At a sale of gold and silver coins in New York on Monday a Confederate half dollar of 1861 brought the astonish-ing price of \$870. Only four of these coins were ever struck and this the only one known to be extant. A crown piece of Charles I of England, was bought at the same sale for \$750.

The Chinese must go. The bill now before Congress prohibits Chinese immigration for a period of twenty years. As the almond-eyed heathen are not entitled to naturalization papers and can be of no use to any political party, what's the use of 'em, any way.

John Russell Young, an able journalist, has been nominated as Minister to China. Mr. Young accompanied Grant in his tour around the world and wrote a book about it. Grant gratefully acknowledges the compliment by securing Young's nomination as foreign minister. The Stalwarts are on top every time.

The President has at last made an unexceptionable nomination for associate justice of the Supreme Court, and deserves credit therefor. The nominee is Judge Samuel Blatchford of New York, an eminent jurist and a man of honor and integrity, who is in every way qual-ified for the position. He is not a poli-

It is estimated that fully fifty thousand people have been driven from their by the Mississippi overflow and are in need of food and clothing. The government has issued 200,000 rations to the sufferers and 300,000 more will be required. It is impossible to estimate correctly the amount of losses to property, though it has been placed as high as \$25,000,000. The lands overflowed are the richest in the United States. The flood is the most disastrous ever known. and its effects will be felt for years to

The court-martial in the case of Sergeant Mason, who shot at Guiteau, rendered the following sentence: "To be dishonorably discnarged from the service of the United States, with the loss of all pay and allowances now due or to become due to him, and then to be confined at hard labor in such penitentiary as the proper authorities may direct for eight years." Mason's offence was undoubtedly a grave one and merited a severe punishment, but this sentence is too se vere. A much shorter term of imprisonment, added to discharge from the service, would have fulfilled all the requirements of justice. Mason has been confined in a damp, unwholesome cell, over run by vermin, and treated with less consideration than Guiteau.

Upon being questioned recently as to the deferred bonds and the probable date of the end of the Receivership of the Reading Company, President Gowen said: "We are waiting till the Judges of the United States Circuit Court come here, so as to make application for the withdrawal of the injunction against the deferred bonds. When it is withdrawn the bonds will be issued. We have \$1,914,000 idle in bank from the first payment, and the remaining \$8,500.

There was a sharp contest in the House, the Demo-crats desiring to amend the bill as it came from the Schate, but it was finally assed without amendment by a vote of eas 199, nays 42. There are some obectionable features in the bill, which may cause trouble hereafter. The desire, however, to do away with polygamy is so strong that the people will endorse the action of Congress. That many troublesome questions will arise, as to the disposition of Mormon Church property, is a matter of course and much de pends upon the justice and honesty with which these questions are met.

What is the use of a Congressional commission to inquire into the alcoholic liquor traffic when the census reports furnish all the statistics that are necessal field's duplicity. Gen. Rosecrans is described whose house he was trying to enter

When Columbia county farmers can buy a true Ammoniated Super-Phosphate, made chiefly from Sianghter House Meat and Bone, for \$25 per ton at the Railroad Depots, from dealers, it is folly to pay out money for the old fashioned High Cost Fertifizers, which other manufacturers persist in holding at prices varying from Thirty to Forty Dollars per ton. The past season, everywhere, has clear-

y shown, that the low cost AMMONIATED SUPER PROSPRIATES paid best on Corn, Grass and Wheat. The day for high cost Manures has passed. The experience of good farmers, who look closely at First Cost and Results, has proved that those tosting \$25 PER TON, OR LESS, with a reasonably good Analysis of free Phos-phoric Acid AND AMMONIA, have paid them by far the best. There is abundant evidence of this, right here in Columbia Co., and from farmers who don't simply guess at what they are doing.

In the four years of the use of Baugh's \$25 Phosphate, there has not been a single reasonable report of unfavorable action or any crop, and this is a testimony in itself more than volumes of certificates. We do not ask for, or publish certificates; that custom, has long ago ceased to be of any consequence either way.
