THE COLUMBIAN AND DEMOCRAT, BLOOMSBURG, COLUMBIA COUNTY, PA.

The Sequel to a Dream

"One of the most remarkable occur-rences I ever heard of was related to me THE TRYING EXPERIENCE OF A PROMIrecently," remarked a State street broker.

I was told by a leading City Hall offi-cial, whose trust worthiness is undoubted, TO THE EDITOR : that a daughter of the late Harvey Jewell (who was so well and favorably known in Boston in legal and business circles, and was a brother of the late I have felt called upon to make them Marshall Jewell) had recently a very Marshall Jewell) had recently a very public. The truth can be amply veri-queer and unusual experience, and one fied : calculated to make a deep impression upon the strongest mind. Some weeks ago she had a dream in which she dis-which state I intended to make my fu-

tinctly saw an undertaker drive up to her residence with a hearse. He was a peculiar looking man. His queerly shaped nose, which looked as if it had been broken and was twisted to one I was conscious of a most peculiar senside, gave his countenance an expres sations which seemed to be the accomsion which would have made indentifica- paniment of a change of climate. tion easy and certain. He came direct- telt a sinking at the pit of my stomach tion easy and certain. He came direct ly toward her, and he said : 'Are you ready?' she suddenly awoke. The dream seemed a pecaliar one, bat did not attract much attention in the house-hold until, a few days or a week later it was repeated with exactly the same characteristics, down to the 'Are you ready?' and the awakening. And now comes the strangezt part of the story. Some little time afterward the young Some little time afterward the young lady was visiting in Cincinnati and went to an apartment hotel to call upon a friend. She stepped into the elavator with the others, and was startled to This continued in spite of all the best hear 'Are you ready ?'from the man in physicians could do so and I kept growcharge. She was still more startled on ing steadily worse. In the year looking around and beholding the ex-act picture of the man of the dream, even to the misshapen nose. It made such an impression upon her mind that mer in the south. I determined to reshe requested to be let out of the ele- turn north, but not to the extreme vator at the first landing. She stepped out, and the other occupants went out at the next landing, and the man remained. The elevator machinery gave and I again consulted physicians. I out : suddenly the car went up and found they were unable to effect a perdown, and the man was instantly killed. manent cure, and when the extreme and water, and apply with a course warm weather of summer came on I brush, and dry thoroughly.

Budding. Budding of trees is very simple and auch less trouble than grafting, but it much less trouble than grafting, but it can scarcely be described how to do it seemed as if death would be a relief can scarcely be described how to do he sufficiently well to enable one to per-form it successfully. The season for the purpose is June and July, when the new buds are fully developed. With a sharp knife remove a bud carefully by inserting the knife about an inch above from the following card voluntarily the bud and passing it down about an published by me in the Sandusky, O. inch below the bud, taking at the bud Republican, entitled :

a little of the wood. Remove it with an ivory, horn, or very smoothly pre-pared wooden knife, from the stock without injury. Then make a cut in the stock where the bud is desired to grow, about three fourths the length of medicine, or course cf treatment had the removed bud, make a cross slit near the top of the other slit, thus, †, then raise carefully up the bark at the sides, and less at the top and bottom, place the bud in it, and wrap round it closely some brasswood or suitable paper will answer, tied with cotton yarn, and it is done. The stock from which the bud its way ao thoroughly through my sysis taken and the one on which it is placed, should be from three-fourth to an inch and a half in diameter, and both nearly the same size.

is not to be wondered at, as it was un-A half column directions, as we notice in some journals, as to how budd. doubtedly one of the worst on record. ing is to be done, is only confusing and Hough Brothers, of your city induced ing is to be done, is only confusing and will not serve to impart the informa-tion so well as this brief account. It is better, however, to see it done, and two imparts a count is that I continued its use, and now, after the cayenne with a little less than a pint of vinegar, the quantity of spice to be

minutes ought to be long enough teach one all about it.

Planting by Signa.

Cabbage seed should be sown when the sign is in the head Plant potatoes in a down sign toward the feet. Plant beet and radish seed when the sign is in the leg, and onions when the sign in the light of the moon, and peas when the moon is full. Plant melon and cucumber seed when the sign is in the arms, but not in the blossom.

Plant corn and sow wheat in the light of the moon. Sow clover seed in are so prevalent and yet so serious. a down sign.

Make soap in the light of the March moon. Kill hogs on the increase of the moon ; if on the decrease the meat cooks away. Many say that a light feed before butchering will prevent this. There is always frost when the planting pumpkin seed among the moon changes with the sign in the corn, on the ground that it detracts as head.

This is called superstition, but that charge will not refute the arguments of astrologers. They ask, if the moon has an influence on inorganic bodies. why not on organic ? If on the tides, why not not on vegetable growth ?

The fact that most vegetables that grow down should be planted in the down sign, and those that grow up in an up sign looks as if the time for planting were made to correspond with the signs .- Exchange.

Hints for Husbandmen.

Germantown Telegraph.

A gentleman told us the other day that last year he had constantly for sevground where pumpkins are to be plan-ted, there will be a saving in the eleeral months green peas upon his table of his own raising, and that they lost nothing of their deliciousness. There is no difficulty in this, if gardeners are The objection that some make, that the instructed to go steadily on with their vines shade the ground while the ground plantings through the season ; but few requires all theheat it can get, is not well founded, asthe corn itself furnishes will do it on their own account, as it adds to their labor. The way, however, to raise the finest quality of peas is, after the first sowings, to plant them really canadd little more to injure the deep and mulch them, so that the soil jectors to this double crop who fail in they root in is always cool and moist. getting all they want, owe their lack of In the careless maaner in which peas are frequently cultivated, they have success to poor land, or negligent cultivavery little flavor and delicacy. It is so with raising what is called tion, and we suggest that they should

change their system by manuring and the snapshort. They are seldom plantcultivating more, and then wait and ed deep enough, and as a consequence have no more flavor than a piece of In dian rubber, and about as tough. But

the beans planted in September, and in due time are for sale in our markets, are really delicious in flavor and fairly melt in the mouth. This is the result of cool soil. But were these beans planted three or four inches deep, as we have more than once suggested, throughout the season, and mulched in the hottest portion of it, we could have, as with the peas, these vegetables at

One of the best protected clases in this country are the gunners. Pumpkins Among Corn.

Although some farmers reject the road for killing his cow has lost his case. The railroad company proved by sevenlong and well-sustained practice of teen witnesses that the schedule of the road was pasted on the fence right where the cow could see it, and, besides, much from the corn product as in the profits it adds to the stock of proventhat the engineer winked four times at der, still it is the general method purit, but the reckless animal would not sued to get a crop of pumpkins.

Be take the hint .-- Pittsburg Telegraph. sides, from our own experience and observation we have had and seen as good crops of corn with as without the pumpkins. It may appear at first thought as if the land could not sus-tain two full crops of anything; but this is not so in all cases, as in those where the two sub-TIRED OUT, ing feeling of weariness, of exhaustion without effort, which makes life a burden to so many people, is due to the fact that the blood is poor, and the vitality where the two crops do not require the same manurial stimulants, inasmuch as consequently feeble. If you are suffering from such feelings, a portion at least that one will take up wil not be required by the other. Of Ayer's Sarsaparilla course it requires very good land to raise pumpkins; but even in this case,

is just what you need, and will do you incalthough an extra crop of manure may be needed to be applied to the corn culable good. No other preparation so concentrates and combines blood-purifying, vitalizing, enrich-ing, and invigorating qualities as Avan's ment of time, and instead of one- crop from the land in a year, we gather two.
