Wertman Willoughby, March 4th, 1865 Williams Montgomery, March 10th, 1865. discharged by general order May 24.

Zimmerman George, March 10th, 1865, musustered out with company August 29th,

This company was assigned to the Seveny-fourth in March 1865. It was at that time on guard and garrison duty on the Baltimore and Ohio railroad, with headquarters at Green Spring. The regiment proceeded thence by rail to Webster, from which place it marched to Beverly. It remained at the last named place on picket and guard duty from April 8 to May 12; when ordered to Clarksburg. Subsequently the headquarters were at Parkersburg, whence it did guard Baltimore and Ohio Railroad. It was mustered out of service at Clarksburg, whence it returned to Pittsburg, where it disbanded.

Hydrophobia Cured.

A REMEDY THAT IS SAID TO HAVE REEN

SUCCESSFULLY USED IN PHILADELPHIA. I can give some facts which may be of use to somebody saving life. The time between the biting of an animal by a mad dog and showing signs of hydrophobia is not less than nine days, but may be nine months After the animal has become rabid, a bite or scratch with the teeth upon a person, or slobber coming in contact with a sore or raw place, would produce hydrophobia just as soon as though he had been bitten by a mad dog. Hydrophobia can be prevented, and I will give what is well known to be an infallible remedy, if properly administered for man or beast. A dose for a horse or cow should be about four times as great a for a person. It is not too late to give med icine any time before the spasms come on.

The first dose for a person is 14 ounces of elecampane root, bruised, put in a pint of new milk, reduced to one-half by boiling, then taken all at one dose in the morning fasting until afternoon, or at least a very light diet after several hours have elapsed. The second dose same as first, except take two ounces of the root; third dose the same as last, to be taken every other day. Three doses are all that is needed, and there need be no fear. This I know from my own experience, and know of a number of other cases where it has been successful. This is no guesswork. Those persons I allude to were bitten by their own dogs, that had been bitten by rabbid dogs, and were penned up to see if they would go mad. They did go

mad and did bite the persons. This remedy has been used in and about Philadelphia tor forty years and longer, with great success, and is known as the Goodman remedy. I am acquainted with a physicism who told me he knew of its use for more than thirty years, but never knew a case that failed where it was properly administered. Among other cases he mentioned one where a number of cows had been bitten by a mad dog. To half of this number they administered this remedy, to the other half not. The latter all died of hydrophobia, while those that took the elecampane and milk showed no sign of that disease. -- Country Gentleman.

Coffee as a Disinfectant.

Roasted coffee, says the "Homeopathic World," is one of the most powerful means not only of rendering animal and vegetable matter innocuous, but of destroying them. n proof of this the statement is made that a coom, in which meat in an advanced degree of decomposition has been kept for some time, was then instantly deprived of all mell on an open coffee roaster being car tered out with company August 29th, ried through the room, containing a pound of newly roasted coffee; and in another room, effluvium occasioned by the cleaning out of a cesspool, so that sulphurated hydrogen and amonia could be clearly detected, was entirely removed on the employment of three ounces of freshly burnt coffee. Refrigerator sometimes get musty from flesh fowl, or fish being kept in them too long. remedy for purifying such receptacles, simple as burnt coffee, can be employed.

ken as homesteads by actual settlers.

These lands lie in the Great Limestone Belt of Central Kansas, the best winter wheat producing district of the United States, yielding from 2 to 35 Bushels per Acre.

The average yearly rainfall in this county is nearly 32 inches per annum, one-third greater than in the much-extelled Arkansas Valley, which has a yearly rainfall of less than 22 inches per annum in the same longitude. searly rainfail of less than 2a inches per annum in the Same longitude.

Stock Raising and Wool Growing are very Remanerative. T. e winters are short and mild. Stock will live all the year on grass! Living streams and Springs are numerous. Fure water is found in wells from 20 to 60 feet deep. The Beatthfest Climate in the World! No fever and sage there. No muddy or impassable roads. Plenty of the building steme, lime and said. These hands are being rapidly settled by the best class of Northern and Eastern people, and will so appreciate in value by the improvements now being made as to make their purchase at present prices one the very best investments that can be made, aside from the profits to be derived from their cultivation. Members of our firm reside in Wa-Keeney, and will show lands at any time. A pamphiet, giving full information in regard to soil, climate, water supply, acc. will be sent free on request.
