Denis Kearney has gone back to his dray, but still finds time on an occasional Sunday to speak at the Sand Lots. On a recent Sunday that famous resort was occupied by two orators, who, from separate stands, held each other up to con-tempt and derision. One of these was C. C. O'Donnell, whoever he may be, and Kearney was the other. O'Donnell warned his hearers against the wiles of Kearney, who, he said, had organized a Greenback party in the interest of the Republicans. At a little distance Kear-ney defended himself as one who had courted danger and poverty, with a heart bleeding for the woes of the op-pressed poor. "It is because I love and feel for you and yours," that a restless and fevered brain kept my family and self in misery for three long years and more." The fact is that Kearney was remarkably comfortable and happy for three long years and more, as long as his friends were foolish enough to support him. Unless the San Francisco pa been blest to his oratory, for his language is far more decent and intelligible than it used to be, and he hadn't a word to say about lecherous bondholders. After all, San Francisco has good reason to be grateful to the Sand Lots, for they have ilways served the purpose of an excelvolume of steam has always been harmlessly blown off.

Outrageous Hazing.

An outrageous case of "hazing" has lately occurred at Syracuse, New York. Mr. E. S. Tripple, a freshman of the university, was bound, gaged, and drivshipped and scolloped, making a very close cut necessary as soon as he could get to a barber shop. The captors attempted to give him some nauseous compound as medicine, but he refused to take it. After this outrage the assailants got into their carriage, leaving Mr. Tripple still bound and gagged under the trees. After great efforts on his part he finally succeeded in releasing himself from his bonds, and, gaining the main road, ascertained where he was and walked back

An ingenious machine, called the "tell tale," has been introduced recently on the Eric Railroad. It registers the speed of trains, when and where they stop and how long. It is used especially for freight trains and is fastened at either end of small cabooses or at the side of large cabooses about four and a half feet from the floor. It was adopted because freight trains frequently exceeded the prescribed rate of speed. They would run very fast for some distance, and then take things comfortably for a time.
