The Farm and Garden says in relation to the attacks of worms and bugs: tion to the attacks of worms and bugs:
To save all sorts of vines from the attacks of bugs and worms requires constant watchfullness and a timely use of remedies. There is no use in trying to drive the yellow striped cucumber bug off after it has injured half the plants in your ratch. Prevent it seminar when off after it has injured half the plants in your patch. Prevent it coming on by changing the natural scent of the vines. Sprinkle your vines frequently, and just as soon as they appear above the ground, with water in which a little kerosone oil has been mixed, or with a weak solution of carbolic acid, or with plaster scented with kerosone, or with a real rank-smelling manure water. Either of the above, if applied daily, will generally keep the bugs off. The large black squash bug must be hunted np every day from among your vines and killed. These bugs like to seek shelter under These bugs like to seek shelter under don't simply guess at what they are

It is a matter of surprise that there is so much ignorance evinced, by drivers on the road, in regard to watering their horses. For fear of injury, mile after mile is frequently gone over without permitting the poor, overheated animal to taste a drop of water. This is exceedingly cruel, tor horses require water as much as do men, and should have it every five or six miles, if the weather is warm. If the horse is very much over-heated, just before coming to a watering place, say a quarter of a mile or so before, "slow up" to a walk, and when you get where you can give the horse water, he will you can give the horse water, he will have become cooled off considerably, then, too, he should have his mouth sponged out, and about a half bucketful of water. Nothing refreshes a tired, jaded horse so much as a drink of water, and if he has it at regular intervals he will keep up for a long distance. He can do much better, for a whole day and over a long journey, without food than without water. If this item of watering was more carefully attended to, we should hear of fewer cases of horses being overcome by the heat during the warm summer months these good and humane rules are just as applicable to the plow horse and should be carefully observed.—John Duncan in Farmer's Magazine.

The Penalties of Tresspassing

The new trespass law passed by the state Legislature, provides that any person or persons entering upon any garden, yard, orchard, &c., and doing damage upon property of any kind, on being arrested and taken before any alderman or justice of the peace and proven guilty, shall be fined not less than \$5 nor more than \$50 for every such offense. Also, that any alderman or justice of the peace, on complaint being made by affidavit by one or more persons, shall issue his wartant to any constable or police officer for the arrest of any tresspasser or tresspassers as aforsaid and being brought before him and the offense proven, he or they shall be sentenced to pay the penalty aforsaid with cost; and if the peualty and costs are not so paid, he penalty and costs are not so paid, he or they shall be committed to the common jail of the county for a period of the same time. non jail of the county for a period of no less than one day for each dollar of the facing at the same time. enalty imposed, unless the offender or offenders give good and sufficient secu-rity to be tried before the court of quar-ter sessions on the charge of misdemeanor, which court, on conviction of the offenders, and failure to pay the penalty and costs aforsaid, shall commit him or them to the common jail of the county for a period of not less than one day for each dollar of penalty im-posed.—Germantown Telegraph,

Thinning-Out Pears.

At this season, when the pear is get ting to be some size, the thinning-out of the fruit where it is growing in clus ters and is generally overbearing, should be attended to without fail. The fear that so many growers entertain that they will be lessening the crop and los-ing income from it, is all a mistake. By judicious thinning-out the yield will not only be equally great in measure, but the increased price obtained from the enlarged size of the fruit, its appearence and perfectness, will doubly compensate for any supposed loss in quantity. We have reduced the pears upon some of our trees fully one half, and found that we did not remove enough, and that if we had taken off one half the remainder it would have been still better. A few years ago we had a stardard Belle Lucrative tree, some fifteen feet in height, apparently in perfect health, which was so overloaded with fruit that one-half of the crop was taken off at one time, which was followed a mouth or so later by the removal of one-half the rest, thus leaving only a fourth of the original crop, and yet the tree died from the over-draft upon its

In thinning out the clusters, or wher ever the specimens touch each other, should be the first to be removed, and of these select all that are imperfect in shape, or knotty, or in any way not up to the general run in size. There should always be a second thinning-out when the fruit is nearly half-grown, when wormy and all imperfect speci mens should be sorted out. We have never failed in deriving advantage from it.—Germantown Telegraph.

CHANGING THE DIET OF COWS .-Those who have dairy cows need to be careful in changing their diet. There is a great deal to be thought of in this connection. It is a fact, well establish ed by the experience of dairymen, that cows which are regularly fed with grain while they are at pasture, even if the pasture is fresh and plenty, will give more milk and make more butter or cheese than cows equally good, but living on the grass only yet if a liberal ration of meal is given to the cows living on the fresh grass, the first effect is to cause them to shrink in their milk; and if the cows which have become accustomed to have meal with their grass, have the meal suddenly taken away, they also shrink, the pas-ture in both cases being equally fresh and plenty. The loss of milk in neither case can be charged to the inferiority of the feed, since the changes in feed are the reverse of each other; while the effect is due to a change in the ac tion of the stomach, to adapt its character to the digestion of an established

HOW SELDOM

Can a man refrain from chopping the leaves of the Burdock with his cane as he passes; it is "only a weed," and yet few plants or weeds are so valuable, and few preparations so popular, as Burdock Blood Bitters, in which all its valuable properties are so skillfully combined. It cures dyspepsia, indigestion, constipation, gout, and all diseases arising from impurities of the blood. Price \$1,00.

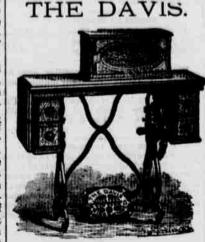

Ammoniated Super-Phosphate, made chiefly from Slaughter House Meat and

STRENGTH

to vigorously push a business, strength to study a profession, strength to regulate a household, strength to do a day's labor without physical pain. All this represents what is wanted, in the often heard expression, "Oh! I wish I had the strength!" If you are broken down, have not energy, or feel as if life was hardly worth living, you can be relieved and restored to robust health and strength by taking BROWN'S IRON BIT-TERS, which is a true tonic-a medicine universally recommended for all wasting diseases.

> 501 N. Fremont St., Baltimore During the war I was in-jured in the stomach by a piece of a shell, and have suffered from it ever since. About four years ago it brought on paraly-sis, which kept me in bed six months, and the best doctors in the city said I could not live. I suffered fearfully from indigestion, and for over two years could not eat solid food and for a large portion of the time was unable to retain even liquid nourishment. I tried Brown's Iron Bitters and now after taking two bottles I am able to get up and go around and am rapidly improving. G. DECKER.

BROWN'S IRON BITTERS I a complete and sure remedy for Indigestion, Dyspepsia, Malaria, Weakness and all diseases requiring a true, reliable, non-alcoholic tonic. It enriches the blood, gives new life to the muscles and tone to the nerves.

Sold BYALL DRUGGISTS. Juy 14, 4-W.

Wanamaker's.

We'll try the experiment awhile of giving you a little more specific news about goods. We know well, if we can get such news to you promptly, that it will be acceptable. You can write or come.

White muslin dresses at about three-quarters value. A few are shown in the window of 1301 Chestnut, each one marked with its price. Very many more are within. The materials are nainsooks,

linons d'Inde, mulls and Swisse Some are very plainly made with little or no trimming beyond some deft handling of the material itself; and some are elaborate enough. The extreme prices are \$3.50 and \$60. An excellent plain dress is sold for \$5; neat and well made.

Low prices can almost always be put upon such goods a little late in the season. It's rather early now; but profitable mak-ing appears to be over already. Just now you have the double advantage of many such dresses to choose from and low prices.

1801 and 1303 Chestnut street. Ready-made dresses of a black-and-white striped fabric that looks like summer silk, but is silk-and-cotton. For general wear they will be found quite good enough; better indeed than summer-silk. Well made and substantial; but the chief virtue is in the price, \$10.

1901 and 1902 Chestnut street, second floor. Black grenadines have been one of the most distinguished features of our trade for two months past. We have had the finest in the world, and all grades down to the poorest that we care to keep; and a

wonderful variety of patterns. Figured grenadines that brought \$2 lately are selling at \$1. And this may be taken as a general indication of what we are doing in grenadines.

Next-outer circle, south entrance to main building.

An extraordinary debeige, extraordinary in quality and width, we are selling at 50 cents; 47 inches. No lady who can use debeige will be inclined to pass it; for it is worth twice the money.

The melanges at 40 to 60 cents are worth a half more, just about. There are four qualities, and somewhere about fifty color-effects.

Second circle, southeast from center.

If dress-goods are lower than they were elsewhere-we don't say they are. Advertisements say they are; but there is a certain shyness in those same advertisements, which makes them not very impressive.-If dressgoods are lower elsewhere in our city, the fall is due to the singular spectacle here of three great classes of the most fashionable dress-goods at a fraction of their value: French melanges, small checks and small-check stripes of wool and silk-andwool, and black lainage.

We mention these three, because they stand out from the rest of the stock, conspicuous in two ways; they are fashionable, peculiarly so; and they are at half, two-thirds or three-quarters value. Third and Sourth circles, south from center.

Sash ribbon, satin-and-grosgrain, 7-inch, of value \$1.15 for 75 cents; all colors. We refer to a particular sort, of which we

have three thousand yards.

Black moire, 7-inch sash, 90 Block sash at \$1 we are out of part of the time; but we receive some every morning. Do not confound this quality with that sold at 65 cents elsewhere.

Outer circle, by south entrance to main building.

Silk mitts, ordered from the makers a year ago, include a wider range in the colors than ever before: black, 50 cents to \$4.50; white, cream, écru, terracotta, cardinal, etc., 75 cents to
