Maiaria is a broad nam: for many diseases—all originating in blood poisoning. Blious fever, the typhus and typhoid fevers and chills and fever are prominent members of the family. Maiaria defies alike the builders, the plumbers and the physicians. Despatring of ordinary treatment, the latter almost unanimously recommand BENSON'S CAPCINE PAROUS PLASTER as the greatest anti-mularial specific of the age. These plasters act upon the liver, spicen, bowels and kidneys.

Worn over the region of the liver, and upon the back over the kidneys, they ward off maiaria like an armor. No other plasters of this.

What you purchase, satisfy yoursaft that the word CAPCINE is cut in the center of the plaster. Subney & Johnson, Chemiats, New York, Highest awards at International Expositions.

# Holiday Goods

Wanamaker's.

One quarter in the store is peculiarly a Holiday quarter, a gift quarter; a place where just a little use is made the vehicle for a great deal of luxury. It is full now; full of wonders; full of pretty things; full of silly things; full of surprises; full of what nobody expects; full of what everybody expects; full, as it has been full near Christmas

time before. Beginning at the very centre of the store, next north are two counters, one of them very large, and one half as large, filled to overflowing with perfumeries and other toilet articles and implements. We positively must not begin to mention names, nor even classes. The only way to get away from these miraculous things

is to break away. Next northwest is a collection of small things that people used to luxury will recognize under the name small leather articles. About the biggest thing there is a portfolio or writing-case. Pocketbooks are the commonest. But such pocketbooks! Oh, yes you can get good substantial pocketbooks there, with not a cent of extravagance in them; but naturally we are thinking of the brighter ones. Leather isn't fine enough. They must enamel it, paint it, deck it out with silk and shining silver and gold. Every year people get worse and worse. Every year they must have stranger and stranger things. Silk, plush, velvet and fur bags are there, with all their

pretty and handy and cunning fastenings. But we must hurry on. Next northwest are writing-papers. Here's room for a treatise. We're not going to stop. But anybody who passes that white-looking island of trade in the sea of people, without finding out what Wanamaker Best means, in or out of Holiday time, is a loser. What a glory has a page of pure

paper! Photograph albums are next on northwest; and here the circle widens. Is all that long row photograph albums? Is it possible that so many people didn't buy albums last year, when we brought over a ship-load almost? There's a new set of people this year, may be. At least the photographers haven't gone out of business. At this end are velvet frames; yonder are boxes of leather and plush. You can pay \$60 for a box that a touch will spoil. Don't suppose that the things put out to show, even under glass, are the line ones. Whisper to the saleswoman that your pocket is full of money, and that you are aciding to get

rid of P. Brass and bronce! O'n see the mob of blasses and bronzes. Open your dictionary. The first word you come to has its image there. Preposterous things! Have your wits about you. An artist has studied out every one The artistis a wag too; for jokes abound; little touches of humor and broad farces. So there is pathos; and beauty everywhere. But shall we presume to discourse of ten thousand things in a shop, each of which was born of Art? North from centre, all the way to the outer

RATES OF ADVERTISING.

The following communication appeared in the Philadelphia Record, recently: The following receipt for diphtheria is from an English doctor who never lost a

case when giving this treatment: "One teaspoonful of sulphur in a wineglassful of water. Stir with a stick, not with metal. Use as a gargle, allowing some to pass down the throat. When not possible to use as a gargle blow a little powdered sulphur through a quill into the

throat. This gives instant relief." It is now known that diphtheria is caused by animalculæ just below the roots of the tongue, and powdered sulphur is the most powerful agent (and least harmless) known. My own children had the diphtheria - one of them severely - growing worse under the care of a good physician I suspended his medicines and applied powdered sulphur on a flat stick (a fair pinch, the child projecting its tongue,) just ncross the lower part of the tongue. This gave immediate relief, and after two or three

applications the child recovered. In a large town in Western New York there was an epidemic of diphtheria, and every case was fatal up to the time this remedy was made known to the people there, when only one child died of all those who used it. I have mentioned this to others with like results. This remedy should be made in districts where diphthe-

The Record of Monday says that a gentleman in that city, whose two little daughters were lying at the point of death with diphtheria, read the above communication. As a last resort he made a trial of it, using washed flowers of sulphur and applying it directly to the membraneous growth in the throats of the children by means of a common clay pipe. The effect was almost magical. Within two hours there was complete relief, and in two days the children, who had been given up by their physician, had completely recovered. While it is not reasonable to rely entirely upon sulphur in the Ills that beset childhood, it is doubtful if there has ever been a proper recognition of its value as a destroyer of morbid or fungus membraneous growths in cases of a diphtheritic type. Distilled or sublimed sulphur, known as flowers of sulphur, should be used, not the

owdered crude sulphur. It would be the part of wisdom for our readers to preserve this article; it might prove of value in some future emergency. Other towns have suffered from epidemics of diphtheria, and it is possible that it may sooner or later gain a foothold in Blooms-
