Dramatic Season.

The dramatic season will be opened by the Agnes Wallace Villa Combination, who will appear in the Opera House on next Thursday evening, Aug., 31st. This troupe gave an entertainment to our people two years ago, which was much appreci ated, and this year comes among us newly organized and promise a rare treat for those who will sieze the opportunity to attend. In places where they have given two performances, the second evening's entertainment always drew large houses. Remember, they give only one entertainment, so if you wish an evening of enjoy ment be sure and attend. The following taken from the Secuntua Dully Times gives a short description of their acting:

The entertainment given in Music Hal ast evening by the Agnes Villa Company was patronized by the people of Pittston better than any other dramatic performance given here this season; in fact, the hall was almost packed to such an extent as to be uncomfortable. The play opened with Sam B. and Little Lucie in the drama of "Miss Multon," and, from the moment the curtain raised until the close of the fifth act, the performance was watched with the deepest interest. As Sarah Multon, Agnes W. Villa created genuine admiration, and furnished ample proof that she is a leading star in her profession. Throughout the play she was ably supported. Sam "The Law and order League hereby B. Villa is, to say the least, an excellent rives notice that the laws against profanity comedian, as was fully demonstrated in will be strictly enforced. The Meteors of the Dog Days.

The August meteors made a flac display this year, and attracted much attention even from those who ordinatily care little for star gazing. On Thursday and Friday nights the meteors fell probably at the rate of a hundred in an hour. Many were 6968; foreign, 829; colored, 40; making a so small that they seemed, as they darted across the sky, to be mere lines of light. the total vote cast in this county was 7054, A large number left phosphorescent trails which were seen to curl, break up, and gradually fade several seconds after the meteors han disappeared. One, seen in the eastern heavens at ten o'clock or Thursday night, appears to have been of extraordinary size and brilliancy. It is described as looking as large as the full moon on the horizon. It was heart-shaped, and the broader end appeared to spread out into flames, in which blue and red hues were conspicuous. It seemed to fall straight downward, but this was unquestionably an effect of perspective. No

could fail to notice how their paths radiated from a common centre in the constellation Perseus. During the five days that the earth occupies in traversing the meteo orandum and account books of all kinds stream, which is in some places about 8, 000,000 miles broad, the number of thes bodies that entered our atmosphere, and were consumed by the intense heat deve the air, must have been enormous. If they were not thus consumed, a shower of me August or November meteors.

It is a fact of great interest that meteors are probably bodies which have been exown sun. Thus we are able to put our hands upon substances which have actually come from the sidereal universe, and have been vaporous constituents in the whirling furnace of a sun. - N. Y. Sun.

invitation. Strangers are invited to visit our store, when in Philadel-

and to make a convenience of it generally. It is a handy place, right by the new City Hall, at the very center of the city. It answers our purpose to welcome you, and to provide for such of your wants

The store is about twice as large as it was two or three years ago; made so by digging under ground and building overhead, and by extension on Chestnut street. Parts of the store are about as comfortable as any place can be; and one of the most comfortable parts is now being got ready for the rest and

reireshment of strangers. One of the pleasant things about the store always has been the fact that you can walk all over it, either alone or with a guide, without ever being asked to buy a thing. We know very well that most of you come to us for a good share of your supplies; why should we spoil your visit by intruding goods upon your attention, when you come to

see the place? But perhaps you are not coming to Philadelphia just now. Very well: take a cooler time. It's cool enough in the store, when you get here. You can write for any goods that you may happen to want; and get them, probably, just as well as if you were on the spot. Any how, you know, you can return whatever you get that you don't like.

We sell more sorts of things than we can put into an advertisement. So, whatever you want, suppose you drop us a line. We'll help you if we can.
