It is with sincere pleasure that we learn that the Democracy of Wayne county have instructed their delegates to support Mr. Beach in the coming State Convention for Secretary of Internal affairs. He served with credit in the Legislatures of 1872-3, and materially aided in the legislation calling the Constitutional Convention into existence, be sides always voting against jobs and rings. His personal character is beyond reproach as was evidenced by his unanimous election to the Legislature. He is both honest and

of wide dissatisfaction and although efforts were made in 1368, 1870 and 1873 to amend it so as to remove the objectionable features none have proved sufficiently effectual. At present the pressure for its repeal is very strong. Its objectionable features are many Its operations are much impeded by our great extent of territory ; and besides are manifestly unjust, a fact testified to by a large majority of the American people. So long as the present law is on the statute book any merchant or trader is liable to have his estate thrown into bankruptcy, his pecuniary credit and reputation ruined and his property subjected to losses and sacrifices in cases where in a legal sense he is perfectly solvent, where most of his creditors might be aver-to any such measure, where if reasonable time were given he might pay his debts and have a surplus left, and where no act of fraud either of omission or commission is charged on him. It is only necessary that a man's commercial paper be unpaid for fourteen days to make his estate liable to bankruptcy. Bankrupt estates under this law are generally eaten up by charges and expenses. In New Orleans out of 1,800 cases in only one, was any dividend realized. Its workings in New York and other large cities are nearly the same. If the house will pass this repeal act, within the next month, it will meet the hearty thanks of many business men all parts of the country.

It may seem odd that an editor can escape from political questions, and come down to every day subjects. We are interested in "butter," and have been ever since pancakes were invented. In fact, we occasion ally use the article. But we cannot undertand why Columbia County should not

This book must be kept by the township treasurer, where they have one. If none has been selected it must be kept by the supervisor, who is subject to a heavy penalty for refusing its inspection.  It has been decided by the supreme court that it is illegal for a supervisor to enter into such contracts for making the roads as would preclude the citizen the opportunity to work out his tax. Building bridges on a highway by the township is made an exception. Where a road tax was assessed and the taxpayer re-insed the opportunity to work it out, the su-pervisor was restrained by an injunction from collecting it on a warrant. The prividge of working out the tax is a right clearly con-ferred by act of assembly, Miller vs. Simons & Preston, 3 Wright, 309. We are, therefore, clearly of the opinion that it was the duty of the supervisor in the present case and in every case to assess the road tax searly in the season, and give the citizen of the township a full opportunity to work it out, provided be attends after reasonable public notice at the time and place fixed by the sup-privor. If he neglects, after such notice, and the other is obliged to hire men to per-form the duty, this tax can be collected in money. This is a mistake. The supervisor, like county com-missioners, must estimate what will be re-quired. It is also said that the amount of tax and the wages of labor are directed by the township auditors. They have nothing to do with either, but can see that there is no abuse of discretion, improper acts, dishonest conduct, or waste of public money by the su-pervisors. HENRY WARD DENIES THE SOFT IM-

PEACHMENT. NEW YORK, April 15.-Mr. Beecher was

out of the city to-night when Mrs. Tilton's letter was made public and his whereabouts was not known save to a few friends. The New York Tribune telegraphed him a copy of the letter at a late hour to-night and re ceived the following in reply from Mr. Beech

WAVERLY, N. Y., April 15, 1878-To the Editor of the New York Tribune : I confront Mrs. Tilton's confession with an explicit and absolute denial. The testimony to her own innocence and to mine, which for four years she had made to hundreds in private and public, before a court in writing and orally, I declare to be true and the allegations now made in contradiction of her uniform solemn and unvarying statements hitherto made I utterly deny. I declare her to be innocent of the great transgression. (Signed) HENRY WARD BEECHER.

yet there is not only a deficiency in the supply but the average quality is abominable In reply to a question as to how best to manufacture, pack and ship butter, a valued friend Hon. Shattuck of Chenango sent u a communication from which we condens the following :

In regard to the manufacture, I would re commend the securing of good cows, and feeding them plenty of good wholesome tood and providing pure water. Cleanliness in milking is very important

Cleantness in milking is very important, Have your milk room in coolest part of the hoves it you use small pans; if large pans are used, with water around the milk, it does not make so much difference about the loca-

I am very much in favor of large pans, the milk is mixed from the time it is strain ed until the cream is churned I am of the mion that the cream will rise better and be in better condition for churning, than

when set in small messes. The cream should be removed from the milk in from 36 to 48 hours ; should never be allowed to stand longer than 48 hours, a any season of the year. In warm weather the milk will whey and

destroy the cream ; and in cold weather th cream is likely to become bitter, and conse quently spoil it for making a good article of butter.

I have no objection to the milk souring, or even becoming thick before the cream is removed, if there is no symptoms of whey. Churn as often as you have sufficient cream for churning. I do not think it is best to long if hard enough to keep it so long if hard enough to churn. When it is necessary to keep more than one day's cream for a churnirg, it should be well stirred every time you skim any new cream into your pail, that it may be thoroughly mixed. This I regard as very important. When you have cream enough for a churn-ing, in warm weather, cool your cream to 58 domes and give your churn a motion that

degrees and give your churn a motion that will fetch your butter in from forty to sixty minutes ; then remove the butter from the buttermilk, washing it in two or three water or until the water is clear; then sait with one ounce of salt to a pound of butter, and let it stand a few hours ; then work it a little ; let it stand a few hours longer and work again, adding more salt if neccessary ; now your butter is ready to pack to keep, or ship to market as you think best.

In manufacturing winter butter, I would warm the cream to 60 or 62 degrees, and in salting, would use three-fourths of an ounce of salt to one pound of butter, with salt peter one ounce to 100 pounds, and one peter one conce to be plause, and one has cases to teachy as witnesses, and when using carrot juice enough to give the butter, a good rich color, about like June butter. I think carrots impart a good flavor to the butter. Work the same as in Summer, taking care to keep where it will not get too hard, until it is ready to pack and then keep
