot is put forward in the act of scratching, the instrument catches in the ground, and the fowl is instantly walked out of the garden.—Stateswille Landmark. willed. Thereupon Olsen, clasping his beautiful love in his arms, wreaked his vengeance on a hideous stone-figure, with a griuning face, that still stands looking down upon the vil-lage, and married his Christine before the sum went down.

its natural Vitality and Color. The whole village was in terror. It threat ened destruction if it were not well fed, and demanded the milk of nine cows and all the eggs that all the hens thereabout could lay or its breakfast.

Then, satisfied, it would sit upon a rock and cry, great tears splashing into the water. Nothing could prevail against it, nor could t be driven away.

with the gloss and freshness of youth Thin hair is thickened, falling checked, and baldness often, though not always, cured by its use. Noth ing can restore the hair where the follicles are destroyed, or the glands atrophied and decayed. But such as The fiery beast answered very politely that remain can be saved for usefulness by this application. Instead of fouling the hair with a pasty sediment, it will keep it clean and vigorous. Its

occasional use will prevent the hair from turning gray or falling off, and consequently prevent baldness. Free from those deleterious substances which make some preparations dangerous, and injurious to the hair, the Vigor can only benefit but not harm

it. If wanted merely for a HAIR DRESSING, nothing else can be found so desir.

Containing neither oil nor able dye, it does not soil white cambric, and yet lasts long on the hair, giving it a rich, glossy lustre and a grateful perfume
