DHILADELPHA AND READING ROA /

Buss .-- Two quarts of warm water, two pounds of sugar, one and a half pounds of butter, two ounces of allspice, six eggs beaten by themselves, one pint of yeast. Pat the flour, yeast and water together about as thick as pudding, set by the fire, let it rise to a sponge, and mix the sugar and butter together. Then beat the whole together after rising and knead in flour enough, but not very stiff : make the buns small, and brush them over with egg just as you put them into the oven.

THE SHINE ON SHER .- A CORRESPON dent asks what will remove the "shine from black silk. This cannot always be done ; it depends on how much worn it is; but sometimes it can be freshened surprisingly by sponging with cold coffee and ammonia-a teaspoonful of ammonia to nearly a cupful of coffee. Use a very soft sponge or a flannel cloth: rub very gently; and if possible to get along without so doing, do not iron the silk at all. Spread it out smoothly while damp, and pin the edges to an ironing-table or board, and let it dry in this way. If it is too much wrinkled or folded lay a cloth over the wrong side of the silk after sponging, and iron it.

KISSES -- Whites of six eggs, one weight butter, lard, sausage, etc. ; regu pound of pulverized sugar, one drop lating the hunting and killing of web-of rose oil. Pat the sugar in the dish footed wild fowl; preventing the first, and drop the whites of eggs (un-beaten) upon it. Beat them together obtained for fifty dollars or less for beaten) upon it. Beat them together thoroughly for two hours. Drop on tins with a teaspoon, turning spoon round and round until the cakes are very high and end in a point; this will give them a fluted appearance. When baked and still hot, stick two of them to gether, using a little white of egg if necessary. Lay them very care upon an inverted sieve to cool. Philadelphia. They may also be squeezed through a meringue bag like lady fingers, or they may be dropped in smooth round cakes

TOHET SOAP, -Drippings which accumulate in almost every household, can be used for the grease. They should first be boiled in water, and thea left to cool : afterward they should be re-moved from the water and boiled alone until the water is expelled. The whiter the grease can be made the better the soap will be. The ingredients of the soap (are six pounds of sal soda, seven pounds of grease, three pounds of unslackened lime, four gallous of soft water, and one half pound of borax. Boil the soda and lime in the water until they are dissolved i let the mixture stand over night to settle : pour off the clear lye, to which add the grease and pulverized borax, and boil to the consistency of honey. Take the mixture from the stove, stir in one ounce of sassafras or lavender, and pour it into a tab, or what is still better, a tight, shallow box, to cool, and when cold cut into bars and put on boards to drya MOOJE ribs?

An Illinois farmer has employed ants for very useful work, as he reports. He says he is too lazy to pick potato beet-les from the vines, and he does not like to use paris green. In this dilemma \$10 more would have saved it. Anhe bethought himself of the pugnacious character of ants, so he carried his cows. With more help he could into his potato field old pieces of wood. in which, auts had established their homes, and left them to do the work Last year the ants domiciled in two old fearce posts, he says, cleaned all the unight have paid you, not only on the beetles from a quarter of an acre, al-though their number was legion. unight have paid you, not only on the capital stock, but a profit that the mer-chant and manufacturer never obtain.

Recent Laws The Bellefonte Watchman hastaken

the trouble to arrange the important The Cabbage Pest-For two or three years past the cab-

bage crop has greatly suffered from the worm, which has become a destructive enemy of this valuable vegetable. Many attempts have been made to get rid of vererans of the war of 1812 ; repealing the recorder act of 1878 ; abolishing the Philadelphia delinquent tax office: preleaves and bulky the head, that it is next centing lapse of time from giving a to unpossible to dislodge all the worms, right to keep electric wires perpetually concealed as many of them are, in the stached to buildings ; making ineligicompact layers. The best remedyble to the office of district ottorney any ne indeed that seems to be as effectuperson who shall not have been admitt-ed to the bar two years prior to his al as under the circumstances, it can be-is to take a half a pound each of election , providing for voluntary trihard soap and kerosene oil, dissolve in bunals to adjust labor disputes in the three gailons of water, with which on, steel, glass, textile fabrics and to thoroughly sprinkle the heads. A single application may be sufficient, on and control of institutions for the but as it may not always be, a second, nsame , prohibiting the levying of liand perhaps even a third, may be nec-esary. This preparation has been test cense tax upon persons taking orders for goods by sample for individuals or companies who pay the tax at their chief place of business; fixing the standard weight of a bushel of potatoes ed over and over in the most careful manner, and it is regarded, though very simple, as a positive remedy. We print it now in brief, in order that the coltivators of the cabbage may have at sixty pounds ; enabling the Philadelphia councils to secure testimony conample, time to be ready for the enemy. cerning the management of the city de-The Lindsay Land and Lumber Cour partments : repealing the act authoriz-ing market clerks to confiscate short

Good Help Boon omical

T. B. Terry, writing in the Ohio Farmer, says it pays to keep help to do every thing in the best possible manner. and just when it ought to be done; it pays to run the farm to its full capacity. If you had hired more help, couldn't you have prepared your wheat ground a little better last fall louldn't you have cut your wheat be are it got so ripe as to shell, or be ore the straw became worthless for food ? During the hurry of having and harvest, couldn't you have saved our potatoes from going to the bugs. and got some of the weeds out of that corn? Couldn't you have got out that tone in the spring, and saved that cost ly break to your resper? Couldn't you have got out those stumps that inder so much when you are plowing and cultivating, and under drained those wet spots where your wheat was killed out ! Couldn't you have cut that clover before it got so ripe as to be almost worthless for feed, and had fat horses last winter, instead of har

ersiting before purchasing elsewhere A farmer told me only last week that he lost \$100 by letting a piece of grass stand too long last summer; that it to their advantage and profit in it bud fitw gaineger to gai was no better than straw for feed -blind seiting lin ban other said his hay was like medicine to J.
