He had seen the ship coming ashore, and had lighted a blue light, which I now faintly remember to have seen, that revealed our position. Just above on the cliff it happily chanced that there was a crane, used for raising blocks of chalk which was provided with a chain and a bucket, and aided by some doaaniers he had descended by this means the face of the precipice and had caught hold of his daughter as she was swept away from me in the last mad rush of waters. He was an eye-witness, as he thought, of my loss in the

abyss, and had never dreamed that I could possibly have escaped. 'I wish you'd have stayed drowned,' said my friend, between his teeth, but for all

The vexed question of putting the Indians under control of the War Department will be discussed at the coming session of Congress, as the Commission appointed to consider the subject will have a report ready early in Desember. The report of the Commission, it is understood, will be adverse to the proposed change.

Two strong reasons why the change should be made are found in the expected reduction of expenses and the necessity of taking from the unmanageable. Interior Department of the portion of its authority and responsibility, Secretary Schurz says that in most important matters, from his inability to examine them thoughly, he is obliged to trust to his Bureau Officer.
