A delicious supper was served and dancing was kept up until a reasonably late hour. No more pleasant social event has taken place this season.

Our water motor is now in complete working order. A quarter of an inch stream of water runs our Campbell power press and Gordon job press at the same time, at the rate of twenty a minute. By making some further changes in the feed pipe we expect that a lot of three-eighths of an inch will give us about a quart more. From action however, prevented this admittance. The next in the powder keg manufactory where, when the alarm when the engine fell, forcing an explosion. A force of men at once went to work to raise the engine, but it was not until Tuesday morning twenty-four hours after the accident, that the engine was lifted upon the track. It was then taken to the switch, transferred to the Catawissa road and then over the bridge to the shops at Catawissa. The damage done to the engine was not great. All through travel was stopped on the L. & B. R. and passengers were transferred from one train to another. There will probably be some cost to pay for this interruption of business. The engineer and fireman saved themselves by jumping and not even the tanker followed the engine down the bank.

As an exhibition of the intrinsic worth of St. Jacob's Oil, we think the best referred to, that of Mrs. O. W. Hubbard, of this town, cured of Sciatic Rheumatism of long standing by the Oil, is particularly striking, and beyond all doubt, conclusive as to its efficacy. The remedy has our endorsement.

Col. J. P. Sanford lectured at Normal Hall on Wednesday evening to a large and appreciative audience. His subject was "Old Times and Now." In the last number of the Washington, D. C. American Register is an elaborate and able article from the pen of our townsman, Col. John G. Freese, treating on "some of the causes for the decay in public morals and religious belief." Although long, it amply pays perusal. Col. Freese is of opinion that the clergy are, to a great extent, responsible for the evils of the day, and proves this by showing how clergymen have lent their influence to unworthy and debasing political movements for thirty years past. He reviews in brief but scathing terms the corruptions and necessities of Grant's administration, and of those whom Hayes filled the places belonging to Samuel J. Tilden. The article is the ablest and strongest we have ever seen of Col. Freese's political writings.

In making your selections of Christmas presents, remember that you can always find articles both useful and ornamental at the People's Drug and Book Store. Prices reasonable.

The trial of Frederick Smith, of Catawissa, for the illegal sale of liquor, came on on Thursday evening of last week, and the jury retired to find a verdict. After some hours of deliberation they agreed and sealed their verdict. On Friday morning the result was announced in court, and it was learned that the jury had acquitted Smith, but laid the costs upon him. In view of the evidence presented at the trial this verdict was unexpected, as the opinion was general that he would be convicted. He does not escape punishment, however, as the costs will amount to between \$200 and \$300. The jury doubtless took this fact into consideration. It may be assumed that hereafter Smith will conduct his business in a different manner and not expose himself to the charge of violating the liquor laws, by selling beer at improper hours and to improper persons. In this respect the people of Catawissa have made a gain.

A misplaced switch was the cause of a singular accident at Rupert, about ten o'clock last Monday morning. An engine drawing a train of oil cars on the Catawissa R. R. was approaching the river bridge when the switch at forward ransacked it to leave the track and the pressure of the cars behind rendered it impossible to stop. At the place where the Catawissa road crosses the L. & B. R. track the engine was precipitated down the embankment and lodged diagonally across the L. & B. track, effectually stopping all travel. The trestle work caught fire and for a time it was feared that the flames would communicate with the oil cars. Prompt action however, prevented this calamity. The next in the powder keg manufactory where, when the alarm when the engine fell, forcing an explosion. A force of men at once went to work to raise the engine, but it was not until Tuesday morning twenty-four hours after the accident, that the engine was lifted upon the track. On Third street, below the Ironville Company's railroad, is a diminutive store kept by Augustus Rabb, containing a miscellaneous stock of goods, valued at but a few dollars. The proprietor lives with Joseph Ruckle, in an adjoining house. At about half past three o'clock Friday morning, Mr. Rabb heard a noise in his store and, becoming convinced that thieves were at work, aroused Mr. Ruckle. The two men proceeded towards the store, Mr. Ruckle being in advance. A man was seen standing in front of the store, which had been forced open, and another man was inside. The fellow outside pulled out a revolver and fired at Mr. Ruckle, the ball whizzing past his head. A second shot was fired, and this time the ball entered Mr. Ruckle's leg below the knee, inflicting a painful wound. The two burglars then took to their heels and escaped. There is no clue to their identity. They were undoubtedly strangers in the town, as no one living here, and knowing of the insignificant character of the goods kept in the store would have attempted to follow them. It is extremely doubtful whether the second would ever be captured as their features were not seen with sufficient distinctness to ensure identification. In the store were found two well-worn heavy chairs, which had been used to force an entrance. The ball passed entirely through Mr. Ruckle's leg and was extracted above the knee. He is suffering much pain. The country is covered with gangs of desperate ruffians, intent upon robbery and regardless of human life. The arrest and severe punishment of a few of these scoundrels would be of great benefit to the community.

Christmas Goods.

That Christmas is coming and is not far distant, is evidenced by the appearance of the stores in town. Show windows, counters and shelves are filled with holiday goods and the purchasers are many. At no other time of year do buyers so readily spend their money, and their burning faces prove that they deplete their purses with pleasure. From present appearances this Christmas will be as festive and joyous as any of the previous years. Our merchants evidently think so, judging by the large quantities of goods they have provided for the comfort and delight of their customers.

In buying presents it is well to know where to go in order to secure bargains, getting excellent articles for reasonable sums.

A BAPTIST MINISTER'S EXPERIENCE.

I am a Baptist Minister, and before I even thought of being a clergyman, I graduated with honors in a theological practice for my present profession, 40 years ago, and for many years a sufferer from quinsy; Thomas' Electric Oil cured me. I was troubled with hoarseness, and Thomas' Electric Oil always relieved me. My wife and child had diphtheria, and Thomas' Electric Oil cured them, and I have ever felt like a cure for every one who will take it. I am an essential in every place, for I tell you that I would not be without it in my house, for any one who is troubled with whooping cough, or any other kind of cough, or any one who will take a small teaspoon and half fill it with the oil, and then place the end of the spoon in one nostril and draw the oil out of the spoon into the head by sniffing as hard as they can, until the oil falls over into the throat, and practice that twice a week, I don't care how offensive their breath may be, it will clean it out and cure their catarrh. For deafness and ear-ache it has done wonders to my certain knowledge. It is the only medicine I dub with the name of "I have ever felt like recommending, and I am very anxious to see it in every place, for I tell you that I would not be without it in my house, for any one who is troubled with whooping cough, or any other kind of cough, or any one who will take a small teaspoon and half fill it with the oil, and then place the end of the spoon in one nostril and draw the oil out of the spoon into the head by sniffing as hard as they can, until the oil falls over into the throat, and practice that twice a week, I don't care how offensive their breath may be, it will clean it out and cure their catarrh.
