Newspaper Directories are sometimes great onveniences, but they would be much mar atisfactory if they contained reliable informs tion as to the circulation of papers. In Howe.T. Directory for 1881, we find the paper i this county given a circulation "exceeding on iousand," when its actual issue is not half of havmenties. Another one is quoted as "no according one thousand." This is nearly corcet. It does not exceed a thousand, nor does t equal a thousand by six handred. If the remeta from other counties are as insecurate as om this, the directories simply mislend the copie ha whose information they are said t epublished. There is but one way to remed his defect and that is far the publishers to re me to give any circulation to papers, whose liters are unwiffing to make an affidavit as to he correctoes of their figures in answering it quiries on that point. It will not do to publish sworn statement as to one paper and allow : paper with a much smaller list to claim larger one. All should be treated alike. Those davits, if it is known that no other papers in the county will be permitted to claim a larger

## me without swearing to it. A little reform is needed by the Directories in this matter.

Mr. D. W. Smith, of Limestoneville, Montour county, says be has used an "Os-borne" Self-binder since 1879; has cut 160 acres; been at no expense for repairs; has as it was possible to be, and will wager the price of the machine that he can cut any grain that it is possible to cut with any machine, and hind it tighter and better than can be done by hand. T. W. Pursel, near Buck Horn, says the "Osborne" Self-binder ought last year, "hils the bill" and does all P. E. Maus, near Danville, says be cut the orst tangled oats he ever saw, hest year,

sith the "Osborne," and cannot speak too highly in its praise. HARMAN & HARREST, Agents, june 10 Bloomsburg, Pa.

BARBED WIRE

FENCES are undoubtedly the cheapest and most durable fence made, is no rffected by fire, wind or flood,does not cause snow drifts, takes fewer posts and stock cannot push i down. Our wire is four pointed is made of two strands of number 12 best galvanized steel wire twisted together just enough to allow for contraction and expansion in Summer and Winter, barbs are fastened every seven inches. The use of barbed wire is no longer an experiment, as last year over one hundred thousand miles were put up. We believe our wire to be the best and cheapest now manufactured because it is made of the best steel wire and runs 15 feet to the pound having the greatest strength and visibility with the least weight of any made. Put up on spools of about 100 rods weighing about 100 pounds, Price per pound 11 cents by the spool, less quantities 111 cents per pound.

TINSMITHING.

It does not seem to be generally understood by some of our trade that we are prepared to do Tinsmithing in all its branches, This we have often noticed by the expressions of surprise of many who, when in the rear of our store, noticed men working in an adjoining building. We carry a full stock of Tin and Tinsmith's Supplies and are prepared at all times to do all kinds of work. As low prices seem to be

the most popular we have

REDUCED THE PRICE OF
