in your paper. Whether it be true with others I cannot say, but during my entire life I have frequently been conscious that something was slowly and silently working to undermine my health and life. What it was I could not tell, but that some enemy of my being was de vooring me within 1 was certain. At times I would seem comparatively well and then I would be attacked with the most distressing symptoms. I would my body, my head would seem heavy; my respiration labored; my appetite would be ravenous one day and I would loathe food the day following. Then again I would lose all interest in life; would feel wearv without exertion; would become sleepy at mid-day and restless at night. Occasionally my breathing would be labored and my heart almost motionless, while at other times it would palpitate violently. I whom took a different view as to the cause of my troubles. One said I was suffering from brain disease; another spinal difficulty; others heart affection, kidney disease, etc. My symptoms were terrible, and in the hope of relief, I was cauterized, cupped, blistered and subjected to almost every known form subjected to almost every known form Having arrived at a point from which of treatment. my trouble. I regained consciousness in March last and insisted upon being taken home. The physicians advised that I remain, but I insisted upon leaving, and we began the journey, travel-ing slowly. I was met at the dock by a friend whom I recognized and then I became again unconscious and re-mained so for over a week. When I once more recognized my friend and knew my surroundings I determined to try, as a last resort, a treatment of which I had heard much but knew nothing. Neither myself nor friends had much faith that it or anything could help me, but we resolved to try. We accordingly dismissed the physicians, gave up all other remedies, and I re-joice to say that with the blessing of Him who guided us, I am to day a pletely prostrated for days.
