THE HOT WAVE

The blistering weather which has been prevalent recently was caused by a hot wave, starting in the west and coming gradually on us. All the large cities have suffered more or less from it, and many deaths from sunstroke are reported. In Philadelphia one thermometer indicated 105 degrees in the shade, and another 108 degrees on the 18th. In other places it ranged from 98 to 103. In Bloomsreported here.

We have heard men say, "we have tried both parties and found them failures." This is not the truth. When the Democratic party was in power before the war, who ever the prosperity and security of both-to preserve intact the institutions of the country as the fathers of the republic have made them. But the desire for power became an overmastering one, and politicians without honor or principle, sought by any and every means however disreputable to attain it They succeeded, and in the destruction of the policies pursued alike by the old demo crate and whigs, the Pandora box of politi-

cal evils was opened, and from that day to this there has been nothing but going from good to bad and from bad to worse. The Fitz John Porter case is developing a new history of the second battle of Bull Run both the Union and Confederate command. ers telling about the movements of their own and other commands as seen by themselves. It will be a cause for rejoicing if the result of this critical examination of the as Yona Lilavre, comprising the Northern Buil Run battle should be the vindication of General Porter from the charges which have, for so many years, blotted the record

of his otherwise honorable career, as a soldier, but, whatever the verdict may be, the rehearing in his case is likely to prove of substantial value to history. The decision of the present court martial, made up in all calmness, should settle forever not only the present disputed questions as to General Porter's acts and motives, but a great many other questions connected with the management of the contending forces during the fight.

Of the four National candidates for Con-

gress already nominated in Michigan three are ex-Republicans. It is in this manner that the Nationals prey upon the vitals of the Democratic party, in strict accordance with the predictions of our Republican friends last spring.

Ord.

To-day the President had a long interis here in interest of the war party in Texas. He represents that Texas is solid for war, asserts positively that a majority of the Administration is for war. He laid before the President to-day the views of the people of Texas upon the border troubles, and the neccessity of aggressive measures. He reports that the President was noncommittal, but asserts, positively that it makes no difference whether the President is for or

tunity to cross the border and make an attack on the Mexican troops, which of course will be resisted. A large body of Texas troops, which will be in readiness, are then to be thrown across. The whole territory known States, is to be seized, and the revenues collected by force. It is of course expected that this course

will precipitate a general Mexican war and prominent movers in it now in this city admit that it will take 100,000 men and two years to bring the war to a close. The prime movers in this war movement appear to be certain railroad men who are anxious to run lines into Mexico, and quite willing to do a little military transportation business for the Government. Maps showing the portion of Mexico which it is proposed to annex are be-

ing prepared, and will be shortly published in several leading papers which favor wa and annexation.-Bo ton Post. ----
