PENNSYLVANIA CANAL.—The Pennsylvania canal company during the year 1877 witnessed a steady improvement of its main line. Its net revenue was \$287,842.37, a decrease of \$118,- W. Hess; Pine-L. A. German; Scott-Geo 441.21 from the revenue of 1876. With reference to this shrinkage, the management say in their report: "The abandonment of all efforts to maintain a reasonable relation between the supply and demand of coal in August, 1876, produced a marked effect in the company's business during the latter months of that year, coal being the principal item of its transportation business. The same cause, with the resulting keen competition on all the competing lines, was felt throughout the past year; but with the increased facilities and reduced expenses of the canal, it could have endured this, and met its interest and sinking fund obligations, but for the prolonged strike of the miners in Wyoming district, which stopped all coal shipments during about twelve weeks. The map spoken of in our last issue pubished by J. H. Butler & Co., of Philadelphia, is a map of Pennsylvania, which we neglected to state directly, though it was implied. It is one of the best we have seen and we are glad o have it on our office wall.

It was exceedingly unkind in a member of the old Town Council who was re-elected at the late election, to object to the allowance of exonerations of town tax to a number of poor men He ought not to have done it for two reasons first because he is a blatant protector of the poor man, and second because he received the rotes of nearly all those who pay no taxes.

THE NEW PENIFESTIARY AGAIN. -- The Dantille Intelligencer and some other exchanges are owns to take active and prompt measures to se cure the location of the proposed new Peniten tiary. Our geographical position and unequalied facilities should make Bioomsburg the choice. The advantages to the town and country can hardly be over estimated. Why do no our citizens set in the matter?

The Bloomsburg - goes off in ecstacies over the success of its faction at the late elecion in that borough, all of which turned on the prestion whether the " poor man's cow" should be free to browse on its untraveled and verdant lanes. The "ring" opposed it, and now "; voter" writing to the Shenadoan Herald calls t the "laboring man's victory." So, after this Bloomsburg can be fenced in and made a pas ture land for the "poor man's cow."-Daneille Intelligencer.

The Intelligencer names the paper, but we cannot advertise for nothing. Local notices, wenty cents a line.

The Masquerade Ball at Evans' Hall las Monday night was largely attended, and succeeded far beyond the expectations of those who had it in charge. There were over one hundred persons in costumes of every description, ele gant, grotesque, comic, and hideous. Nine sets occupied the floor at one time. Masks were removed at eleven o'clock, after which all joined the dance and from twelve to fifteen sets were in motion the rest of the evening. Mr. Thomas Webb acted as prompter, and the music wa furnished by the Bloomsburg Orchestra, under whose management the party was got up. At least two hundred spectators were present. Dancing was kept up until about three o'clock in the morning, when all went home well pleased with the Masquerade.

[From the Carthage (Mo ) Banner.] COMING TO JASPER.

A colony of about thirty five persons fro Pennsylvania is expected to arrive in this city to-morrow or the day following. Three gentlemen of the party, Mesers. Warden, Ale and Bowman were here last spring looking over the ountry and also went to Kansas, but forming a decided preference for Jasper, purchased farms; one of the farms bought is known as the Mitch ell farm about five miles north of Carthage, and they have also purchased John Wicks' farm lying immediately west of Mitchell's. The credit of having brought this enterprising colony belongs in part to J. L. Bottenfield, J. G. Leidy and H. H. Rutter. gentlemen took great interest in showing the parties over the country when here, while Mr or months since came here from the san town; in Pennsylvania, has written several letters to the newspapers of that locality, describing this county and urging his friends to immigrate to Southwest Missouri. The colony comprise men and families of energy and capital and will be gladly welcomed by all our peo ple. They come from Bloomsburg and adjoin-

On comparison with the genuine coin it will be found that the trade dollars are pinkisk white in hue, They may readily be detected by this peculiarity i their color. The milling of the counterfeits is nearly perfect, but there are slight traces of a mould, in which coin has been run, visible on the edge; it is also light in weight, and will not rebound much when sounded. However, no bogus coin larger than a dime will rebound to any extent, no matter how hard it may be

struck on a wooden surface. BOARD OF PARDONS .- On Tuesday night the oard heard the arguments in the case of Patick Hester, Patrick Tully and Peter McHugh. olonel J. G. Freeze and C. B. Brockway, Bloomsburg, and S. P. Wolverton, of Sunbur appeared for the culprits and asked for a par don or a communication of the death sentence o imprisonment for life. The Commonwealth was represented by District Attorney Clark, of Columbia county. The principal argument of the attorneys for the condemned was that the conviction was due to the uncorroborated evidence of an accomplice, who had not only been gutlty of murder, but every other crime on the alendar. Mrs. Hester and her daughter atten tively listened to the arguments. The decision of the board will be rendered next Thursday In the case of Fisher the Board will take no

TEACHERS' INSTITUTE.

BENTON, March 4, 1878. In pursuance of arangements a District Instilittle town, and of teachers, and students from his section of the county.

At ten o'clock A. M. the house was called to secretary of the Institute. Mr. Snyder in his his loss. friendly style, address d the audience. He stated the object of the Institute, and made a few remarks in regard to the importance of awakening an interest in educational matters in this section. The audience was then favored with some choice music by a quartette club selected for the occasion, after which Mr. Snyder introduced Professor Noetling, of the Bloomsburg State Normal School, who gave an exercise in reading. The teachers and students were very much interested in his manner of conducting a reading exercise. He would have a class read a sentence or a paragraph until they thoroughly understand it before proceeding any further. This should lead them to accept the motto, "Not how much but how well."

At 1 P. M. the afternoon session commences lessons. He was followed by Mr. Snyder, who explained the shorter methods of counting interest. He spoke leiefly of the importance of

map on the board and explained the importance of Geographical studies. In teachir g Geogra-phy we should go from the known to the unknow. Teachers should commence at home and teach the children the Geography of the neighborhood in which they live. By so doing they will more readily comprehend the Geography of distant places and counties

The exercises were then turned into general questions. A question which is very important to the School Directors is the following: Is pool, Ohio. it advantageous to have the school year in one term, or would it be preferable to have a summer and a winter term? Prof. Neotling answerd that it would be better to have on teacher for the whole year and have one term than to divide the school year in two terms. It takes at least two weeks to organize a school which makes the terms very short by having two terms a year.

Mr. Snyder urged the Directors to take mor nterest in regard to having a uniformity of blocks in our schools. Another drawback is of the parents in a great measure. School time money. And every day that a father keephis children out of school, he is depriving the of that knowledge which will be of more value to them in after life than ten times what they

Another important item to the Directors is the manner of taxation for school purposes which Mr. Snyder briefly explained. They can not take both occupation and poll tax; but if number of important questions were answered

THE TELEPHONE.

That which would have seemed impossible and miraculous a few years since, is now regarded as the legitimate fruit of our mental development and inventive genius. The telegraph, sub-marine cable, and telephone, have each in its successive turn been thought the crowning marvel of the age. That a speech pronounced in Boston should report itself over the wires to an audience in Brooklyn, and a hymn played in New York, should be audible in Washington, is indeed wonderful. But is it not equally text books. This is one of the great stumbling wonderful that R. V. Pierce, M. D., of Buffalo, N. Y., can, through his peculiar system of the irregularity of attendance which is the fault diagnosis, and without seeing the patient obtain as accurate and perfect a knowledge of most chronic diseases as though he had made a personal examination? And is it not reasonable to supplies as great progress has been made in the occult sciences as in the more tangible and readily-demonstrable problems of metaphysic where each new invention is but the logical se quence of the one that precedes it? The failure of physicians to fulfill their promises has create ed a wide-spread feeling of distrust; but is it tax must in all cases be one dollar. If the tax right to condemn all physicians because the on the occupation exceeds one dollar, then it greed or ignorance of a few induced them to do wrong? Many are prejudiced against Dr. Pierce's Family Medicines, and erroneously fancy them to be "cure-alis," but has not the Doctor repeatedly disclaimed their ability to cure cancer, or give other than temporary relief where the lung was half wasted away?
