

BLOOMSBURG, PA. Friday, March 22, 1878.

EXECUTION IN CAPITAL CASES.

In order that the public may understand who may be permitted to witness the executions, and thus prevent the indiscriminate application for admission we publish the law in such cases made and provided by the act of 31st March 1850:

"Whenever, hereafter, any person shall be condemned to suffer death by hanging, or any crime of which he has been convicted, the said punishment shall be inflicted upon him within the walls or yard of the jail of the county in which he shall have been convicted; and it shall be the duty of the sheriff or coroner of the said county to attend and be present at such execution, to which he shall invite the presence of a physician, the district attorney of the county and twelve reputable citizens, who shall be selected by the sheriff; and the said sheriff shall see that the execution is carried out in accordance with the law, and that the persons above designated to witness the said execution be admitted to witness the same."

Mazure, who escaped from the Sunbury jail recently, was captured at Lock Haven and returned to more secure quarters.

Petitions are in circulation, asking for the impeachment of Judge C. P. Waller, of the Wayne county district. We know nothing of the merits of the case.

Who Can Tell?

The great conundrum is—who won in New Hampshire? The Republican ticket squeaked through, but that's of no consequence, as the whole was won by the vote of the Granite State. Did Hayes sit down on Hayes? or did the people of the Granite State sit down on both of them?—This, Times.

And now it seems of the Williamsport banner has got a libel suit hanging over him. He was arrested on a capias taken out by Jacob Salade, for saying that the said Salade had received \$2,000 from Peter Herdic for his common counsel. Salade got mad about it, but Hayes says he can prove it, and does not seem a bit scared.

Death of a Congressman.

HAVANA, March 15.—Hon. John K. Leonard, member of the United States house of representatives from Louisiana, died this morning at the telegraph office in this city. He arrived here on the 4th inst., and had engaged passage to return to New York on the 9th, but was taken ill the same day. His illness resulted in yellow fever, which terminated fatally. All classes of the community manifested great sympathy for Mr. Leonard, who was only 32 years old.

Death of Senator Nagle.

Philadelphia, March 18.—Hon. David A. Nagle, State Senator and President of the American club, died to-night. His death was caused by Bright's disease of the kidneys. [Deceased was elected to the State Senate in 1866 and served in that body ever since. He struggled manfully against the disease which had marked him for its victim, discharging his legislative duties almost to the last hour. He was much respected here, and his untimely death will be widely mourned.—Ed.]

The Long Bonds.

The editor of the Philadelphia Times, in alluding to this funding measure, says: "Senator Wallace has rendered the country an essential service, and especially the industrial classes whose savings have so greatly benefited by the failures of savings banks, by pressing his bill authorizing the issue of four per cent. gold bonds, running fifty years, in denominations of \$25, \$50 and \$100. The measure was passed finally in the Senate without roll call, and it will doubtless pass in the House. These bonds will be rapidly absorbed by the savings of laborers and bankers of business men, who look for an additional issue to be demanded before the close of the present Congress."

Glances at Washington Fast Life.

J. R. YOUNG'S WASHINGTON LETTER IN SUB. Already rumor is busy with the name of one of the leading officials of the government, who is living in style and driving a pair of fast trotters on a salary of \$4,000 a year. There are whisperings about another official, whose salary is \$10,000 a year less than the first mentioned, who entertains handsomely in a large and stylish house, and who is known to be accumulating property. He was extremely poor when first appointed to office by Grant. When a man gets an office here and suddenly gets rich people naturally ask how he can save so much on so small a salary. Senator Edmunds, when asked about a man so situated—receiving \$2,500 a year, living at the rate of \$10,000 and always accumulating property—replied with a sarcastic smile—"Oh, he has an economical wife."

Democratic State Committee.

THE NEXT STATE CONVENTION TO BE HELD AT PITTSBURGH ON MAY 22.

The democratic state committee met in the Central democratic club rooms, this city, this evening, at 7 o'clock, for the purpose of the committee adjourned until 2 p. m.

After reassembling the committee decided to admit Charles W. Carrigan, the contestant, when several members named different dates, at which the convention should be held, May 22, June 19 and September 4 were advocated. The former date was adopted by a considerable majority, receiving twenty-five votes.

The meeting was unusually large, fifty-seven persons out of the membership of fifty being in attendance.—Patriot.

It is with peculiar interest we have watched the investigation of the Union Co., and the collection of the tax due thereon. The Patriot says: "It seems that the Union railroad and transportation company was indebted to the commonwealth at the time of its dissolution, for tax on a special dividend, in the sum of \$201,000. In October last, while Auditor General Temple was absent from the city, Messrs. Simonon and Olmsted suggested to the State Treasurer Rawle that they thought they could collect some corporation taxes due the State concerning which, as they claimed, they alone had information. Upon their representation an agreement was entered into between State Treasurer Rawle and Chief Clerk Warden, of the Auditor General's office, on the part of the commonwealth, and the aforesaid Simonon and Olmsted, by which the latter were authorized to proceed with the collection of the monies they stated they believed to be due to the commonwealth, their fee to be ten per cent. of the amount which they might succeed in collecting. Auditor General Temple, on his return to this city, ratified the action of his chief clerk, and gives as the reason for so doing that it was represented to him that the sum to be collected would not likely exceed \$20,000 or \$30,000 and that the attorney general had approved the matter. Messrs. Simonon and Olmsted, when they reported the result of their operations to the treasury it appeared that they had collected \$191,053.97 and that the corporation which had disgorged was the Union railroad and transportation company. They claimed their fee of ten per cent. of the sum collected, which amounted to \$19,105.39. Objection was made at the treasury to the largeness of the fee but Attorney General Lear gave an opinion that it was not pretended relative to the office itself.

The Court gave an abstract of the election law, detailing its requirements. The exact method presented in law was fully described. The record offered in evidence did not conform with that mentioned in the information. The document offered was a "consolidated statement," certified by the register of voters and not the original returning board, and this state of our State does not attach much value to the consolidated statement. The original returns not being altered would change the result of an election and interfere with the interest of the people. The paper offered in evidence is not the paper charged as being forged. In order to be a forged instrument which it is alleged is falsified must, first, be legally capable of committing a fraud.

Now here in law is a consolidated return, required as a declaration of result, and its alteration or modification can in no way affect the election. If every consolidation return were forged, and the returning board complied with the law and made their statements to the commissioners' returns no injury could result. It does not appear that any paper has been forged that is calculated with a compliance with the law, to change the result. It is the essence of this crime that it is a return made by a public officer and on a document which would change the result of the election. This would not be done. The letter of John Sherman, Stanley Matthews and others, which appeared in the record, was alluded to by the chief justice, who stated that it should be treated by the public in like manner as that of a member of the house of commons who attempted to influence the decision of the court in the habeas corpus case. It was one of the objects of the jury to be set aside and reversed and the prisoner discharged from custody.

WASHINGTON LETTER. On Friday next Mr. House's committee will submit to the House its bill for revision of the tariff. I believe that more intelligent labor has been given to this revision than to any other subject of legislation for several years. The diversity of interests affected by the measure will, of course, cause opposition, and it may be that, for the present, no change will be made, but Mr. Wood is not the less entitled to praise for his efforts in the matter.

Our old friend McGraham is having his claim investigated by the Senate Public Lands Committee. It seems to be pretty clearly established that both McGraham and his opponent, the New Idria Mining Company, have at various times secured the appointment of public officers solely for the influence they could exercise in their positions upon the final determination of the case. This is shown as to McGraham by his own letters and the record seems to me to plan that the New Idria Company has done the same thing.

There is considerable mystery about the death of young Leonard, member of the house of commons in Louisiana. It was rumored that he died a few days since at Havana, of, as was stated, yellow fever. But there seems to have been no yellow fever at Havana at the time. It is believed he was poisoned. He was the youngest member of the House, and came originally from Pennsylvania. In the House on Saturday Mr. Goodie, of Va., introduced a bill for the relief of the heirs of President Monroe.

The subject of paying contractors for carrying the mails in the South, first introduced in 1860 and 1861, was up again. A new bill will be presented. Unquestionably most of these men should be paid, and not all of them suffer because a few of them have already been paid.

It is now likely that Congress will give to this District a mixed—a very much mixed—form of government. One Commissioner shall be appointed by the President, and shall be selected from the Engineers Department of the Army, and one be selected by the House and one by the Senate. There will be a council of twenty-four persons, to be selected by such citizens of the District as have resided three years, and have paid a poll tax. The council has no power except to negative the acts of the Commissioners. In fact, the veto power, and little else, belongs to the Council. The bill has strong support in Congress, but the average citizen dislikes it.

Mr. Hayes has approved the bill giving authority for a reopening of the proceedings of the Court Martial which cashiered Surgeon General Wm. A. Hammond during the war. This is perhaps an act of justice to Hammond, but no facts have been presented which distinguish his case from that of thousands of other officers who were hastily and no doubt unfairly tried by similar Courts or were summarily dismissed by such officers as Butler and other civilians, without any trial at all. The reopening of all the cases should be authorized, wherever evidence of importance is presented by the officer punished. As it is, no Department has authority to act.

Anderson Released. THE SUPREME COURT OF LOUISIANA ORDERS HIS RELEASE FROM IMPRISONMENT. THE RETURNING BOARDERS ALL SET FREE.

Washington, March 18.—Senator Matthews received the following dispatch this afternoon from New Orleans: "The Supreme Court decides that the Vernon parish returns not susceptible of inquiry, and General Anderson is discharged. This ends the whole case as to the other members of the returning board." New Orleans, March 18.—In the case of the State vs. Thomas C. Anderson, an appeal for a new trial, the Supreme court has reversed the verdict of the jury and ordered the prisoner to be released.

New Orleans, March 18.—The Supreme Court this morning was crowded with members of the bar, politicians and other persons anxious to hear the decision in the case of the State vs. Thomas C. Anderson convicted in the superior criminal court of publishing as true forged and counterfeit election returns from the parish of Vernon. Chief Justice Manning read a very lengthy opinion in the case. After reviewing the charge verdict and sentence the Court took up two of the exceptions as being the only ones necessary to consider in rendering a judgment. There had been no preliminary examination and that it is not a practice to prosecute information. Both exceptions were dismissed—the first upon the ground that a preliminary examination is not essential, and second, that prosecution by information has been a common rule, criminal in prosecutions for many years. The exception to the drawing of the jury was also dismissed on the ground that a violation of the spirit of the law is not pretended relative to the office itself.

The Court gave an abstract of the election law, detailing its requirements. The exact method presented in law was fully described. The record offered in evidence did not conform with that mentioned in the information. The document offered was a "consolidated statement," certified by the register of voters and not the original returning board, and this state of our State does not attach much value to the consolidated statement. The original returns not being altered would change the result of an election and interfere with the interest of the people. The paper offered in evidence is not the paper charged as being forged. In order to be a forged instrument which it is alleged is falsified must, first, be legally capable of committing a fraud.

THE RESULT OF DOING BUSINESS WITH NOTHING BUT COIN.

If nothing but coin was used as money and currency, nearly the entire amount of business would have to be done on credit, with time notes. Money and credit would demand and obtain exorbitantly high rates of interest. It is with a rock, produce all the artificial wealth which exists, and thus put all interest on money and debts due to one another, this would be to impose an unnecessary burden on wealth-producers or on the laborers of the country, for the benefit of a few individuals, and commonly known as Bill-brokers or Note-Shavers—hence the anxiety of that covetous and extortionate class of men to keep money and currency out of the hands of the people, that they may obtain a monopoly of the means of exchange, and be so solemnly excluded from any hope of enjoying pleasure in a future world, they are intent on enjoying their cupidity in this, and the power which an accumulation of currency gives them. They cannot have any hope of the future, without changing their course, as it is solemnly declared by high Heaven, that "the covetous man and extortioner shall not enter the Kingdom of Heaven" consequently, it is with a rock, produce all the artificial wealth which exists, and thus put all interest on money and debts due to one another, this would be to impose an unnecessary burden on wealth-producers or on the laborers of the country, for the benefit of a few individuals, and commonly known as Bill-brokers or Note-Shavers—hence the anxiety of that covetous and extortionate class of men to keep money and currency out of the hands of the people, that they may obtain a monopoly of the means of exchange, and be so solemnly excluded from any hope of enjoying pleasure in a future world, they are intent on enjoying their cupidity in this, and the power which an accumulation of currency gives them. They cannot have any hope of the future, without changing their course, as it is solemnly declared by high Heaven, that "the covetous man and extortioner shall not enter the Kingdom of Heaven" consequently, it is with a rock, produce all the artificial wealth which exists, and thus put all interest on money and debts due to one another, this would be to impose an unnecessary burden on wealth-producers or on the laborers of the country, for the benefit of a few individuals, and commonly known as Bill-brokers or Note-Shavers—hence the anxiety of that covetous and extortionate class of men to keep money and currency out of the hands of the people, that they may obtain a monopoly of the means of exchange, and be so solemnly excluded from any hope of enjoying pleasure in a future world, they are intent on enjoying their cupidity in this, and the power which an accumulation of currency gives them.
