

The Columbian.

BROCKWAY & ELWELL, PRINTERS.

BLOOMSBURG, PA.

Friday, JAN. 10, 1879.

Judge Shawwood took his seat as Chief Justice of the Supreme Court of this State on Monday. The Philadelphia bar made a complimentary demonstration on the occasion.

Gov. Hoyt was given a dinner at the Wyoming Valley House, Wilkes-Barre, on New Year's eve by the bar of Luzerne and Lackawanna counties.

It is reported that Uncle Jake Ziegler, the veteran editor of the Butler Herald, will be a candidate for the sergeant-at-arms of the United States Senate next winter. If a life time of devoted service to his party is worthy of recognition, Uncle Jake is entitled to the place.

A colored man in Milton named Johnson was furnished with all the liquor he could drink on the day after Christmas at the Huff house, by some young Milton sports. After becoming highly intoxicated he was put out on the back porch, and died from the combined effects of the whiskey and the cold. Wouldn't a verdict of manslaughter charge these young men and the landlord a lesson?

The Hon. Morton McMichael, proprietor of the North American and United States Gazette, died at his home in Philadelphia on Monday afternoon. Mr. McMichael was an active and respected citizen of that city, and had held many offices of trust and honor. In 1856 he was elected Mayor, and in 1873 was made a member of the Constitutional convention to fill the vacancy caused by the death of William M. Meredith.

The State Legislature met Tuesday in Harrisburg. In the Senate, Thomas B. Cochran was chosen Chief Clerk. In the House, H. M. Long, of Allegheny, was elected Speaker, and W. C. Shunk, of Chester, Chief Clerk. The annual report of the State Treasurer of Pennsylvania shows that the receipts for 1878 have fallen \$189,882 below the estimates, and that the expenditures have exceeded the estimates \$261,933. A deficit of \$451,815 was reported by May 31st, 1878, the end of the appropriation year.

Three Hundred Miners Out of Work. PORTSMOUTH, January 8.—The Philadelphia and Reading Coal and Iron Company's employees at Beechwood Colliery, who struck last week for their back pay, were paid in full today. It is understood here that orders have been received from Philadelphia to close the colliery for the winter. This will put three hundred men and boys out of work. The men who refused to enter the Beechwood Mines of the same company. They were until their back wages were paid them to work to day. The strike at Lake Fiddler Colliery will continue.

A Failure for Half a Million. WILKES-BARRE, Jan. 8.—None of the other banks are effected by the failure of Bennett, Phelps & Co., except the Miners' Savings bank, upon which there is a slight run. The sixty days' limit has been accepted. Bennett, Phelps & Co.'s liabilities are probably half a million. They claim the creditors will not lose a dollar. It is said the firm loses about \$300,000 by the suspension of J. H. Sawyer, and the Riverside coal company. A number of business houses here are seriously embarrassed by the failure of Sawyer, Wolf & Co., druggists' made an assignment yesterday.

Maine has a Democratic Governor, and this, owing to the anomalous electoral system of that State, through the action of the Republican State Senate. In the event of a failure to elect by the system in vogue, the House of Representatives is compelled to send to the Senate the names of two of the candidates, and one of these the Senate must elect. It is supposed that the Democrats and Greenbackers will have a majority over the Republicans in the House, and if they sent to the Senate the names of Garcelon and Smith, these being respectively the Democratic and Greenback candidates, the Republican majority in the Senate would be decided to elect the former. The Governor-elect, Dr. Alonzo Garcelon, is a prominent physician, and is said to be a hard money man, having little or no sympathy with the soft money delusion with which Maine has been afflicted.—*Phila. Record.*

Ex-State Treasurer Mackey Dead.

Robert W. Mackey, ex-State Treasurer of Pennsylvania, and for years past a prominent Republican politician, died at his residence in Philadelphia, on Thursday, Jan. 2nd, of consumption, aged 41 years. He was born in Pittsburgh, attended the schools of that city, and in the Western University and became a bank clerk, and afterwards Vice President of the Allegheny Bank. From a boy he was noted as a sharp, shrewd politician. He became a Congressman, and in 1869 was elected State Treasurer by the Republican Legislature. In 1870 he was defeated for the same position by a coalition of the Democrats and Greenbackers, but was again elected in 1874, and in 1875 he was re-elected for two years. He amassed a large fortune, removed to an elegant mansion which he purchased in Philadelphia, and resided there until his death. He never married. For a time he owned a controlling interest in the Pittsburgh Commercial, but sold out in 1877. He tried to displace Collier as President of the Commercial, but failed. He was a large stockholder of the Continental Street Railway Company, and a director of the People's Bank. Up to the hour of his final prostration he was one of the active leaders of the Republican party in the State.

Mr. Mackey was a member of the commission appointed to look after Republican interests in Florida during the late Reconstruction. He was a member of the Senate of the United States for Tilden and Hayes. He had been suffering from hemorrhages for a long time, and his death was not unexpected.

Norman Marriages.

WASHINGTON, January 6.—A decision was rendered this afternoon by the United States Supreme Court in the case of George Reynolds against the United States, brought here by appeal from the Supreme Court of Utah. This case involves the whole question of polygamy in the territories and constitutionality of the laws passed by Congress for its suppression. Reynolds was indicted by the grand jury for contracting a bigamous marriage in the territory of Utah, and was convicted in the lower court, but upon the main question—the constitutionality of the act of Congress prohibiting polygamous marriages in Utah and that such laws are constitutional.

The case arose upon a writ of error, the plaintiff pleading the unconstitutionality of the law prohibiting bigamous marriages, the justification of religious belief and various important legal technicalities. The case is a long and carefully prepared opinion, delivered by the Chief Justice, holds that polygamy is not under the protection of the clause of the Federal Constitution which prohibits interference with religious belief. The plea of religious conviction is not a valid defense; that Congress did not step outside the limits of its constitutional powers in passing laws for the suppression of polygamy; and that the judgment of the Supreme Court of that territory must be affirmed. Justice Fields dissented as far as related to the admission of certain evidence introduced in the lower court, but upon the main question—the constitutionality of the act of Congress prohibiting polygamous marriages—there was perfect unanimity.

TEACHER'S INSTITUTE.

The Columbia County Teacher's Institute met on Tuesday at 9 o'clock, at the Normal School, Bloomsburg, Pa., Dec. 23, 1878, to hold its annual session. The Chairman, W. H. Snyder, called the institute to order at 2 o'clock p.m. Devotional exercises were conducted by Prof. Curran, of Bloomsburg.

After a song of praise by the institute, Joseph Garrison, and Miss C. B. Welliver were elected, Secretaries. Prof. Waller, Principal of the Normal School, delivered an address of welcome, replete with good things, to the teachers, and was followed by Messrs. Cramer, of Lewisburg, J. G. Brown, Prof. Noetting, and S. N. Walker, of Bloomsburg, in impromptu speeches pertinent to the occasion. Prof. Curran read a very elaborate and interesting paper on the natural sciences. After registering the names of ninety-two teachers, the institute decided by a majority of thirty-three of its members to hold no sessions on Christmas day. Afternoon session closed with singing by the institute and the benediction by Prof. Manhart. Adjourned to meet at 9 o'clock on Tuesday morning.

MORNING SESSION.

Tuesday Dec. 24. Roll called and work resumed. Institute opened with reading of scriptures and prayer by Prof. Manhart. Singing by the institute. Prof. Cramer of Lewisburg occupied the hour on "Language Lessons." He considered the study of language under three distinct heads. First, discovery, second, grammar, third, rhetoric. First lessons should be conversational as talking proceeds the reading or writing of language. As thought is not characteristic of children, but rather action, hence, first lessons should not involve scientific rules. The conversation of the parent and teacher, should be the model for the child, and all his mistakes should be corrected without giving rules as a reason. The teacher's motto should be, "Whatever you do, do well." (Recess.)

After recess Prof. Noetting dwelt upon "Primary Reading." He regards primary teaching as more important than all other teaching, and should receive the most careful attention. He advocates the word method in teaching the alphabet, and emphatically discards the old method of teaching the names of the letters first. Pronunciation is the first step in primary reading. After teaching the child a number of words, then teach the sound of the letters. He should be taught to read just as he talks, and to get the real meaning expressed by the words. Teach him nothing that he is able to find out himself.

The teacher should print the lesson upon the board, that the child may be aided in the formation of the letters. He should be required to print the lessons first and afterward to write them upon his slate. By this process, he is taught spelling, writing, and natural language at the same time.

Mr. Snyder, after speaking of some mistakes he had observed in conducting reading exercises, urged upon the teachers the importance of teaching local geography. He asserted that directors could not spend money to better advantage, than in furnishing their schools with maps of the townships and counties of Pennsylvania. After singing, institute adjourned to meet at 11 o'clock.

AFTERNOON SESSION.

Institute met as per adjournment. After roll call and singing, Prof. Cramer resumed the subject of "Language Lessons." Commencing with a sentence he would observe the following outline. 1st. Define a sentence. 2nd. Its logical divisions, 3rd its classification. 4th. The analysis of a sentence into the words of which it is composed. This lesson the instructor would give to pupils farther advanced, than those to whom his first lesson was directed. He would not discard the use of text books, but would assign lessons therefrom, and hold the pupil to his work.

An interesting class drill exercise in reading was conducted by Mr. W. E. Smith of Berwick. He spoke of two points that was essentially necessary to good reading. First, the pupil must thoroughly understand what he is to read. Secondly, he must be interested in the subject. To vary the monotony of the drill, Prof. Cramer, assisted by Miss C. B. Welliver and Miss Lena Fausch of Bloomsburg brought a class of young pupils from their department, before the institute. They sang very prettily the children's favorite song:

O dear! what would the nation be
O dear! what would the people be
O dear! what would the children be
Without the primary school.

Their marching and gymnastic exercises were very good for children so young and not accustomed to appear before public audiences. Song, "Hold the Fort," by the institute. (Recess.)

After recess, Prof. Noetting resumed the subject of Primary Reading, occupying a part of the hour in showing how this important branch can be successfully taught from Monroe's Primary Charts. He would have the teacher require the pupil to read thought rather than words. Prayer was offered by Mr. J. E. Deitrich, after which the institute adjourned to meet at 7 o'clock in the evening.

EVENING SESSION.

The Chairman called the institute to order at 9 o'clock. Devotional exercises conducted by Prof. Waller, singing by the institute and choir. Roll called and new names registered. The following telegram received by the chairman was read to the institute.

The choir sang two more beautiful songs, the one entitled, "The Fort Traveller," a humorous melody of the hour, "The Wonderful Story," a beautiful sacred song, both of which were highly appreciated by the audience. The Chairman on behalf of the institute, thanked the choir for their music, and gave them an invitation to return again on Thursday evening. Adjourned to meet on Thursday morning at 9 o'clock.

MORNING SESSION.

Thursday, Dec. 26.—Institute called to order at 9 o'clock. Devotional exercises conducted by Prof. Waller, singing by the institute and choir. Roll called and new names registered. The following telegram received by the chairman was read to the institute.

Two hundred teachers assembled at Clarion, Pa., Dec. 25, 1878, to County Superintendent.

Two hundred teachers assembled at Clarion, Pa., Dec. 25, 1878, to County Superintendent.

Two hundred teachers assembled at Clarion, Pa., Dec. 25, 1878, to County Superintendent.

Two hundred teachers assembled at Clarion, Pa., Dec. 25, 1878, to County Superintendent.

REPLY.

BLOOMSBURG, PA., Dec. 26, 1878.

To County Superintendent:

A hundred and fifty teachers of Columbia County assembled at Bloomsburg, to send greetings and compliments to the teachers of Clarion county, Pa.

W. H. SNYDER.

Prof. Cramer occupied the first hour of the morning in giving his method of teaching English Grammar.

He stated that language lessons are not to take the place of grammar, and only enough of that science should be introduced to show the elements of which sentences are composed.

The time, at which, pupils should begin the study of grammar, is determined by their capacity and degree of culture.

All truths of grammar should be presented in their logical order, and illustrative examples selected from the best literature should always be given. These remarks were followed with instrumental music by Prof. Hoffman.

The subject of history was then brought before the institute, by Prof. Waller. He stated the object of teaching it in our common schools; also the method by which many of the difficulties attending this study could be obviated. Instruction on phonography and mnemonics, their uses as applied to dates and other numbers, was given by Prof. Walker. Adjourned to meet at 11 o'clock.

AFTERNOON SESSION.

Institute called to order at half past one o'clock. A committee on permanent certificates, was voted for, after which it was decided to adjourn to the Normal School, at Bloomsburg, and not at Orangeville, as had been proposed. Roll called, and singing by the institute followed. An article on Natural Sciences in the public schools, was then read by Prof. Harrison of Orangeville, in which he presented much truth and good advice to the teachers. This was followed by Miss Armstrong briefly stating her method of teaching botany. Col. Ames of Lancaster was then introduced. His brief remarks were succeeded with instrumental music by Prof. Hoffman.

Institute called to order. The committee appointed to count the votes on permanent certificates reported, Miss Amelia Armstrong, W. E. Smith, Francis Herring, J. E. Schooner, F. B. Miller, elected, Miss E. Jones, Mrs. J. E. Schooner, and J. S. Grimes, being the three having the next highest number of votes, were appointed a committee on resolutions. Prof. Schuyler of Lewisburg Academy, then entertained the Institute for a short time by a talk on the changes made in the form of the English language.

The Burial of Moses, by Mrs. C. F. Alexander, was then recited, by Miss Hilda Baker of Syracuse, N. Y. Miss Baker rendered this piece with great acceptability to the audience.

Remarks of Prof. Waller, showing plainly that the work of teaching requires special preparation, and that the Normal School affords ample opportunity for such preparation, closed the afternoon session.

EVENING SESSION.

Institute convened at 7 o'clock. An Anthem entitled, "For God we Loved the World," was sung by the M. E. Church choir.

A poem, entitled, "The Last Hymn," was then recited by Miss Baker. During the recital of this poem, breathless silence reigned in the room. Every eye was intensely fixed on the speaker, and every ear was drinking in each syllable and word as it fell from the lips of one, who was so faithfully portraying the last scene of the dying martyr, sinking beneath the mighty waves.

Song, "My Redeemer," by the Choir. Col. Ames was then introduced and he presented his subject, "Boys," completely captivated the audience. We know many who wanted to hear more about this, "most remarkable of all creations," this, "Natural curiosity," "The Boy." We cannot do justice in trying to describe the lecture, and think only those who heard it can properly appreciate it. Song, "Laugh Boys Laugh," was sung by the Choir, and applauded by the institute.

A very little Boys Composition on Teeth, was very nicely read by Miss Baker. Another song, entitled the "Sleighbell Party," was sung by the Choir, after which the institute adjourned to meet at 9 o'clock a. m.

Friday, Dec. 27. Institute called to order at 9 o'clock. Roll called, and devotional exercises conducted by Prof. Manhart.

Song, "Holy Spirit, Faithful Guide," sung by the institute.

The subject of Pronunciation, was then presented by Prof. Cramer. He thinks pronunciation a very important part of the study of any language, and that it may be so used by observing three points which he gave in short. 1st. Sounds. 2nd. Syllabication. 3rd. Accent and a careful study of the dictionary.

An exercise in Penmanship, was then conducted by Prof. Philson. He believed in commencing with principles, favoring the specimen system which he thinks is the most concise.

Prof. Schooner conducted a class drill exercise in geography giving his method of teaching this important branch. He would combine map drawing with the study, and at every lesson, review some part of the work already gone over. Recess.

After the institute was called to order, Prof. Barch of Shenandoah, introduced the subject of Arithmetic. He earnestly urged the teachers not to teach too much; but to have the pupils thoroughly understand the first principles of science, before having text books placed in their hands. He then spoke of the Normal School and the necessity of all teachers obtaining instruction in such an institution. Mr. Beckly kindly thanked the speaker for his earnest appeal in behalf of our Normal School. He spoke of its superior advantages over kindred institutions, and called special attention to the ability of its present faculty. Mr. Boal, County Superintendent, of Northumberland county, was introduced to the institute, and talked very earnestly for five minutes on the subject of "Wastes." Mr. J. L. Henderson and J. C. Brown also made brief addresses which were applauded by the institute.

The committee on resolutions then made the following report:

WHEREAS, We the teachers of Columbia county, deem it our duty to use every means within our reach to improve ourselves in our calling;

WHEREAS, We consider Teachers' Institutes conducive to this end;

Resolved, That we believe it right for school directors to allow institute time but that teachers should attend whether the time be allowed or not.

Resolved, That it is an encouraging sign of the times that the number of directors who allow institute time and the number of teachers who avail themselves of the benefits afforded by institutes are gradually increasing.

Resolved, That the Secretary of the convention should be remunerated for his arduous labors.

Resolved, That we will continue to sustain our Superintendent in his endeavors to promote the interests of education by raising the standard of the schools throughout the county.

Resolved, That it is desirable that the minutes of institutes be hereafter published in pamphlet form.

Resolved, That our sincere thanks be tendered to the Trustees of the Normal School for the use of their large and commodious hall, also to the citizens of Bloomsburg for their kind hospitality, to instructors and all who have in any way contributed to the success of the institute.

Resolved, That our sincere thanks be tendered to the M. E. Church of Bloomsburg for their well rendered music which was so acceptable to the institute.

The following memorial resolutions were also adopted:

Resolved, That in the absence of Miss Emily Clark of Catawissa, the teachers of Columbia county sustained the loss of one who by over twenty years' experience and devotedness to the work of teaching, under the depression of an incurable disease, and always exemplifying a noble christian spirit honored and endeared our profession.

Resolved, That in the removal by death of our former fellow worker, Miss Kate Rietz, our hearts are sorely grieved, and we tender our sympathies to the family of the deceased in their bereavement.

J. S. GRIMES,
E. JONES,
E. SCHOOVER,
Committee.

JOSEPH GARRISON,
MISS C. B. WELLIVER,
Secretaries.

BENEFITERS.

When a board of eminent physicians and chemists announced the discovery that by combining some well known valuable remedies the most wonderful medicine was produced, which would cure such a wide range of diseases that most all other remedies could be dispensed with, many were sceptical; but proof of its merits by actual trial has dispelled all doubt, and its discovery is an honor and blessing to all as beneficiaries.

LINDSEY'S BLOOD SEARCHER

For Rheumatism, Gout, Gravel, Dropsy, Scalding, Erysipelas, Ulcers, Pimples, Eruptions, Skin Diseases, and all Affections of the Blood. It is a powerful purifier and cleanser of the blood, and will cure all diseases of the blood, and all diseases of the skin, and all diseases of the system, and all diseases of the organs, and all diseases of the senses, and all diseases of the mind, and all diseases of the soul, and all diseases of the body, and all diseases of the spirit, and all diseases of the flesh, and all diseases of the bone, and all diseases of the marrow, and all diseases of the sinews, and all diseases of the tendons, and all diseases of the ligaments, and all diseases of the cartilages, and all diseases of the joints, and all diseases of the muscles, and all diseases of the nerves, and all diseases of the vessels, and all diseases of the organs, and all diseases of the senses, and all diseases of the mind, and all diseases of the soul, and all diseases of the body, and all diseases of the spirit, and all diseases of the flesh, and all diseases of the bone, and all diseases of the marrow, and all diseases of the sinews, and all diseases of the tendons, and all diseases of the ligaments, and all diseases of the cartilages, and all diseases of the joints, and all diseases of the muscles, and all diseases of the nerves, and all diseases of the vessels, and all diseases of the organs, and all diseases of the senses, and all diseases of the mind, and all diseases of the soul, and all diseases of the body, and all diseases of the spirit, and all diseases of the flesh, and all diseases of the bone, and all diseases of the marrow, and all diseases of the sinews, and all diseases of the tendons, and all diseases of the ligaments, and all diseases of the cartilages, and all diseases of the joints, and all diseases of the muscles, and all diseases of the nerves, and all diseases of the vessels, and all diseases of the organs, and all diseases of the senses, and all diseases of the mind, and all diseases of the soul, and all diseases of the body, and all diseases of the spirit, and all diseases of the flesh, and all diseases of the bone, and all diseases of the marrow, and all diseases of the sinews, and all diseases of the tendons, and all diseases of the ligaments, and all diseases of the cartilages, and all diseases of the joints, and all diseases of the muscles, and all diseases of the nerves, and all diseases of the vessels, and all diseases of the organs, and all diseases of the senses, and all diseases of the mind, and all diseases of the soul, and all diseases of the body, and all diseases of the spirit, and all diseases of the flesh, and all diseases of the bone, and all diseases of the marrow, and all diseases of the sinews, and all diseases of the tendons, and all diseases of the ligaments, and all diseases of the cartilages, and all diseases of the joints, and all diseases of the muscles, and all diseases of the nerves, and all diseases of the vessels, and all diseases of the organs, and all diseases of the senses, and all diseases of the mind, and all diseases of the soul, and all diseases of the body, and all diseases of the spirit, and all diseases of the flesh, and all diseases of the bone, and all diseases of the marrow, and all diseases of the sinews, and all diseases of the tendons, and all diseases of the ligaments, and all diseases of the cartilages, and all diseases of the joints, and all diseases of the muscles, and all diseases of the nerves, and all diseases of the vessels, and all diseases of the organs, and all diseases of the senses, and all diseases of the mind, and all diseases of the soul, and all diseases of the body, and all diseases of the spirit, and all diseases of the flesh, and all diseases of the bone, and all diseases of the marrow, and all diseases of the sinews, and all diseases of the tendons, and all diseases of the ligaments, and all diseases of the cartilages, and all diseases of the joints, and all diseases of the muscles, and all diseases of the nerves, and all diseases of the vessels, and all diseases of the organs, and all diseases of the senses, and all diseases of the mind, and all diseases of the soul, and all diseases of the body, and all diseases of the spirit, and all diseases of the flesh, and all diseases of the bone, and all diseases of the marrow, and all diseases of the sinews, and all diseases of the tendons, and all diseases of the ligaments, and all diseases of the cartilages, and all diseases of the joints, and all diseases of the muscles, and all diseases of the nerves, and all diseases of the vessels, and all diseases of the organs, and all diseases of the senses, and all diseases of the mind, and all diseases of the soul, and all diseases of the body, and all diseases of the spirit, and all diseases of the flesh, and all diseases of the bone, and all diseases of the marrow, and all diseases of the sinews, and all diseases of the tendons, and all diseases of the ligaments, and all diseases of the cartilages, and all diseases of the joints, and all diseases of the muscles, and all diseases of the nerves, and all diseases of the vessels, and all diseases of the organs, and all diseases of the senses, and all diseases of the mind, and all diseases of the soul, and all diseases of the body, and all diseases of the spirit, and all diseases of the flesh, and all diseases of the bone, and all diseases of the marrow, and all diseases of the sinews, and all diseases of the tendons, and all diseases of the ligaments, and all diseases of the cartilages, and all diseases of the joints, and all diseases of the muscles, and all diseases of the nerves, and all diseases of the vessels, and all diseases of the organs, and all diseases of the senses, and all diseases of the mind, and all diseases of the soul, and all diseases of the body, and all diseases of the spirit, and all diseases of the flesh, and all diseases of the bone, and all diseases of the marrow, and all diseases of the sinews, and all diseases of the tendons, and all diseases of the ligaments, and all diseases of the cartilages, and all diseases of the joints, and all diseases of the muscles, and all diseases of the nerves, and all diseases of the vessels, and all diseases of the organs, and all diseases of the senses, and all diseases of the mind, and all diseases of the soul, and all diseases of the body, and all diseases of the spirit, and all diseases of the flesh, and all diseases of the bone, and all diseases of the marrow, and all diseases of the sinews, and all diseases of the tendons, and all diseases of the ligaments, and all diseases of the cartilages, and all diseases of the joints, and all diseases of the muscles, and all diseases of the nerves, and all diseases of the vessels, and all diseases of the organs, and all diseases of the senses, and all diseases of the mind, and all diseases of the soul, and all diseases of the body, and all diseases of the spirit, and all diseases of the flesh, and all diseases of the bone, and all diseases of the marrow, and all diseases of the sinews, and all diseases of the tendons, and all diseases of the ligaments, and all diseases of the cartilages, and all diseases of the joints, and all diseases of the muscles, and all diseases of the nerves, and all diseases of the vessels, and all diseases of the organs, and all diseases of the senses, and all diseases of the mind, and all diseases of the soul, and all diseases of the body, and all diseases of the spirit, and all diseases of the flesh, and all diseases of the bone, and all diseases of the marrow, and all diseases of the sinews, and all diseases of the tendons, and all diseases of the ligaments, and all diseases of the cartilages, and all diseases of the joints, and all diseases of the muscles, and all diseases of the nerves, and all diseases of the vessels, and all diseases of the organs, and all diseases of the senses, and all diseases of the mind, and all diseases of the soul, and all diseases of the body, and all diseases of the spirit, and all diseases of the flesh, and all diseases of the bone, and all diseases of the marrow, and all diseases of the sinews, and all diseases of the tendons, and all diseases of the ligaments, and all diseases of the cartilages, and all diseases of the joints, and all diseases of the muscles, and all diseases of the nerves, and all diseases of the vessels, and all diseases of the organs, and all diseases of the senses, and all diseases of the mind, and all diseases of the soul, and all diseases of the body, and all diseases of the spirit, and all diseases of the flesh, and all diseases of the bone, and all diseases of the marrow, and all diseases of the sinews, and all diseases of the tendons, and all diseases of the ligaments, and all diseases of the cartilages, and all diseases of the joints, and all diseases of the muscles, and all diseases of the nerves, and all diseases of the vessels, and all diseases of the organs, and all diseases of the senses, and all diseases of the mind, and all diseases of the soul, and all diseases of the body, and all diseases of the spirit, and all diseases of the flesh, and all diseases of the bone, and all diseases of the marrow, and all diseases of the sinews, and all diseases of the tendons, and all diseases of the ligaments, and all diseases of the cartilages, and all diseases of the joints, and all diseases of the muscles, and all diseases of the nerves, and all diseases of the vessels, and all diseases of the organs, and all diseases of the senses, and all diseases of the mind, and all diseases of the soul, and all diseases of the body, and all diseases of the spirit, and all diseases of the flesh, and all diseases of the bone, and all diseases of the marrow, and all diseases of the sinews, and all diseases of the tendons, and all diseases of the ligaments, and all diseases of the cartilages, and all diseases of the joints, and all diseases of the muscles, and all diseases of the nerves, and all diseases of the vessels, and all diseases of the organs, and all diseases of the senses, and all diseases of the mind, and all diseases of the soul, and all diseases of the body, and all diseases of the spirit, and all diseases of the flesh, and all diseases of the bone, and all diseases of the marrow, and all diseases of the sinews, and all diseases of the tendons, and all diseases of the ligaments, and all diseases of the cartilages, and all diseases of the joints, and all diseases of the muscles, and all diseases of the nerves, and all diseases of the vessels, and all diseases of the organs, and all diseases of the senses, and all diseases of the mind, and all diseases of the soul, and all diseases of the body, and all diseases of the spirit, and all diseases of the flesh, and all diseases of the bone, and all diseases of the marrow, and all diseases of the sinews, and all diseases of the tendons, and all diseases of the ligaments, and all diseases of the cartilages, and all diseases of the joints, and all diseases of the muscles, and all diseases of the nerves, and all diseases of the vessels, and all diseases of the organs, and all diseases of the senses, and all diseases of the mind, and all diseases of the soul, and all diseases of the body, and all diseases of the spirit, and all diseases of the flesh, and all diseases of the bone, and all diseases of the marrow, and all diseases of the sinews, and all diseases of the tendons, and all diseases of the ligaments, and all diseases of the cartilages, and all diseases of the joints, and all diseases of the muscles, and all diseases of the nerves, and all diseases of the vessels, and all diseases of the organs, and all diseases of the senses, and all diseases of the mind, and all diseases of the soul, and all diseases of the body, and all diseases of the spirit, and all diseases of the flesh, and all diseases of the bone, and all diseases of the marrow, and all diseases of the sinews, and all diseases of the tendons, and all diseases of the ligaments, and all diseases of the cartilages, and all diseases of the joints, and all diseases of the muscles, and all diseases of the nerves, and all diseases of the vessels, and all diseases of the organs, and all diseases of the senses, and all diseases of the mind, and all diseases of the soul, and all diseases of the body, and all diseases of the spirit, and all diseases of the flesh, and all diseases of the bone, and all diseases of the marrow, and all diseases of the sinews, and all diseases of the tendons, and all diseases of the ligaments, and all diseases of the cartilages, and all diseases of the joints, and all diseases of the muscles, and all diseases of the nerves, and all diseases of the vessels, and all diseases of the organs, and all diseases of the senses, and all diseases of the mind, and all diseases of the soul, and all diseases of the body, and all diseases of the spirit, and all diseases of the flesh, and all diseases of the bone, and all diseases of the marrow, and all diseases of the sinews, and all diseases of the tendons, and all diseases of the ligaments, and all diseases of the cartilages, and all diseases of the joints, and all diseases of the muscles, and all diseases of the nerves, and all diseases of the vessels, and all diseases of the organs, and all diseases of the senses, and all diseases of the mind, and all diseases of the soul, and all diseases of the body, and all diseases of the spirit, and all diseases of the flesh, and all diseases of the bone, and all diseases of the marrow, and all diseases of the sinews, and all diseases of the tendons, and all diseases of the ligaments, and all diseases of the cartilages, and all diseases of the joints, and all diseases of the muscles, and all diseases of the nerves, and all diseases of the vessels, and all diseases of the organs, and all diseases of the senses, and all diseases of the mind,
