The Farm.

SECOEST ONS OF AND FOR THE SEASON.

From the American Agriculturist for August, With this month begins the fall work ring to a miner who had made his pile and the more promptly it is entered upon the better. The stubbles are now examining the ring, "they've got common tille, and they can be plowed at once for stone up in the diggins where I've been that'll cut that diamond all to pieces!"
of weeds, from ripening their seeds. Wheat requires a deep rich, and mellow soil. All the hard lumps should be broken up by the harrow and pulverized, using a field roller to aid in this work, if the harrow does not bring them fine. Bringing of the soil to a finer state is Bringing of the soil to a finer state is now recognized, and there are a great many "pulverizers" upon the market especially designed for this work. To those who cannot afford (or think they cannot) such an implement, the common those who cannot afford (or think they cannot) such an implement, the common harrow and a log roller will be sufficient, if used thoroughly to prepare the soil as a bed for the seed. The old method of broad cast sowing of wheat is fast being superseded by the superior one of drilling the grain. The drill secures uniformity of depth and by putting all the grains in a proper place for growth, there is a saving in the amount of seed used—six pecks of good plump grain—

used—six pecks of good plump grain—

cut and seratch the "diamond" with several ugly looking gashes. A group of passengers that had gathered about the miner were amazed, but while they smiled, the peddler with his diamond withdrew discomfitted. "That little piece of brown stone," explained the miner, "is a piece of corundum that I got on the Rocky Mountains and it's the best diamond tester in the world. It won't sear a genuine diamond, but will everlastingly cut up pieces of glass or quartz." nsed—six pecks of good plump grain— and no other should be used—is sufficient per nere, if sowed with a drill. Much depends upon the variety of seed sown, and the farmer should make a study of this matter, to determine which is the best kind of wheat for his soil and lo- and rheumatism, they prevail in almost cality. Early sowing is the best, except when there is danger from the Hessian positively no need for anybody to suffer Late sowed wheat makes such a from these painful troubles who can buy poor growth before the frosts come that a 50 cent bottle of Parker's Gingor Ton-a is not in good shape for winter, and it ic; for this superior medicine always s not sure of giving even a fair crop. tones up the stomach and nervous sys The preparation of the soil for rye is the same as for wheat, though it will do well carrying off the foul matter, thus leaving on a poorer soil than wheat. A soil a good foundation for perfect health.—that is rich enough for a good crop of N. O. Picayune. rye, can be made, in many cases, to produce a more paying crop by adding a dressing of 300 pounds of any good fertilizer, and sowing it to wheat. The value of rye straw in some localities may make the rye crop, grain and straw together, more profitable than even a good getter, more profitable than even a good the famous surgeon John Hunter. The crep of wheat. This only is the case the famous surgeon John Hunter. The near cities where the straw brings a high price. A number of crops may be grown the Bay of Biscay, and the Southern or fall fodder. White turnips may be English and Irish waters. The ancients sown this month, and in good soil, with proper care, 600 to 800 bushels of this is believed to use its extraordinary powers excellent food may be obtained per acre.
These roots need to be fed out rapidly, but if carefully stored will last until January. Millet, if sown early this extremeties, throwing the sand over its month, on rich soil, will make an excel- back. Tread on it then and you will be lent feed for late fall; and rye, sowed prone in a moment. It is sometimes sold now, if not needed for pasture, produce

The root crops,mangels and beets and field cabbages need frequent cultivation was permanently cured of a dangerous during this month, and until the leaves and protracted irregularity of the howels over the ground. If the weeds are allowed to grow, and the soil is left un- which at the same time restored her to stirred, the crop will be small. Sugar perfect health and strength.—The parents, beets are best if earthed up at the hoe. Rochester, N. Y. See another column. ings, so that the roots are entirely below - Buffalo Express. ground. Mangels do not require this "hilling up." Potatoes should be harvested just as soon as they are ripe, does seem impossible for me to make otherwise the tubers may start into a bo hends meet." "Well, then," said the new growth. They are much more apt to be affected by the "rot" if left long in the soil. If this "disease," which is a fungus growth, makes its appearance, the vines should all be burned so soon as the potatoes are dug, as the spores are thus destroyed in vast quantities. When other work is out of the way, much may be done to make the spring work lighter. Is a habit of riding a riding habit, or done to make the spring work lighter is a riding habit a habit of riding? by plowing in the fall. When this is lone early it is much like a fallow in its effect upon the soil-it kills the weeds, loosens the soil, and allows of chemical changes that make plant food available. Heavy clay soil is much improved by early fall plowing. Muck is a valuable material for the barnyard, stable and compost heap, and can be dug with the greatest case at this season of the year. It may be drawn from the bed to the beap near by, where it can dry out, and afterwards be taken to the place where it is to be stored for use. During the dry weather of this month drains can be dug with greater comfort and less expense than when the soil is full of water. The value of a drain depends upon the thoraughness with which the work is done. It should be a permanent improvement.

a fine growth for the spring seiling of

the farm stock.

There is the crop that the factor puts in the ground that pays him better than the turnip. We are aware that with some persons it is looked upon as of little account; but it has never received the consideration to which it is really entitled and those who turn up their neses at it are not genuine farmers. It is a crop, moreover, that is put in when the hurrying work of the season is over; when it occupies ground that has already been used for something else The cal tivation also, say of from one to two teres of ternips, involves comparatively The crop, too, is harvested in November, when there is almost no ther labor on the farm to interfere with As to the variety of seed to sow, we believe there is no turnip equal to the purple top. A topdressing of bone manure is almost indispensable to an abundant crop. For an early crop take the Early Flat Dutch and sow broadcast, and now is the time. The Purple Top for the regular farm crop. This should be when the turnips are the size of a hickory. nut thin out to eight or ten inches spart in the row. They seldem fail in affording a satisfactory crop. The crop can be put in the first balf of August. Where land is a little short, sow among the corn at the last working. They will not interfere in the least with that crop, generally, and very little when it is har Be sure always to procure seed from established seed houses of reputation, and use that grown here instead of in Europe if you wish the best and

An illustration of the value of revac cination is afforded by a report just fur hished by the chief medical officer of the Gere, al Post Office in England. This report ralates to an average number of 10,404 persons employed in the postal service in London, all of whom have been required to undergo revaccioation on admission to the service, unless that operation has been performed within seven years previously. Among these persons, during ten years 1870 1880, there has not been a single fatal case of small pox, and in only ten instances have there been non fatal attacks, all of which were of a very slight character. In the tele graph department, where the cufor e ment of revaccination has not been car ried out with quite the same complete ness, 12 cases have occurred in the same period among a staff averaging 1,458 in number. Eight of these attacks were of persons who had not been revaceinated, and one proved fatal. The remaining four were of revaceinated persons, who all perfectly recovered without patting. This experience, like that of the norses of the small-pox hospitals, seems to show that revaccinated persons enjoy absolut immunity from severe attacks of small pox, and that their risk of catching that disease at all, even in the most modified a form, is infinitesimal.

A correspondent tells of an amusing incident that occurred last week on a SIMMONS train that was crossing the Rocky Mout tains: "A travelling peddler undertool in the cars to sell a large "diamond LIVER REGULATOR.

Lock's Mill's, Oxford co , Me. Messrs. Mortis & Ireland;

Gen's;—On the Trad of November, 1819, our spool mill at his place, 20x6, two stories high, was fotally consumed by fire, in which there—as a large quantity of spool fumber, spoor a and blooks, all seasoned. The fire bursed for three as d a haff days, we had one of your sates in our mill and Tuesday norming following, eightly is the after the fire, it was too not to handle, being covered with burning blocks, some time after it was opened and the contents were in a good state of preservation, nor a book or paper being destroyed, and satisfied with your sates and have puchased another, and can cherituity recommend them to any one wishing to seeme their variables from being destroyed by fire.

Yours truly, I. G. Thurs,

TREMENDOUS TEST.

Roasting Thirty Hours in a Bed of Red Hot Coals Corning, N. Y., January 6, '81.

Morris & Ireland Boston, Mass.

Gentlemen:—On the night of the fire in our village on the 26th uit, I h d in use one of your No. 5 Safes. I am pleased to inform you, after the floor gave way it fell hot the cellar, into a heap of ourning coal, where it rossted for thirty hours, cur citizens and myself gave up the hore of anything being saved in it. On being taken from the ruins i was happily disappointed to find my cash, vouchers and other articles of value perietly preserved. The combination works well now. I am satisfied your new and improved work, one of which, a No. 20, I have ordered of your agent to-day, will afford absolute protectic in any bre.

Truly Yours.

E, S. Barnes. Corning, N. Y., January 6, '81.

Truly Yours, STILL AHEAD

Messrs, Morris & Ireland: Messrs. Morris & Ireland:

Dear Strs:—In the disastrous fire which took place in this town Nov. 30, the Morris and Ireland sare in my store was subjected to a severe test, being thrown into the ceilarand a huge mass of debring through into the ceilarand a huge mass of debring I take pleasure in historiang you that upon excass, I take pleasure in historiang you that upon excassion it was opened without frouble and the contents were found to be unlajured. I cheerfully recommend your safe safe sno-led want another I should certainly purchase one from you.

Your truly.

C. W. Howe. Yours truly,

> STILL ANOTHER. From the Great Fire in Troy, New York. Troy, N. Y., December 11, 1879.

Wester, Morris & Ireland, Boston:

Gentle men:—After witnessing the charred books out of the sarest-pener, also one of my own which was not in the heat of the fire take the No. 8 lately purchased of you, which was in the fire over forty-right boars, and had to be continued y played on during Monday right, as it was compartely surrounded with burning missilns as dother is flamable material, on spening it in the ruins free day. If urroun, I was pleased to find the contents, books, papers and a oney were all preserved in a remarkal by good condition. With this proof of the fire qualities of your safe we have given your agent an order for one No. 8 safe.

Yours respectfully, DAVS & Co. Yours respectfully, DAVIS & Co.

THE GREAT BOSTON FIRE.

JANUARY, 1880. orris & Ireland's Safe - Again Triumphant-Mes Rice, Kendall & Co's. Large Safe Reveals -Valuable contents Intact, after being sub-ject d to inten e heat for one frundred and Thirty Hours. Boston, January 2, 1880, Mesers, Morris & Ireland. Boston:

Messrs, Morris & Ireiand. Boston:

Gents:—On the night of December 2s, last, the building occupied in part by us at No. 21 Federal street, and which was four stories high and about 200 feet deep, caught fire and was destroyed, with all its contents, consuling of a very large stock of paper, took Cinders' materials and offer merchandize. While as veral other large buildings adjoining ours were burned at the same time, the flames were extinguished the following day, but our stock continued to burn for days thereafter. After a delay of 120 hours we were able to nave our safe dug out from the ruins and opened, and were pleased to find all the contents well preserved. The safe contained our most valuable books, papers, policies, etc., and we new feel sure that our judgment was correct in 1 uping one of your rafes, which we decided to dater knowing the wonderful record of your safes to the great Boston fire of 12. We regerd the protection of your safes as most remarkable, and this fire is a guaranty of its security to those who may wish to purchase.

Yours very truly, Rics, Kendall & Co. Yours very truly, RICE, KENDALL & CO.

Also a Communication from Ex-Gover-nor Alex. Rice.

MESSRS MORRIS & RELAND.

Gents: I have made careful examination of the contents of the sale purchased of you some years since by the firm of thee, Kendail & Co. and which was subject to the test of enormous heat in the great fire of last sunday night. I regard the security of the safe under the circumstances as most remarkable. None of its contents were burned, nor were any of them so injuredly heat as to be materially damaged. I should commit any securities to your safe hereafter with additional confidence. With great respect, yours very truly.

Alexander II. Rice.

THE LATEST YET. BUT THE SAME RESULT.

BUT THE SAME RESULT.

So. Norridgewock, Mo., Feb. 1, 1881.

Messrs Marris & Ireland, Boston Mass.:

The safe I rought of you last October was in a two-story wooden building, which buried Jan. 25.

The building took fire in the night, and the saft building and its contents, fell that the cellar upon a pile of dry wood, making a hot fire which lastee for ten hours. The outside of the safe was leaded red bot. It melted the handle and dial off the door the contents consisted of watches, lewelry, sliver ware, books papers &c., all of which came out typed condition. Papers lying again is the inside of the safe were, not injured. This safe shows for it self want it is, and I feed well satisfied with which has done. Please write that you can allow for it toward a new one, and obligs.
