A goat has taken possession of an island i San Francisco Bay-at least the News Letter says so-and practically isolates it from civili zation by butting off everybody who attempt to land there. There is also a family living or it, which has displayed distress signals for to death, but no boat can go to its assistance. On the other hand telescopes reveal the fact that the only boat on the island is lying on the beach, with its bottom stove in by the goat. The matter has been before the Supervisors three times, but they have been una ble to decide what to do.

Thirty-eight churches presented the annual tatement of their condition. We gather from these letters that a healthy state prevails, but that no large increase in membership has been enjoyed. It is also apparent that the financial istress so general throughout the State has not left these churches unscathed. Still the letters are hopeful as to the near future.

On Thursday morning a business meeting numenced at 9] o'clock, and during its session he body listened to an address by Rev. A. P Bell, D. D., of Lewisburg, urging the claims of the University at that place. At 11 a. m. Rev J. M. Williams preached the usual doctrinal ermon-theme, the "Atonement.

In the evening a general meeting devoted to religious work was held. It was of deep interest. The Ministers of other Denominations were present, some of whom participated in the services. On Friday business of a general character was transacted, and the meeting closed with a spirited conference and prayer meeting.

It is quite evident that this Denomination is a live body and intend business. For many years past they have been gaining ground yearly, and as they possess a fair share of wealth ocial position, and a Ministry well trained, i is quite clear they will be a power in the future in the four Counties in which they are chiefly located. These Counties are Northumberland Lycoming, Union and Columbia.

CATAWISSA REVOLTS AGAINST THE RING, Post-Master Willits of Catawissa on account of increasing age and infirmities, concluded recent y to resign his responsible position. Among the anxious patriots willing to fill his place was Dickson, of Berwick, S. M. Ziegler, of Lewis | Calvin Clark-an estimable and competent gentleman-who was endorsed by the body of the Republican party. Just at this point Mr. Beckley, "wich is post-master in Bloom-burg," and general manager of the Republican party n this County, steps in and indicates to Hayes rebel General Post-Master General that Dr. L. B. Kline should have the coveted position, and to and behold, Kline got the commission. That mused a rumpus in Catawissa. An indignation seeting was at once called, and, headed by the Band, paraded the streets. Resolutions were assed denouncing the outrage, and a committee was appointed to see Cameron. The Telegraph and other Republican newspapers are laboring very hard to persuade the ex-Republicans who have joined the Greenbackers to return to the Republican party. Democrats who have gone into the Greenback organization should keep an eye on the movements of Republican politicans who profess to be Greenbackers. The purpose of the latter is to leave the Greenback organization at the be Greenbackers. The purpose of the latter is to leave the Greenback organization at the last moment and to take as many ex-Republicans back to their old party as possible. Tin is one of the earliest metals known which is contrary to what, not many year ago, was the general opinion of scientific men. For researches, however, which within the ast twenty years, have been instituted with last twenty years, have been instituted with regard to the variest traces inhabiting Eu-rope, have conclusively shown that weapons and implements of bronze (in alloy of tin and copper) were probably the metallic articles earliest in use, after those composed of copper alone, and before the introduction of iron. In the curious "lake dwellings" discovered in Switzerland, not only bronze implements, but bars of pure tin have been discovered. The proportion of tin varies from four to twenty xclusively procured from the mines instead of washing, or "stream work;" second. Saxo-ay or Bohemia in small quantities, and excluevely from mines; third, Banca and other stands of the Malay Archipelago, the Malay peniusula, as well as parts of Handostan and now furnishing the greater part of the tin commerce known generally as "Straits in." being derived from stream works; fourth. New South Wales, Queensland, and other parts of Australia, together with Tastnania, Spain, Bolivia and Mexico, also furnish (or have lately done so) some portion of the commerce. Greenland, Japan, Finland, Siberia, Iceland, and Madagascar and some other localities have also yielded tin in greater or less quantities.
