### Rules for Cooking Vegetables.

A French cook gives the following general rules for cooking all kinds of vegatables: "Green vegetables should be thoroughly washed in cold water and then dropped into water which has been salted and is beginning to boil. There should be a tablespoonful of salt for each two quarts of water. If the water boils long before the vegetables are put in, it has lost all its gases, and the mineral ingredients are deposited on the bottom and sides of the kettle, so that the water is flat and tasteless, and the vegetables will not look well or have a fine flavor. The time for boiling green vegetables depends much upon the age and time they have been gathered and the more quickly they are cooked. Below is a very good time table for cooking vegetagles.

Potatoes boiled, thirty minutes. Sweet potatoes baked, forty-five minutes. Sweet potatoes baked, sixty minutes. Sweet potatoes baked, sixty minutes. Sugness boiled, twenty five minutes. Sugness boiled, twenty five minutes. A French cook gives the following

Sweet potatoes boiled, firty minutes. Sweet potatoes baked, sixty minutes. Squash boiled, twenty-five minutes. Green peas boiled, twenty to forty

Shelled beans boiled, sixty minutes. String beans boiled, one to two hours. Green corn, thirty to sixty minutes.
Asparagus, fitteen to thirty minutes. Spinach, one to two hours. Comatoes, fresh, one hour. Tomatoes, canned, thirty minutes. Cabbage, forty-five minutes or two

hours.

Cauliflower, one ar two hours.

Dandelions, two or three hours. Beet greens, one hour. Onions, one or two hours. Beets, one or two hours. Turnips, white, forty five to sixty

Turnips, yellow, one and a half hours.

Parsnips, one or two hours. Carrots, one or two hours,

A BAPTIST MINISTER'S EXPERIENCE. I am a Baptist Minister, and before I even thought of ever being a clergy-man, I graduated in medicine, but left a lucrative practice for my present pro-fession, 40 years ago. 1 was for many fession, 40 years ago. I was for many years a sufferer from quinsey; "Thomas Eclectric Oil cured me." was also troubled with hoarseness, and Thomas' Eclectric Oil always relieved me. My wife and child had diphtheria, and "Thomas' Eclectric Oil cured them," and if taken in time it will cure seven times out of ten. I am confident it is a cure for the most obstinate cold or cough, and if any one will take a small teaspoon and half fill it with the Oil, and then place the end of the spoon in and then place the end of the spoon in one nostril and draw the Oil out of the spoon into the head by snuffing as hard as they can, until the Oil falls over into the throat, and practice that twice a week. I don't care how offensive their head may be, it will clean it out and cure their catarrh. For deafness and carache it has done wonders to my certain knowledge. It is the only medicine dubbed patent medicine that I have ever felt like recommending, and I am very anxious to see it in every place, for I tell you that I would not be without it in my house for any consideration. I am now suffering consideration. I am now suffering with a pain like rheumatism in my right limb, and nothing relieves me like Thomas' Eclectric Oil.

Dr. E. F. CRANE Corry, Pa.

### Preparing Plants for winter.

The American Agriculturist for October, says that it is a great mistake to tober, says that it is a great mistake to delay the work of preparation for winter until it is suggested by cool nights, or a warning given by blighting frosts. When a plant has been taken from a pot and planted in open ground it usually out grows its former place, and is too large for any vessel of convenient size. The root should be cut away to a considerable extent, and likewise the top or foliage must be correspondingly reduced. Novices often fail at this point, for they dislike to part with any of the new growths, and set the plant in a pot unpruned, and expect, what is not possible, that it will flourish. Cut back root system and branch system equally is the rule. Plants when thus transplanted need to be favored by being kept in the shade and sheltered from the drying winds until they have made a good start in the pots. Many of the house plants are kept in their pots during summer and they will need repotting, or the pot washed and the surface soil replaced by fresh, rich earth. A larger pot is needed by those plants whose roots have formed a mat along the inner surface. The ball of earth can be examined quickly by spreading the left hand on the vessel the stem passing between the fingers and with the other hand on the bottom invert the pot and give the edge a downward tap against some object. If this does not succeed, pour some water around the edge, and after a short time repeat the operation. All old pots should be clean, and if new ones are used soak them in water until the pores are filled. A piece of broken vessel is placed over the botom hole before filling. All pots, soil, etc., should be kept on hand.

Puny, weak, and sickly children are made healthy and strong by useing Brown's Iron Bitters.

A young country lady of Missouri slashed an insulting fop with a knife. She probably wanted to cut a swell.

Morthless Are never imitated or counterfeited. or counterfeited.

This is especially true of a family medicine, and it is positive proof that the remedy imitated

tive proof that the remedy imitoted is of the highest value.

As soon as it had been tested and proved by the whole world that Hop Bitters was the purest, best and most valuable family medicine on earth, many imitations sprung up and began to steal the notices in which the press and people of the country had expressed the merits of II. B., and in every way trying to induce sufferevery way trying to induce suffer-ing invalids to use their stuff instead, expecting to make money on the credit and good name of

Many others started nostrums put up in similar style to H. B., with variously cunningly devised names in which the word "Hop" or "Hops" were used in a way to induce people to believe they were the same as Hop Bitters. All such pretended remedies or cures, no matter what their style or name is, and especially those with the word "Hop" or "Hops" in their name or in any way connected with them or their name, are imi-

tations or counterfeits.

Beware of them. Touch none of them, but: Use nothing but genuine pop Bitters, with a bunch or cluster of green Hops on the white label. Trust nothing else. Druggists and dealers are warned against dealing in imitations or counterfeits.

Faded hair recovers its youthful color and soft, silky texture by the use of Parker's Hair Balsam.

Rose potatoes, don't tell him something else is better, but engage him a load of such as he wants, if you have them. If a customer wants an ounce or an ounce and half of salt to the pound of butter, let him have it. If he don't want it worked after it is salted and set away, carry it to him without. If he wants winthrop Greenings don't try to palm of tall Harvey on him. Get a line of customers that want your goods; study their tastes and notions, gratfy them in everything but price, and you may fix that to suit yourself, if a reasonable man. These thoughts were called to my mind the other day at Litchfield, at the June meeting of

at Litchfield, at the June meeting of Kenebec County Grange. The last topic discussed was "What varieties of apples shall we raise for home use and for market?" The discussion was opened by the well-known writer and fruit grower, W. P. Atherton, of Hallowell. Mr. A. is a deep thinker, a ready speaker and thoroughly at home on the apple or apple tree question. He commenced by saying first consult your market, see what is wanted and govern yourself accordingly. If you have a retail market and sell to consumers, find out what will suit them. Get a line of fruit that will keep you supplied with marketable and eatable apples all the time and thus keep your customers when you have once got them on your string. If you are to send your fruit to a wholesale market or run it through the hands of middle-
