Many towns in this section of the state have wakened up to the fact that their growth depends upon the enterprise of regulated by the industries that give employment to the laboring classes, bring noney from abroad, and give an impetus to business. Berwick has her car shops and rolling mill that have doubled the population within a few years; Northumberland, that has been asleep for forty years, is about to erect large nail works; new nail works are being built at Danville; Shickshinny will have large pulp works; Wilkes-Barre a new paper mill: Sunbury is putting up smelting works. What is Bloomsburg doing for its own benefit? The project of the bridge works seems to have been abandoned, at least nothing more is heard of it and the subscription of \$50,000 has to go a begging. Why not invest the capital in ome other industry if the bridge works annot be secured? While all our sister owns are putting forth their energies in he establishment of manufactories, we are resting on our oars and allowing golden opportunities to slip from us. Regular semi-monthly institutes were held in Catawissa, Conyngham, and Cened in the case of Abbott and others against tralia. A regular monthly institute was held in Pine township, which did invaluable service in educating public sentiment, and in creating a deep interest in the public excreises. Although this is one of the largest and most mountainous townships in the county, the church in which the exercises were held was always filled to its utmost capacity. Three of least so far as the examining and grading the remaining children are not expected to teachers were concerned. I therefore resolved to leave nothing undone, so far as I knew, to give the teachers a fair, impartial examination. The examinations were largely written. This increased very much the work of the examiner, but was deemed the better and fairer test, consequently was adopted. It was announced at each examination that the papers would be kept on file at my office, and that teachers were cordially invited to call and examine them. This had a salutary effect, although quite a

number were rejected, no charges of unfairness, so far as I know, were preferred. All the schools in the county, but one, which was closed both times when I was ere, on account of sickness,) were visited once, quite a number twice, and a few three times. The organization of the school, the teacher's method of instruction, progress and conduct of the pupils, their studies and attendance, were carefully noted, and such suggestions made as were deemed best to remove existing errors, and for the

encouragement of the pupils.
Some time during the latter part of June, 1881, about fifteen Indian boys and two rifts at Easter-tide has been in general girls, ranging in age from fourteen to twenty years, came from the Carlisle Indian training school to this county, principalty in Greenwood township, to live with the idea prevalent among Asiatic people | the farmers during vacation, to learn to farm and to be profited generally from the the vacation, all but one or two preferred tend the free school during its session. I wish to specially call the attention of the directors to the importance of properly looking after the school-grounds and buildings during the summer. It seems to me that in many of the smaller towns of the county, a good teacher (at least as good an one for summer as winter) could be secur-LOOK HERE!-If you are going West why ed, if properly managed. Too often is the purchasing your tickets of W. B. Poust for it, and, in many instances, to one who could not obtain a provisional certificate. He can give you your choice of routes Let me earnestly, but respectfully, urge the protecting the little innocent ones from the instruction of one who knows comparatively nothing of the science of teaching or the development of the intellectual faculties. Engage the building to but one teacher; allow him to secure as many instructors as he desires; but in no case permit two, three, or more to canvass the town, dividing the

their citizens. The prosperity of a town is patronage, and making it impossible to secure a good instructor.

The following are a few of the needed improvements: Sufficient inducements to lead teachers to expend the requisite time and money for a thorough preparation for the work; pupils to be furnished with the necessary books. In the visitation of the schools, I found a great many boys and girls, young ladies and gentlemen, in school, with no other books than a speller, a reader, and an arithmetic. On inquiry, it was found that the pupils and their parents thought that, in order to make progress in these branches, it was necessary to give them their entire attention. Now, if we can get them to take up, in addition to these studies, the branches adapted to their ages and acquirements, a great barrier to progress will be obviated. We need a more regular attendance, especially on the part of the pupils of the raral districts; a more frequent visitation of the schools by the

A hundred imitators arise on every hand, and as they hold ou their sham articles to the public, yelp in chorus, "Buy this; it's just as good a Royal, and much cheaper!" The Royal Baking Powder is the standard the world over, and its imitators in their cry that theirs is "as good as Royal" are all the time emphasizing this fact. In their la borious attempts to show by analysis and otherwise that the "Snowbail" brand has as much raising power "as ,the Royal;" or that the "Resurrection" powder is as wholesome "as Royal;" or that the "Earthquake" brand is as pure as Royal," as well as by their contortive twistings of chemical certificates and labored efforts to obtain recognition from the Government chemists and prominent scientists who patrons and directors; and the furnishing over all others, they all admit the "Royal" have certified the superiority of Royal of all the schools with the necessary ap- to be the acme of perfection, which it is their highest ambition to imitate.
