Pig Pork Pays.

Pig farming may be profitable or a with profit, but if the number is increased is clearly determined by a long experiare much more profitable than older ones. This being true, and it is espec-ially so in the older states—a breed should be selected that matures early and fattens quickly. The best pig has the least amount of offal in dressing; is com-pact in parts, and its flesh is of the very best quality. Of such are the Essex and Suffolk and some other allied "small breeds." One can "go further and fare worse" than to select the Essex for the piggery that is to make profitable reshown when a pair of the former is taken into a neighborhood where only the 'common hog' was before.

Potatees Under Straw.

Several years ago there was much said about growing potatoes under strawand there are several reports from those who have tried the method with success. Interest in the subject appears to be renewed, to judge from inquiries. The method is very simple; the land is prepared in the usual manner and the rows marked off; the sets are dropped along the rows and very slightly, or not at all, covered with soil, and the whole field or bed, eight or ten inches in thickness with old straw. Nothing more is required until digging time unless some strong weeds should make their way through the straw, and these may be pulled. It is claimed that the yield larger and the potatoes are much hand somer than those treated in the usua Logan Outdone.

Addre s of a Big Chief when invited to take a walk: "When the white father starts the music we waltz to it. We have been asked to irrigate the country here and hoe corn like the white man. Our hearts are heavy, and we cannot promote the string bean. We will do what is right, but we cannot work. The Indian can not hunt the potato bug when the deer and antelope are ripe. He cannot dig post-holes in the hot sun when the chance calls upon him to go forth into the forest H-re, where we have roamed through the tall grass and hunted the deer and buffalo, the paleface asks us to dig irri gation ditches and plow the green earth with a rebellions mule. Here, where our war-cry has been answered back by the giant hills, we are told to whack bulls and join the Church. They come to us and tell us to go to school and wear pants. They ask us to learn the language and go to Congress. They send men to us who want us to learn to spell and wear suspenders. We cannot do this. customs are as old as the universe. We scratch our backs against the mountain pine as my people did a thousand years We cannot change. We can leave prayer. Warriors, we will go to the hand our white father has given us. We will take our squaws and our yellow dogs, our wigwams and our fleas. We will go to our new home beyond the river now, and when the autumn comes we will take a bridal tour back to this country We will construct a holocaust whatever that is, and spatter the intel lectual faculties of the ranches all over the country. This is all. I am done. I have made my remarks. I have twitter -Laramie City Boom ed my twit."

A DIFFICULT PROBLEM SOLVED.

Ambition, competition and over-exer tion use up the vital powers of men and women, so that a desire for stimulants turns. There is some prejudice against black pigs, but it should be remembered that the color is less than skin deep, and the blackest pig makes as white dressed pork as any other. There is money in pigs if a good breed is chosen and properly managed. The value of full blooded pigs over the "graded" is strikingly an already debilitated system, but builds
