

The Autobiography of a Wild Man.

TWELVE YEARS ON THE FRONTIERS OF MADNESS. THE FEELINGS OF A LUNATIC.

Collected in the Wilderness.

I was once insane and I often muse over my experience. There are, of course, many kinds of insanity. Some mental disorders take place so gradually that even the closest companions of the victim are at a loss to remember when the trouble began. I must have been this way in my case. One evening, after an oppressive warm day, a day when I experienced more fatigue from the heat than ever before, I sat on my porch fanning myself. "This arm that is now in motion," I mused, "must one of these days be dead. I wonder how long will the time be." Then I moved upon the evidence I had of immortality. I wanted to be rich, and I began to study over an imaginary list of enterprises. At last I hit upon radishes. People must have radishes. They should be in every store. They must be dried and sold in winter. I would plant fifty acres with radish seed, and people all over the country would refer to me as the "radish king." I would form a radish syndicate, and buy up all the radishes, and travel around and be admired. I hastened to the house to tell my wife that she was soon to be a radish queen. At the breakfast table I said:

"Julia, how would you like to be a radish queen?"

"A what?" she exclaimed.

I explained my plan of acquiring great wealth, and doing the mental act so carefully that I was alarmed. I feared that she was losing her mind. Finally she seemed to understand. She agreed with me, but told me not to say anything more about it. After breakfast I saw her talking earnestly with her father, and I knew that she was carrying on the same scheme how she intended to pay his debts when I became known as the radish king. The old man approached me with much concern and told me that I needed rest, and that I must not think of business. He was old and sadly worried, and I promised him that I would not think of business. Pretty soon I went out to inspect my radish kingdom. Looking around I saw the old man follow me. From the field I went to the village. I approached a prominent citizen, who had always been my friend, and told him how I intended to become rich. He seemed grieved, and I saw at once that he was contemplating the same enterprise. It seemed mean that he should take advantage of me, and I told him so. He tried to explain, but he made me so mad that I would have struck him if my father-in-law had not come up and separated us.

Men came after a long time, and took me away, I thought, to the penitentiary. One day a cat came into my cell, and I tried to bite it. She made the hair fly, but I killed her. I don't know how long I remained here, but one morning the sun rose and shone in at me through the window. It seemed to be the first time that I had seen the great luminary for months. A mist cleared from before my eyes. My brain began to work, and suddenly I realized that I had been insane. I called the keeper, and when he saw me he exclaimed: "Thank God! and grasped my hand. I was not long in putting on another suit of clothes and turning my face toward home. A physician said I was cured, and every body seemed bright and happy at my recovery. I boarded a train, with a gentleman, and went home. My wife fainted when she saw me, and I learned that I had recovered my mind. I asked for my little children, and two big boys and a young lady came forward and greeted me. I had been in the asylum twelve years.

Cook Carries His Point.

THE HOSTILE APACHE PRISONERS TO BE PLACED ON SAN CARLOS RESERVATION.

In view of the difficulties encountered in making satisfactory disposition of the Apache Indians, recently captured by General Crook, under existing methods of administration it was determined by the secretary of war and the secretary of the interior, after consideration, that the Apache Indians recently captured by Gen. Crook, and all such as may be hereafter captured or may surrender themselves to him, shall be kept under the control of the war department at such points as the San Carlos reservation as may be determined by the war department (but not at the agency without the consent of the Indian agent), to be fed and cared for by the war department until further orders. For the greater security of the people of Arizona, and to ensure peace, the war department shall be entrusted with the entire police control of all the Indians on the San Carlos reservation, and charged with the duty of keeping the peace on the reservation and preventing the Indians from leaving it except with the consent of Gen. Crook or his officers who may be authorized to act under him. The war department shall protect the Indian agent in the discharge of his duties as agent, which shall include the ordinary duties of an Indian agent, which shall remain as heretofore, except as to keeping the peace on an existing reservation. The authority of the Indian agent shall be limited to the administration of justice and punishing refractory Indians, all of which shall be done by the war department, as above stated.

Origin of the World Tariff.

On the coast of Spain just inside the Straits of Gibraltar, there is an island called Tarifa. When the Moors had possession of the peninsula they established a very energetic custom-house force upon it. The scale of revenue was discretionary with the collector. All formalities of entering and clearing were dispensed with. Every vessel passing through the straits in either direction was brought to and robbed to the prudent extent of not absolutely preventing the captain from undertaking another voyage. If he delivered up about 15 per cent. of his cargo or paid its equivalent in money he was allowed to go in peace. If he proved recalcitrant, and was then captured, the duties were collected on a sliding scale, he was made to walk the plank and his vessel and cargo were confiscated. Generally, however, no resistance was offered. When the vessel arrived at the port of discharge, her owners assessed the loss of the purchasers of the goods, and the result was pretty much as it is in our day. A great many people got to pay for what a smaller number had to pay for.

At the municipal election Annapolis, Md., Monday July 24th, Dr. Claude, Democratic state candidate for mayor, was elected by a majority of 55, and the Democratic candidate for city councilor by 47 majority. Three Democratic and two Republican councilmen were elected, and there was no issue. This is the first time for years that the Democrats have carried the city.

The Danger of Over-Exertion.

A STAMPAIT MAN BECOMES WEAKER THAN A CHILD AND THEN RECOVERS HIS FORMER STRENGTH.

(Waterloo, N. Y., Observer.)

In these days of rowing giants and athletic heroes physical development is more observed than ever before since the time of the Athenian games. A man who shows the elements of physical power is looked up to far more than in the days of our ancestors possibly because there are fewer specimens of well-developed manhood than then. An emissary of this paper met a magnificent specimen of physical power a few days since in the person of Dr. A. W. McNamee, of Waterloo. His muscles which showed unusual development, were as hard as wood. At his request the writer sought to touch him in the arms or legs, but found it wholly impossible. A leg-rotation of what is meant by an iron man was fully made manifest.

"Have you always been so stalwart as this?" inquired the news gatherer.

"Not by any means," was the reply.

"When a young man I was always strong and active and felt that I could accomplish anything. This feeling soon took possession of me on one occasion that I attempted to lift a box which four men found it impossible to move. I succeeded in placing it on the wagon, but in about two minutes after that time I was unconscious and remained so for hours and when I recovered consciousness I found a large quantity of blood. From that day I began to grow weak and sickly. I believed that I had suffered some internal injury and experienced a general debility, which seemed similar to the effects produced by malaria. My back was very weak. I had no appetite, and at times I was so weak that I was unable to walk. My head felt as though it were entirely open at the top and it pained me on the side intensely. In six weeks' time I had fallen away from 208 pounds to less than 170. I was in a most wretched condition. I was completely discouraged."

"What did the doctors say about you?"

"Almost everything. I consulted no less than six different physicians. They all treated me and none did me any good. At that time I was suffering intensely. I could not sleep, and was obliged to rest in a cramped, un-easy position. I was compelled to urinate every five minutes and I passed over three quarts every day. I was not living, I was existing."

"One night (how well I remember it) my wife laid out the children all in bed when the feeling came over me again. I should live but a very short time. My wife and I talked matters over and I gave the minutest directions as to what she should do after I was gone. I was in a slightly condition by any means for the doctor, on leaving town, my wife laid out the children all in bed, saying he never expected to see me again, for I was suffering with Bright's disease of the kidneys in its last stages. Within the next few days more than twenty friends came to give me good bye. Among the number was Dr. John L. Clark. He asked me what I had used in the way of medicine. I told him. He then recommended a remedy of which I had heard much, but about which I was very skeptical. If faith were an element of power it certainly was lacking in my case."

"And so you did not try it?"

"On the contrary, I did try it and to my surprise it seemed to go to test the spot. Indeed, it was the most palatable I tried. I had taken it on my mouth for months. I relished it."

"And did it cure you?"

"Do I look as if it did?"

"Yes, indeed. What was it?"

"Warner's Kidney Pills."

"A proprietary medicine?"

"Of course. What of that? I suppose I once had as great a prejudice against advertised medicines as any one could have. When I was studying medicine at Ann Arbor, Michigan, I used to vote with the rest of the class that we would fight all such remedies at all times. When a man comes down to the last hour, however, and bids his wife and friends good bye, such bigoted prejudices as these all vanish. I am sure you and any remedy that can cure is gladly welcome."

"And how have you been since then?"

"As well—or better, than before."

"Do you still exert your strength?"

"Certainly. But I do not over-exert, as formerly. My strength is increasing every day, and my health is now better than it was when I was first seized by Warner's Safe Cure, and I believe it is the best medicine that was ever compounded by any chemist or physician. I am willing the doctors should smear at me for such a statement if they choose, but I have proved it truth, and am prepared to stand by it."

"The above experience should be of great value to all who are suffering. It shows the deceptive nature of this terrible malady; that all symptoms are common to it and that there is but one way by which it can be absolutely avoided."

"The Squire's Lecture.—Five honest old farmers were once convened at an examining court. The subject of their examination was a boy who had been arrested upon a grave charge, and the question was, should he be held for trial at the circuit court."

"The honest farmers knew little of law, but they were kind-hearted and just, without that mental quality which is known as 'horse sense.'"

"They listened to the evidence; it was conclusive against the prisoner. But he was very young, and might reform if given another chance. Should he be sent up for trial, he would be sent to prison and be ruined."

"So the kind-hearted justices agreed that the eldest among old Squire Ed, should give the youth a severe lecture and discharge him."

"The squire, impressed with his serious duty, arose, ordered the prisoner to stand up, looked fiercely at him, and talking through his nose, said:—"

"Young man! it's awful, awful, I say! Clear out of my sight, you ornery rascal!"

"And he did, and the rows of laughter from the spectator, while the squire reddened with indignation that such a solemn lecture should be received with ill-timed mirth."

At the municipal election Annapolis, Md., Monday July 24th, Dr. Claude, Democratic state candidate for mayor, was elected by a majority of 55, and the Democratic candidate for city councilor by 47 majority. Three Democratic and two Republican councilmen were elected, and there was no issue. This is the first time for years that the Democrats have carried the city.

The Louisville Exposition.

There seems to be good reason for the antipathies in which the promoters of the Southern Exposition at Louisville are indulging, that will prove the greatest success of the Exposition in this country since the Centennial. Although their active efforts were begun somewhat late in the season—the opening being advertised for August 1—they have been able to create an extraordinary degree of public interest in the matter and have gained influential friends in all parts of the country, who will spend time and money in the advancement of the enterprise. The arrangements for the Exposition have been made on the most liberal scale. Beyond the ordinary entrance fee of \$25—intended not so much for the advantage of the treasury as to exclude exhibits so trifling or destitute of merit as to render them undesirable on any terms—no charge whatever is made to exhibitors. With rare, but no doubt, sagacious generosity, it is proposed to furnish power, steam, water, and other necessities free of cost, and the size of the buildings is also indicative of bold and comprehensive views on the part of the managers. The structures will cover 677,400 square feet, an area which has been exceeded in only three instances on record—by the London exhibitions of 1857 and 1862, and the Centennial at Philadelphia in 1876.

The Exposition will comprise five leading departments. The first will be devoted to natural products, mineral, vegetable and animal; the second to machinery, tools and implements; the third to manufactured articles and products; the fourth to the progress of transportation, by animal, wind, steam, and electrical power; and the fifth to art, literature and music. Each of these main departments has numerous subdivisions, in which the immense variety of exhibits drawn together on such an occasion will be accurately classified. It should also be remarked that special prominence will be given to cotton and its products.

Although designated and known as the Southern Exposition, it is to be devoted to natural products, mineral, vegetable and animal; the second to machinery, tools and implements; the third to manufactured articles and products; the fourth to the progress of transportation, by animal, wind, steam, and electrical power; and the fifth to art, literature and music.
