What is known as the New York San cholers cure, is something that should be kept in every household in the land. If used at an early stage of any attack of cholera morbus, the core is almost infallible. In every household where there are children this remedy should be kept on hand. Following is the recipe: "Take equal parts of tincture of cayenne pepper, tincture of opium, tincture of rhubarb, essence of peppermint and spirits of camphor. Mix well. Dore, 16 to 30 drops in a little cold water, according to age and violence of symptoms, repeated every fifteen or twenty minutes until relief is obtained."
