The Welshmen of Luzerne county were strongly in favor of Davies for State Treasurer and do not take kindly to the candidate the machine has provided. Vennor, the weather prophet, has been pe caliarly unfortunate in his predictions of late and has lost standing in the community. He prophesied wet weather after the 15th inst., and it is very evident that we have not had anything there is likely to be "too much rain," and that and facts. The compiler has evidently spent sleet and snow will fall early with sharp frosts.

The recent showers barely wet the surface of the ground. Winter wheat should have been sowed by this time, but there are very few acres even plowed for its reception. Unless drenching rain soon falls, the farmers will begin to de spair, as it is useless either to plow or sow grain so long as the earch is in its present parched condition. A FUND FOR MRS. GARFIELD.

Soon after President Garfield was shot, Mr. Cyrus W. Field of New York, soggested the rai-ing of a fund for the benefit of Mrs. Garfield and the children. This met with popular favor and already some \$180,000 has been collected. Now that the Preresident is dead, it is proposed to increase this amount - perhaps to half a million. Subscriptions are pouring in from all parts of the country, and there are undoubtedly many citizens of Columbia County who are willing to subscribe to such a fund To save trouble, we are willing to receive sums of money, publish the names of subscribers in their own, and the chances for Democratic the COLUMBIAN, and forward the amount received to A. J. Drezel & Co., the Philadelphia bankers, who have consented to act as agents. Small contributions will be acknowledged as promptly as those of greater size.

THE PAIR. The showy posters for the County Fair have been received and distributed through the county, and will, without doubt, add to the interest already felt in the exhibition. With favorable weather, a most successful and pleas urable week may be counted upon. The premiums offered are liberal, the novelties pre sented are interesting and amusing, and the arrangements for exhibitors and spectators are complete. From present indications there will be a large and fine list of exhibits. It is much to be hoped that there will be heavy falls of rain before the opening of the fair, as the roads are in a very dusty condition and exceedingly unpleasant for driving. Unless unforeseen coningencies arise, we expect to see the grounds crowded with satisfied spectators.

CONDENSED HISTORY OF BLOOMSBURG.

We have on our table, a copy of the con densed History of Berwick, Bloomsburg, Catawissa, Danville and some other places, compiled and published by D. M. Kurtz, and neatly printed by the Catawisen News Item. We are unable to speak of the accuracy of dates taken as a whole it is only an advertising speculation. We commend the enterprise of the publisher, but we cannot see the wisdom of those who have paid their money for this style have been carried away from this town, for which those who contributed will never receive any perceptible benefit. The same amount of money invested in advertising in home papers would have been a much better investment.

The failure of the morning mails has come to be an intolerable nuisance, and the people of Bloomsburg demand that the postoffice department shall make a change. If the L & B. R. R. will not make such arrangements as will get the mails here, the government authorities should at once take measures to compel the fulfillment of the contract. The road ought not to be paid for such slovenly work. Since our last issue one mail was not received until the following day, when of course the newspapers were of no value whatever. The banks, merchants, professional and business men are seriously inconvenienced and rejured by these delays, and it is full time something let the mails come over the Catawissa road. As managed now, the mail carrying is a noisance of the worst kind and will no longer be calmly tolerated. The superintendent of the railway

On Friday last, at about half past ten o'clock in the morning, Mrs. I. S. Kuhn while in her house on Centre street, heard a crackling noise, as if caused by flames. She stepped out of doors and on looking up saw that the roof of the back kitchen was on fire. She sent one of her children to the neighboring house of Mr. John Wolf, and a daughter of tha gentleman dragged a length of hose to the endangered premises and soon a stream of water was thrown upon the roof. Mr. Gus Williams, who lives across the street, heard the alarm and run to render such aid as was necessary. A second hose was attached to the pave wash in front of the house and this afforded an ample supply of water. The incipient fire was prompt ly extinguished, before any material damage was done. Our readers should exercise great watchfulness, during the continuance of the drought, as a spark falling upon dry shinglemight produce very serious results.

KREPING WINTER APPLIES. Several statements have been recently pub-Haned of the entire success which has attended the keeping of winter apples under water. The experiment is worth repeating, observing the precaution of maintaining the temperature nearly down to the freezing-point. The advantages of this practice are, first, the exclusion of air currents, and, secondly, a temperature not liable to fluctuations, or which cannot quickly change. So long as the water one be kept quit cold, the fruit will be likely to remain sound; if too warm the skin will be likely swell and crack by over-absorption of moisture Grayes have been successfully kept in the samway, the water remaining near freezing. A damp cellar for fruit on shelves is bet er than one so dry as to cause shrivelling, provided it is cold. If warm, decay would be likely to commence soon.
