Surring the Soil.

There are many farmers and gardeners who seld in stir the soil about their plants except when it is absolutely nee. of human insects. With a contempt for essary for the purpose of destroying the looking glass he brushes bimself up weeds. Acration or exposure of the soil to the action of the air, is often of much importance, in order to secure a full development of all cultivated plants; and this is as much a part of cultivation as the archive. the subduing of weeds. The husband, syrup and butter and cream, he passes man is not satisfied even with a natural out of the dining room and wings his man is not satisfied even with a natural growth in cultivated plants, but seeks an abnormal growth in the whole or in the morning glories climb, and in this rethose parts of plants designed for his tired spot, heedless of the crafty spider use or that of his animals. He does not, that is practicing gymnastics a few feet strictly speaking, follow nature, but en-deavors to improve upon her ways of sweeten himself for the refreshing repose doing things; consequently he plows, sows, cultivates, and forces plants to make an abnormal growth. We have known farmers who appeared to think that the less ploughing, beeing and stirring the soil about plants the better, provided a fair growth and middle legs, he throws his hind legs rapidly over his body, bending down his featly wings for an investment of the refreshing repose and soft dreams of the balmy summer night, so necessary to one who is expected to be early at breakfast. It is a wonderful toilette. Resting himself on his front and middle legs, he throws his hind legs rapidly over his body, bending down his featly wings for an investment of the refreshing repose and soft dreams of the balmy summer night, so necessary to one who is expected to be early at breakfast. It is a wonderful toilette. Resting himself on his front and middle legs, he throws his vided a fair return was secured for their down his frail wings for an instant with labor. But such men are usually satisfied with what others would consider a backward motion, which he repeats half crop, and it is needless to say that until they are bright and clean. Then he pushes the two legs along under the they find farming a poor business.

The best and most thorough farmers do not stir the soil too much or too often, either in preparing it for the reception throwing the legs out and rubbing them of crops or afterward. A single ploughing together to remove what he bas collected for wheat or other small grains is not enough in order to break up and thorse oughly pulverize the soil; and although head and middle legs, he raises his two a fair yield may be obtained under such systems, a far better one would be se- of his hind and shoulders, using his procured if the ground was turned over two or three times, and after each ploughing thoroughly harrowed. The old system of summer fallowing land, when ther oughly carried out, can scarcely be im ever committed suicide. Some of his oughly carried out, can scarcely be im proved upon in preparing land for either motions very much resemble those of winter or spring wheat. By ploughing two or three times during the summer, and harrowing after each turning, not only is the soil mixed and pulverized, but the weeds also are destroyed which usu The white cord is defiled, but floppy is himself again, and he bids the morning ally spring up whenever rich soil with its seeds is brought to the surface. Of course, land may be constantly cropped glories a very good evening. without rest, provided it is kept rich by the addition of fertilizers, but there are few farmers who can supply these in sufficient abundance to preserve the fertility, and for this, rotation of crops must be practised, or the land rested. Whatever system of cultivation is practiced, the farmer should manage to keep up the fertility of his land, and when-ever he finds his crops failing he may rest assured that a change is necessary. Sometimes deeper ploughing will pro-duce a marked improvement in fertility, but the subsoil, if brought to the sur-Hop Bitters .- Cincinnati Star. face, needs to be fully aerated and pulverized before it will be in good condition for the reception of seeds. In the cultivation of corn, potatoes,

and similar crops, stirring the soil among the plants can scarcely be repeated too frequently during the early part of the season, in fact, these operations may be continued until the crop is well on to and could take a No. 26 boot, though a No. 30 would be just the thing. The ball of the foot is just 19 inches around, ward maturity. Every time the plow or cultivator is run through the rows small weeds are destroyed, lumps broken up, and air and its accompanying moisture inches. This immense pedal adorns the admitted. The ground may be too wet for ploughing or stirring with culti-vators and hoes, but it is never too dry, because the more frequently these implements are used the more moisture will the soil absorb from the air. If any of our readers doubt this, let them try a small plat of ground during dry weather, stirring the soil every day, and leaving an adjoining plat undisturbed. The first will remain moist and sponge like, moist and sponge like, long after the other is as dry as dust, Price, 50 cents; trial bottles, 10 cents The same effect is produced in the frequently cultivated corn field, and a good crop can often be made in a dry season by the constant use of the plough and cultivator, when if they are not used, the plants would certainly perish. Many scientific reasons could be given

in addition the above for stirring and pulverizing the soil, but they all involve the one simple fact that stirring it frequently and thoroughly is extremely benefficial to the crops growing thereon. Just how long or late the farmer should continue the cultivation of his corn or potatoes is a matter for him to decide, but he need have no fear of doing such crops harm as long as the roots are not destroyed by the implement used among them, or the tops broken down the operation. The market gardeners near all of our larger cities seem to un derstand the importance of thorough and almost constant stirring of the soil about their plants; and whether there are weeds or not, the hoes and cultivators are kept going, and the enormous crops raised show that there is something in the management of soil, as well as in its natural or acquired fertility .-

HOW TO SAVE.

All men and women who work hard with mind or body are subject to peri-odical attacks of biliousness, which may end in disordered kidneys or liver and dangerous illness. A 50 cent or \$1.00 bottle of Parker's Ginger Tonic will keep these organs active, and by preventing the attack save you much sickness, loss of time and great expense Many families are kept in perfect health by using the Tonic when spring or fall sickness threatens. Delay at such times means danger.- Detroit Press. See other column.

Pennsytvania's Crops.

From the Pennsylvania State Agricul tural Report we glean the following statement of the crops of the State and

"Our State stands second in the corn producing States, on an average three years' yield, the first being Nebraska, nere is estimated. She is second, next erop of three years. She is third in the total value of all crops, taken for eight leading states, Illinois being the first and New York the second. She stands the fourth among eight large states in her wheat crop of three average years, and sixth in the total value of her wheat crop in money. This again proves very little as California's wheat crop stands highest on this list. Her potato crop is worth annually over six millions of dollars; her buckwheat crop nearly seven millions. Her hay crop is second only to that of New York, and was worth over thirtysix millions of dollars last year. By these estimates, Pennsylvania made the high est each product per acre out of eight greatest hay producing states. Tobacco, not much bragged about as a Pennsyl vania product, returned last year \$1 700,000, or a higher yield to the aere

than that of any other State." Monernan a Put. Once a gentleman who had the marvelous gift of shaping a great many things out of orange peel was displaying his abilities at a dinner party before Theodore Hook and Them as Hill, and succeeded in counterfeiting a pig to the admiration of the company Mr. Hill tried the same feat, and, after destroying and strewing the table with the peel of a dozen oranges, give it up with the exclamation, "Hang the pig! I can't make one." "Nay, Hill," exclaim ed Hook, glancing at the mess on the table, "you have done more; instead of one pig you have made a litter." The Totlet of the Fty.

TREMENDOUS TEST. Reasting Thirty Hears in a Bed of Red Hot Coals

Corning, N. Y., January 6, 31. Corning, N. Y., January 6, 81.

Morris & Ireland Boston, Mass.

Gentlemen:—On the night of the fire in our villinge on the 25th ult, I h d in use one of your No. 5 Safes. I am pleased to inform you, after the floor gave way it fell into the cellar, into a heap of burning coal, where it roosted for thirty hours. Our citizens and myself gave up the hore of anything being saved in it. On being taken from the runs I was happily disappointed to find my cash, vouchers and other articles of value perfectly preserved. The comoination works well now. I am satisfied your new and improved work, one of which, a No. 92, I have ordered of your agent to-day, will afford absolute protection in any fire.

Truly Yours, E. S. Barnes.

STILL AHEAD. Rochester, N. H., Dec. 10, '80.

Dear Sirs.—In the disastrous fire which took place in this town Nov. 30, the Morris and ireland sare in my store was subjected to a severe test, being thrown into the cellar and a huge mass of debit fell upon it, and it was in the rulins some two days. I take pleasure in Informing you that upon excassion it was opened without frouble and the contents were found to be unlajured. I cheerfully recommend your safe sales should I want another I should certainly purchase one from you.

Yours trefy. G. W. Hows.

Yours truly, STILL ANOTHER.

From the Great Fire in Troy, New York. Troy, N. Y., December 11, 1879.

Mewers, Morris & Ireland, Boston: Gentlemen:—After witnessing the charred books out of the sares opened, also one of my own which was another o axe. which was not in the heat of the fire like the No 6 lately purchased of you, which was in the fire over forey eight hears, and had to be continually played on ouring Monday right, as it was completely surrous ded with burning muslins and other inflamable material, on epening it in the ruins The day aftersoon, i was pleased to find the contents, books, papers and money were all preserved in a remarkarly good condition. With this proof of the fire qualities of your sate we have given your agent an order I role No. 8 safe.

Yours respectfully. Davis & Co.

THE GREAT

BOSTON FIRE. JANUARY, 1880. Morris & Ireland's Safe Again Triumphant-Messr Rice, Kendall & Cob. Large Safe Reveals Its Valuable contents Intert, after being sub-jected to Inten e heat for one Hundred and Thirty Hours.

Boston, January 2, 1880. Messrs, Morris & Ireland. Boston:

Messre, Morris & Ireland. Boston:

Gents:—On the hight of December 28, last, the building occupied to part by us at No. vi Federal street, and which was four stories high and about see feet deep, tanget fire and was destroyed, with all its contents, consusing of a very large stock of paper, book blinders' materials and only merchanize. While several other large buildings adjoining ours were burned at the same time, the stames were extragalacted the following day, but our stock contented to burn for days thereafter. After a day of two hours we were able to may our state day out from the ruins and opened, and were pleased to find all the contents well preserved. The safe contained our most valuable books, papers, policies, etc., and we now feel sure that our judgment was correct in buying one of your lastes, which we decided to do after a howing the wonderful record of your safes, in the great Boston fire of '12. We regard the protection of your lastes most remarkable, and this first a guaranty of its security to those who may wish to purchase.

Yours very truly, Hice, Kendala & Co,

Yours very truly, RICE, KENDALL & CO. Allo a Communication from Ex-Governor Alex. Rice.

MESSUS MORRIS & HRELAND.

Gents: I have made careful examination of the contents of the safe purchased of you some years since by the firm of like, Kendall & Co, and which was subject to the test of enormous heat in the great fire of last Sunday night. I report the security of the safe under the chromous heat in the great fire of last Sunday night. I report the security of the safe under the chromatances as more remarkable. None of its contents were barned, nor were any of them so injured by heat as to be materially damaged. I should commit any securities to your safe hereafter with additional confidence, With great respect, you's very truly.

Alexander H. Rice.

THE LATEST YET. BUT THE SAME RESULT.

BUT THE SAME RESULT.

No. Norridgewock, Me. Feb. 1, 1881.

Messus Morris & Ireland, Boston Mass.:

The safe 1 cought of you lest October was in a two-story wooden building, which buried Jan 28. The building took fire in the night, and the safe, building and its contents, fell into the cellar upon a pile of dry wood, making a hot fire which lasted for ten hours. The outside of the safe was leated red hot. It melted the handle and did off the door, the contents consisted of watches, je weiry, gilverware, books papers &c., all of which came out in good coadditon. Fapers lying against the inside of the safe were not injured. The safe shows for itself whint it is, and 1 feel weil satisfied with what has done. Please write what you can allow for it toward a new one, and oblige.

Hair Vigor, FOR RESTORING GRAY HAIR TO ITS NATURAL VITALITY AND COLOR.

It is a most agreeable dressing, which is at once harmless and effectual, for preserving the hair. It restores, with the gloss and freshness of youth, faded or gray, light, and red hair, to a rich brown, or deep black, as may be desired. By its use thin hair is thickened, and baldness often though not always cured. It checks falling of the bair immediately, and causes a new growth in all cases where the glands are not decayed; while to brashy, weak, or otherwise diseased hair, it imparts vitality and strength, and renders it pliable.

The Vigor cleanses the scalp, cures and prevents the formation of dandruff; and, by its cooling, stimulating, and soothing properties, it heals most if not all of the humors and diseases peculiar to the scalp, keeping it cool, clean, and soft, under which conditions diseases of the scalp and hair are impossible.

As a Dressing for Ladies' Hair

The Vigor is incomparable. It is color-

ical, contains neither oil nor dye, and will
