To make a local paper interesting it is necessary that the editors should be made equainted with the local news. Many people who know of items worth publishing quietly keep them to themselves, and then find fault with the papers because no mention is made of them. People whose friends die give the papers no information of the fact, and then feel hurt if a lengthy obituary does not appear. People who get married feel slighted if the announce ment is not made in the marriage column. We cannot publish news or items of any kind of which we have no knowledge, and the only way we can get them is for our friends through the county to send them

It is pleasant to go in the extensive clothing establishment of David Lowenberg, for several reasons.
