number. They speedily not through with terr address at the White House, and were that to bays, with the declaration that by would not harber trespass upon the Another case of Fine Ready Made Cloth-ing just received at D. Lowenberg's.

HOW TO GET almost Everything.

Do you know how to get in the easiest way and to best advantage what you want for dress and house-furnishing? First, how: Write for a catalogue; see what you can learn from it about the things you want. If samples can be useful to you, ask for them and state your wants so plainly that exactly the right samples can be sent.

Second, where: The place where goods are kept in the greatest variety; where they are sold for what they really are in respect to quality; where prices are lowest; where most care is taken to serve customers acceptably; and where you have the right to return whatever is not satisfactory.

There-oo matter where you are---if you make your wants known and avail yourself of your privileges, you will get the hest things in the best way, promptly and without trouble or risk; sofuerimes by mail, sometimes hy express, almost always at less cost for carriage than the money you save in the price.

ment and insting benefit. Since an article is CARS DOLING, and, this many other would relate a tries, it is found to consist of elements almost in their mitrail state. Petroleum oil is the article which its microid to work such extraordinary results i but it is after it has been chemically treated and completely declorized that it is in proper condition for the follet. It was in faceoff Researcher the completely dealorized that it is in proper condition for the folict. It was in factor Russia that the effect of periodeum upon the hair was first observed, a Government officer inving noticed that a partially hald-headed screamt of his, when trimming the humps, had a habit of wideg his all-beamaned humbs in his senity locks, and the result was in a few months a matter of wideg his all-beamaned humps, had a habit of wideg his all-beamaned humps, have a start of his, when trimming the large work and tobes. This all was triad for horses and cartie that had hast their hair from the cartie plaque, and the result was that here work had before. This were as rapid as they were marvielous. These experiments were heralded to the work, bet the have leave the tails of horses, which had folice out, were coupletely re-stricted in a few works. These experiments were heralded to the work, bet the houseledge was prac-tically nodes to the promously half and gray, as no one in critical solution to house leave the start relating to the process known only the himself. In here, the assess theory chart has a datally reduced in a few works. The correlineants were coded in a scale accessing to the hand. But the still of one of our characteristic outly to himself, he has after very observation and cody experiments, out-coded in a scale accessing result as startily reduced in a scale activity model as a startily result of functions and short the next has and failing, give remarkable the another was the scale attaining results in the to most a start the most is a starting result of the work and the interval of a high part indiced in the two soles and the first actions with the adder in the the scale and the most is a starting result framework the the interval to the roots at more marked to be any short to the roots at more and setup a rate allocking from due start. It well knows that the most beaming at other to the roots at more and setup a rate allocking from the start. It is well knows that the most beaming at the start. It is well made from periodenia, and, by some mysteric operation of nature, the use of this article graeperation of nature, the use of this article gradu-nity imparts a beamful high-boown color to the heir which by continued use, the pens to a black-the other remains permanent for nation-finite length of time, and the change is so present at the most infinites friends can scatterly detect his progress. In a word, it is the most wonderful discovery of the use, and will calculated to make the prema-tarsky haid and gay replace.

We advise our readers to give is a trial, feeling estimated that any approaches call convence them of its wooderful selects. - Pittaburyh Connercust of ust. 22, 1975.
