USEFUL TO KNOW.

A GOOD CEMENT.-Any fibrous material can be stuck to metal, whether iron or other metal, by any amalgam composed of good glue dissolved in hot vinegar with one third through the winter months. After they are of its volume in white pine pitch, also hot. two and a half years old commence feeding This composition, it is said, will give a sure corn winter and summer until I send them and certain result.

To CLEAN WHITE KNITTED GARMENTS. keep them improving from the time they - Take those not needing washing, being are led on corn to the time they leave the only slightly soiled, place them in a pillow farm. Generally feed from eight to twelve case one at a time, sprinkle flour through it, and shake well, until it looks as bright as feed a year younger, and send one year soonnew. Borax is excellent to wash flannel or to market. Think I can get my steers with dissolved in lukewarm water.

PREPARING FOOD FOR INVALIDS.-A very simple and expeditious way of cooking a little bit of chicken or fish for a sick person is to butter a paper thickly, place the food to be cooked in the paper, and place it on the gridiron over a clear fire. A very short time suffices to cook it thoroughly, and I have often found that to be eaten when all keepers was successfully performed at a other modes of invalid cookery bave been Cincinnati grocery the other evening. A tried in vain.

RUSSIAN SABLE. - This is the most costly and exclusive of furs, and cannot, therefore, strictly speaking, be called fashionable. In Russia it is used only by the Imperial family and the nobility, and very few skirs from an animal of the weasel family, about the size of the German marten; and at least "crown" sable is valued at from \$200 to

GOOD COFFEE.-The editor of Truth says ceipt; Put the ground coffee in a saucepan boils throw in a few dops of cold water and take the pot off; strain the concotion through a piece of muslin, and you will have better coffee than is produced by the most complicated and costly patent mi-

MARSHMALLOW PASTE OR DROPS .-Marshmallow root, four ounces of water, half gallon; macerate twelve hours, strain and evaporate to the thickness of honey, constantly stirring, and add gradually the whites of twelve eggs, well beaten, with orange flour water four ounces well strained:

THE BEST FISH BALLS .- On the moreing you intend having them, pare your potatoes and boil; drain off the water, and cover with a clean towel to dry. First. though, boil your codfish till done, then pul to shreds, carefully feeling for every bonand lump. Mash the potatoes very finely. pour in a little warm milk and a small lum; of butter; beat up your potatoes till they are as light as down, then mix with your fish, and work all together thoroughly. A small raw onion chopped very finely mixed through, gives a flavor which many personlike; no pepper nor egg. When ready, roll into small cakes lightly, and fry a delicate brown. The particular part is to have your potatoes quite soft with the milk, and fish with not the smallest lump.

How to CLEAN BRASS AND COPPER. The following mixture will be found the best thing for cleaning brass, coppe., tio, stair rods, taps, and even windows, and it is quite worth the trouble of making once a year, as the quantities I give will last that time, and the pest way is to store it in wide-mouthed pickle jars of glass or stone 1 pound whitening, 1 pound rotten stone, 1 nearly cold add half a pint of spirits of turpentine. When you use it put very littleon a rag, and rub the article you wish to clean well with it until it becomes bright, and then polish with a leather dipped in brick it soon tarnishes, but Bath brick preserves the polish.

Onions on Muck Land-

At a recent meeting of the Elmira, (N. Y.) Farmer's Club a correspondent to raising onions on muck land. President muck being favorable to a good crop ofonions Orange county which is famous for its on ion crop, employs much mucky land for this purpose. The yield sometimes gained is as high as 1,200 bushels per acre. Onions must be thick in rows to give good crops. I was informed by farmers in Orange county that the proper distance apart for rows was about fifteen inches, and that the onions should stand in rows so thickly that the breadth of three should be crowded into the space for two. As for example, suppose the full grown onion should have a dimaeter each of three inches, then three of these onions should stand six inches in the length of the row, making one and a half in the space measured by the diameter of one. Of course they crowd out in growth, but this thick setting is necessary to get the maximum crop, and the ground must be strong enough to support such growth if there is to be profit.

Disease Among Poultry

S. F. Larkin, of Aston, this county, wridisease has made its appearance among the chanticleer family of that neighborhood, that is entirely new in its effects. The symptoms are similar to those appearing in horses laboring under what is called "epizooty." The disease runs its course in a few days and has not proven fatal in any case where no remedy was attempted. Mr. Larkin in experimenting upon a remedy says: "But a little 'quacking,' however, among our own fowls bore the fruit of two deaths. To the first sick hen, two small pills of cayenne, made up with apple jelly and wheten 'tail ings' was given and she recovered. To another was given three of the same pills and she died the next day. To the third hen was recommended the heroic remedy of a teaspoonful of black peoper in lard, which laid her out in two minutes! By this time hen-doctoring became rather unpopular, and we allowed nature to practice on the remainder, and they all got well-a tolerably fair sample of medical practice among quacks." Mr. L. calls the disease "entozooty," and attributes the cause to a parisite,-Media Record.

Shrewdness and Ability.

Hop Bitters so freely advertised in all the papers, secular and regigious, are having a large sale, and are supplanting all other medicines. There is no denying the virtues of the Hop plant, and the proprietors of these Bitters have shown great shrewdobservation .- Exchange.

J. D. Gilbert, of Elkhart, Ill., who exhibited the fat prize ox at the fat cattle show held in Chicago, gives his mode of feeding youg animals as follows: "I feed my young cattle just enough to keep them [strong to market. Attend to them closely and months on corn. Intend from this time to at thirty months old to weigh 1,700 pounds. This course will pay much better than to keep them until 36 to 42 months, and get an average of 2,000 to 2,100 pounds out of the cattle.

How they Get Coffee in Cincinnati.

One of the latest tricks played upon shop woman entered and ordered a pound of the best coffee. She carried a jar under her arm, and when the groceryman was about to pour the coffee into a paper bag the customer told her to pour into the jar instead. The man did so, the female leaning over the leave that country. This fur is obtained counter and still holding the jar under her arm, with the bottom of the vessel concealed When she had received the coffee the female four or five skins are required to make a put her hand into her pocket, and with a muff of medium size. A muff and boa of well feigned expression of annoyance, cried: "I do declare, I have left my purse at home! I'll just set the jar of coffee down on the counter here while I run in and get the money.' She placed the jar on the counter there is nothing easier than making good and went out, but she failed to return, and coffee, and gives the following simple re- when the storekeeper picked up the jar he was surprised to find that it did not contain -two tea spoonsful for each cup-put the any coffee, and that the bottom had been saucepan on the fire ; just before the water knocked out. It then flashed upon his mind that when he poured the coffee in the jar it ran through into a bag concealed by the fe male sharper.

'They cannot all lie,' was the observation of one while reading the endless testimonials to Dr. Lindsey's Blood Searcher.' It is infallible.

Boys in the Mines.

Mine Inspector W. S. Jones, of the Scran ton district of the anthracite region, notes the fact that the victims of most of accicontinue the constant stirring till the mass is dents which have occurred in his district so firm as not to adhere to the fingers ; then this year are boys, seven having been killed dry in an oven, and divide in small masses, in all. It is a difficult matter to train a When finished it should be very light and lively buy to the requirements of the mine. Above ground he is generally permitted to follow the bent of his own wild will, but a romp under ground is frequently an invitation for death. The average boy cannot realize that as long as there is space to move about there can be so much danger, and be forgets the proximity of impregnable roofs and walls of anthracite when seized with the desire to jump on or off a moving car. Again, the inspector says that down in the 25c mine the boys are foot balls for everybody, and are sent on errands to the neglect of their own important duty, for the purpose of obliging those who assume the work of "bossing" them. It would be a very good thing to bring about those who compel boys to run on perilous messages to a realizing sense of their duty, and of the danger and responsibility involved in such acts of thoughtlessness. The lives and limbs of boys are as precious as those of men-and oftentimes a good deal more so-and if those who have supervision do not give them proper protection, the law should do it .-Pottsville Chronicle.

Curiosity of Physical Geography.

The Blue Mountain range that runs pound soft soap, I teacup full vinegar, as through Pennsylvania presents the singular much water as will make it a thick paste, circumstance of being divided by a river powdered Bath brick. Unless you use Bath twain at the Water Gap 27 miles further on. A large lake lies in a hollow in New Jersey, 27 miles from the Delaware.

A person starting from Honesdale, Wayne county, Pa., to drive to Bushkill, Pike county, will have a drive of sixty-two miles. It is 27 miles from Blooming Grove, Reach-Milford he will be twenty miles from Bloomfrom Litchfield, Mich., asked an opinion as ing Grove. At Dingman's he will be 49 miles from his starting place, and still 20 Hoffman replied that there can be no doubt miles from Blooming Grove. At the Delaware he is 54 miles from Honesdale, and Blooming Grove is 20 miles distant. At Bushkill, his destination, he is 62 miles from his starting point, and yet the finger board tells him that it is "To Blooming Grove twenty miles."

It is the greatest of mistakes, drugging the system with medicines to cure Kidney trouble while the application of a Day? Kidney Pad, to the small of the back will cure when nothing else can. Sold at the Peoples' Drug Store.

It you want to make a certain Virginia City merchant real mad ask him if he has a gravel mine to sell. He got to playing poker one day and won \$200, but he took in payment an undeveloped gravel mine. His friends teased him terribly about the alleged worthless property, and at last, getting a little excited, he told them that before he got through with that mine they would see that he was not such a fool as they took him for. Then he wrote to some rich acquaintances that he had a splendid claim, which, being hard up, he would sell cheap for \$2000. ting to the Germantown Telegraph, says a Then he bought \$500 worth of gold dust and nuggets, and salted the claim thoroughly with them. The capitalists came, prospect ed a little, bought it immediately, and paid him his \$2000 cash. In three weeks they got out \$8,000 worth of ore. That Virginia City man didn't smile for a month.

Peter what are you doing to that boy? asked a schoolmaster. 'He wanted to know if you take ten from seventeen how many will remain. I took ten of his apples to show him, and now he wants me to give 'em back.' 'Well, why don't you do it ?' Cos. sir, he would forget how many are left."

'Are you find of Hogg's Titles !" said a rather verdant lady to a shepherd, 'Yes, I like 'em roasted wi' salt on 'em,' was the response. 'No-but I mean have you read Hagg's Tales? 'Non,' said the bumbkin 'our hogs are all white or black-I don't think there is a red among 'em.'

Chicago workmen are said to be alarm ed at the break up of the Chinese in San Francisco. Chicago expects its Chinese population to be increased by at least one thousand within the next few months.

There is a great strike among the miners at Clearfield Nearly twenty-five hundred men are out, demanding an increase of wages.

A Penusylvania railroad locomotive reness and ability in compounding a Bitters, cently made a run of sixty miles between whose virtues are so palpable to every one's Jersey City and Trenton in forty-five min-
